LARGEST CIRCULATION OF ANY SOUTH AFRICAN NEWSPAPER.

A Weekly Journal for all interested in South African Affairs.

"SOUTH AFRICA" is published every Saturday, price 6d., and may be obtained everywhere. The terms of annual subscription are 29s. inland, and 39s. abroad.

"SOUTH AFRICA" was founded in 1889 to foster the South African Gold Industry and to give the British public the benefit of expert knowledge and advice concerning the industrial resources and political affairs of South Africa.

"SOUTH AFRICA" was established at great cost by Edward P. Mathers, the only journalist who, in the early eighties, foresaw, and boldly foretold, the greatness of the South African Gold Industry.

"SOUTH AFRICA" enjoys the very special distinction of having received a gold medal at the Cape Town International Industries Exhibition, 1904-5.

"SOUTH AFRICA" occupies a position of authority, renown, popularity, trustworthiness, and commercial stability absolutely unique in the history of the Anglo-Colonial Press.

"SOUTH AFRICA" regularly, week in and week out, shows the British trader and manufacturer that the greatest of the world's markets lies in South Africa.

"SOUTH AFRICA" as any searching test or inquiry will prove, offers quite exceptional advantages to all desirous of extending trade in South Africa.

"SOUTH AFRICA" provides ample evidence at all times that manufacturers and exporters will fail to obtain the right sort of publicity in the best markets in the world till they take space in its advertising pages.

"SOUTH AFRICA" is perused from cover to cover every week by all ranks and classes from the Cape to the Congo.

"SOUTH AFRICA" is recognised by everyone interested in South African Mining as the only reliable authority on the subject.

DESCRIPTIVE PAMPHLET ON APPLICATION.

PREFACE.

The Mining Manual with the present volume has attained its twenty-fifth year. A quarter of a century is a long time in the history of mining, for since 1887 there have been discovered the Rand, Rhodesia, West African and West Australian mining fields. All these fields are situated in our colonial possessions, so that from an imperial standpoint their discovery has meant much to Great Britain. Mining was in its infancy when the first issue of the Mining Manual saw the light of day. The Kolar mines were then on the eve of proving themselves worthy the confidence of investors, and then in rapid succession came the discoveries to which we have briefly alluded. It would serve no useful purpose to review mining in all its phases during the past twenty-five years, but the advance in the industry can be realised when it is stated that only 830 companies were dealt with in the first issue of the Mining Manual, while in the current volume over 5,300 companies are referred to. That the mining industry was in dire need of a reliable reference book when the Mining Manual was first published goes without saying, and its need to-day is exemplified in the increased number of companies. The aim of the compiler has been and will be, to present reliable facts and figures, all officially vouched, in a concise form. The laudatory Press notices which have been given to the Mining Manual every successive year point to the excellence and importance of the production which now circulates in every part of the globe where mining is in progress.

The Mining Manual has advanced in importance with the mining industry, and instead of meagre particulars as to capital, date of registration, etc., the references are complete in every detail, an analysis of the last balance sheet is provided, the dividends from inception are given, ore reserve figures, borehole results, description of plant and any other information which is of service. As regards the finance companies, all the holdings where available are set out in tabular form, thus admitting of easy comparison from year to year. The size of the Book has not largely increased of recent years, but the contents have been steadily improved and this has established the Mining Manual as the *STANDARD REFERENCE WORK* on mines. In a vast industry like that of mining there are continual changes in progress, and consequently, to keep abreast with the events of the time, considerable labour and time are expended. Neither has been spared to maintain the reputation of the Mining Manual, which for completeness stands unrivalled.

The adoption of an earlier date for the production of the Mining Manual has been adhered to, but particulars have been brought up to the latest date, and all matters relating to 1910 so far published are dealt with in the volume. Every section of the Mining Market is covered, and the work provides the most comprehensive book of its kind, while every notice has been carefully revised, and all information has been independently verified wherever possible. The division of the work into three sections—Australasian, African, and Miscellaneous—has been maintained, as in practice it has been found that this form is more convenient for reference. An alphabetical index, which is indispensable to all reference works, is also given.

In spite of amalgamations the number of companies dealt with has actually increased, thanks to the inclusion of a number of companies which are often considered outside the range of similar books of reference. The principle of setting forth all the crushing results at the front of the book has been adhered to, as this system of treatment favours comprehensive reference. No alteration has been effected in the leading features of the work, amongst which is a full alpabetical index, allowing a reference to any particular company with the least possible delay. By means of this index touch is kept with many companies which have either been merged, or whilst still existing, have to a great extent ceased activity. The MINING MANUAL now endeavours to keep in touch with a company from its formation until it ceases to exist, and the result of this extended use of the index is seen in the circumstances that while particulars are supplied of 3,120 companies in the body of the work, the index, with its reference to earlier volumes and cross references, refers to 5,300 companies.

The year 1910 was not a good one from the market point of view, and therefore very few new mining companies were floated. This was to a large extent due to the rubber boom in the early part of the year which eclipsed all interest in mining, and it was not until the closing months that the excitement abated. What new mining companies there were mostly took the form of non-prospectus concerns and considerable difficulty was experienced in obtaining information beyond that issued for market purposes. In connection with the Transvaal mines few new schemes were evolved, simply because market conditions were so unfavourable. The policy of amalgamation and consolidation is still believed in by the leaders of the Rand industry, but the results so far achieved have not wholly borne out their anticipations. The Crown Mines and East Rand Proprietary have proved somewhat disappointing, although there have been extenuating circumstances. For example, the batteries are not housed under one roof, and therefore the anticipated great reduction in working costs has not been realised. If these properties possessed all the stamps in one site, instead of as at present situated, a material decline in working costs would have been recorded. The scarcity of labour has also affected results, as is explained later. The chief consolidation carried through during the past year was the Cinderella Consolidated, which was formerly known as the Cinderella Deep, situated on the dip of the Cason. An area consisting of over 2,000 claims was linked up, and a cash working capital of £681,500, after the payment of all liabilities, provided. A year ago was recorded the amalgamation of the various areas which form the Randfontein South and Randfontein Central companies. Now shareholders have been informed that these two concerns are to be amalgamated, and having regard to the large holding of the Randfontein Estates, the proposals may be adopted. A less important fusion was that of the Princess Estate, Roodepoort Central Deep, West Roodepoort Deep and the old Saxon ground embracing an area of 665 claims. During the past twelve months the Rand has provided one or two disappointments, noticeably the Vogelstruis Consolidated Deep and Cloverfield, both of which mines were closed down owing to lack of working capital. Another disappointment has been the New Reitfontein which is situated North of the main reef series. A dyke intervened, and much development work will be necessary in order to again locate the reef. Outside the Rand proper the Nigel has proved disappointing, and the shares have fallen by 50 per cent., although the output was, up to near the close of the year, well maintained. The labour position has been most unsatisfactory notwithstanding the fact that at the present time there are more Kaffirs working in the mines than at any period in the history of the Rand. Every mine is still short of its full complement of natives, and the efforts that have been made to counteract the shortage have not

proved of material advantage. In a mine which has large ore reserves blocked out lack of labour does not have such an adverse effect, but even a well developed mine cannot eat into its ore reserves without risk. The use of machine drills has proved to be costly, for a great deal of barren stone has been broken down and sent to the mills. Two of the principal innovations on the Rand were the introduction of filter presses and the adoption of sand filling of stopes. By the latter method the ore is taken out and crushed and the residue put back into the mines, thus enabling the pillars of ore which would otherwise have to remain standing to be extracted. The safety of the miners is enhanced by this method and the unsightly tailing heaps will disappear. The future of the Rand, as was pointed out a year ago, largely depends upon an efficient supply of "boys," and a more hopeful feeling prevails that a goodly number will be available during the next few months. Sir Julius Wernher, Mr. George Albu, and other competent authorities have spoken hopefully of labour prospects, and it is to be hoped that their views will be borne out. It will be remembered that the Union Government of South Africa has by the appointment of agencies throughout South Africa largely helped in tapping fresh sources. The enterprise of the Transvaal Government in offering prizes for a really efficient stope drill has not been crowned with success, but the manufacturers are continuing experiments with a view to inventing the machine required, for herein lies the solution of the labour questions. On the whole the mines in the Transvaal have done well, for the output during 1910 was to the value of £32,002,912, comparing with £30,925,768 in 1909. From the dividend standpoint hardly so good a showing has been recorded, for whereas in 1909 £9,504,621 was distributed among shareholders the total for 1910 barely exceeds £9,000,000. The amount of dividends paid may be taken as a reliable guide of the prosperity of the industry, and although the difference during the past two years is not great, yet the fact remains that 1910 does not compare favourably with the record of the previous year. Still, with the supply of electrical power and compressed air, which will be shortly available, and the starting up of several new batteries, there is justification for anticipating that 1911 will create a record both as regards output and the sum distributed in dividends.

The increased prosperity of the world is reflected in the greater demand for diamonds, which are now higher than at any time previous to the slump two years ago. No new mines have been opened up in South Africa, although the Roberts Victor Company has reported a new strike below the old tailings heap which may have an important bearing on the future of the Company. The Premier Diamond Company has been especially affected by lack of natives, and the result has been the postponement of dividends which may be regarded as only temporary.

The development of the mining industry in Rhodesia has progressed with rapid strides, although the gold output by no means reflects the improvement. The past year, however, has been noted for the flotation of several promising properties which are destined, so far as geological indications suggest, to become large producers of the yellow metal. The most important proposition is the Shamva Mines, which is a large low grade proposition situated in the Abercorn district. The Consolidated Goldfields of South Africa were responsible for the flotation and have undertaken the management. Other mines that have been introduced to this market are the Hay, the Cam and Motor, Lonely Reefs and Falcon Mines, all of which may be regarded as promising. A feature has been the absorption of the Gold Schists of Rhodesia, Etna Development, Rhodesian Abercorn Shamva Trust and Rhodesia Banket Companies by the Rhodesia Exploration Company. It was stated at the time that Rhodesia desired a strong finance company and the Rhodesia Exploration Company commenced business with a cash working capital of £1,600,000 and £1,400,000 in shares of the leading mines. A new

flotation in Paris was La Société Française de la Rhodesie, which will represent the Rhodesian Exploration Group. Although Rhodesia has progressed in the right direction, it should be pointed out that lack of labour has hampered operations, but the British South Africa Company has, with the leading mining groups, incorporated a company which will be responsible for the recruiting of natives. By this means it is hoped that there will be no trouble with labour in the future, and it is satisfactory to note that the Giant which suffered so severely during the early months of the year has received a goodly number during November and December. The baser metals although not neglected have not been developed to any great extent, although the Rhodesia Broken Hill Development Company has been reconstructed and the Northern Copper Company has successfully floated the Bwana M'Kubwa Mine. The extension of the railway from Broken Hill to the Star of the Congo was completed in the autumn, and the smelter at the Star of the Congo should be running within a few months. Although it is impossible to state what the copper production from the Tanganyika Concessions is likely to be during the next few years, it can be realised that the Rhodesia railway system must benefit from the traffics that are assured.

West Africa during 1910 has merely marked time, and the gold output has declined as a result of the shutting down of the Taquah battery and the falling off in other directions. Floods have affected the leading producer, the Ashanti Goldfields Corporation, but the various properties are developing favourably. The Taquah Banket properties have been steadily at work, and as money has been required the big financial corporations have come to the rescue. The results which have been secured have not shaken the faith of those best able to judge in this group of mines, although progress has been slow owing to the poor working conditions which prevail in the Gold Coast Colony. On the Prestea ranges great disappointment has been felt owing to the delay in getting the Prestea "A" battery to work, but by the end of March this should have been accomplished. The Prestea Block "A" is taking over the Prestea Mines on more modified terms than those agreed to in 1909. The properties of the Himan Concessions on these ranges are being exploited by a company floated by the Oceana Consolidated Company and development work is now in progress. The output of West Africa for the current year should show a considerable increase for the Abbontiakoon, the Taquah and the Prestea Block "A" should recommence crushing, while given freedom from floods the Ashanti Goldfields Corporation should largely increase its out-turn of precious metal. Although not situated in West Africa the various shares of the Nigerian Tin companies are dealt in in this section. Many undertakings have been formed, mostly without issuing a prospectus, to develop alluvial areas in the Bauchi district of Nigeria and some are washing the stanniferous deposits with favourable results. The Government intends to build a railway to the fields and this will tend to lessen working expenses.

The mining industry of Western Australia has again declined, but the developments reported during the later months of the year in regard to the Yilgarn Field give hope that a recovery will be shown in 1911. The Kalgoorlie Mines have exhibited lower values at depth, the Great Boulder at 2,600 feet being in very poor ore, while the ore in the Ivanhoe lowest level is less than the average grade which obtained during the past year. The Golden Horseshoe has met with a succession of misfortunes, and since March last dividends have been suspended. The Associated has also been under a cloud and the margin of profit that is now being obtained is exceptionally small. Of the outside mines the Sons of Gwalia has improved its position, but the Lancefield is not yet earning the profits officially contemplated. During December many properties situated on the Yilgarn Field were floated and most of them

adopted in whole or in part "Bullfinch" for their title. The Bullfinch Proprietary upon which most development work has been done must be regarded as a promising proposition, but the depth so far attained is only 100 feet, so it is impossible to form an opinion as to whether the lodes will live in depth. The field, however, has been reported upon by many experts, all of whom have expressed their confidence in the district.

The Broken Hill Mines felt the adverse effects of the coal strike, but now all troubles have been surmounted. In December an arrangement was concluded with the miners for a term of 4½ years, the wages being increased by 1s. per day. Unless the base metals advance materially the Broken Hill Proprietary and other mines which are closed down cannot be re-opened with any great chance of success, and therefore any important developments on the Barrier Ranges are unlikely to be recorded during the current year. The Zinc Corporation and Amalgamated Zinc (De Bavay's) Co., have continued to do well, and although threatened in litigation their position is not likely to be seriously affected whatever the outcome of the patents dispute.

Although the Indian output has shown no great increase, gold production has been well maintained. The Colar Mines have undoubtedly improved, the most cheering feature being the coming again of the Champion Reef at depth. The outside fields, with the exception of the Anantapur, have proved most disappointing and operations in the Dharwar district have been suspended.

Very few developments have been reported in Mexico and no new mines have been floated on this side. The Santa Gertrudis, which is owned by the Camp Bird, should start its mill in the Spring. The Mexico Mines of El Oro, as a result of the majority of the shares having gone into French hands, does not now possess the management of the Exploration Company.

Although Russia has given us few mines, the companies under British control have answered expectations with the exception of those floated some years since by the Siberian Proprietary Mines. The Orsk Goldfields has issued preference shares which carry 85 per cent. of the net profits. The Lena Goldfields has increased its property and paid for it out of profits, or otherwise the dividends would have been on a very large scale. The smelter of the Kyshtim Corporation was blown in at the end of the year and the expert's reports suggest that dividends will be paid during the current twelve months. The Atbasar properties situated in Siberia are opening up well according to the report made by Mr. Gilman Brown, E.M.

Of new districts the Porcupine, situated in Canada, resembles the Bullfinch Field. Excellent discoveries have been made down to shallow depths and engineers speak highly of prospects. The Consolidated Gold Fields of South Africa has purchased a property under the advice of its engineer, Mr. H. H. Webb, but so far no introductions to the London market have been made.

The baser metals have on the whole been fairly well maintained. Copper has been the most disappointing owing to production having largely outstripped the demand. The Great American producers in conjunction with the Rio Tinto Mine have decided to decrease their outputs and although the arrangement has been in force for four months the visible supplies of the red metal have not materially shrunk, owing largely to the demand not coming up to expectations. Lead was quietly firm all through the year and the quotation just managed to exceed £13 per ton at the close. Spelter from about £23 has risen to £24 per ton, and it is likely to be maintained at this figure or over in view of the German convention. Tin was taken in hand late in 1910, by a strong syndicate and is now over £180 per ton. The demand continues and the tin-plate

industry was never in a more flourishing condition. The iron, coal and steel industries have had again to report a poor year owing to labour troubles and stagnant trade conditions.

The information set forth in THE MINING MANUAL is classified into three sections—Australasian, African, and Miscellaneous, covering 1,035 pages. The present issue contains particulars of 3,120 companies, of which 315 are Australasian, 985 African, and 1,820 Miscellaneous. As in previous issues, alphabetical lists of Mining Directors and Secretaries and a Dictionary of Mining Terms are included. These are supplemented by a list of Engineers and Mine Managers, also the names of the companies with which they are connected. Tables of individual crushings of South African, West African, Australasian, and Indian mines will be found immediately following the index. Those relating to the Transvaal contain particulars of tonnage, ounces produced, value and profit of the individual mines. To further increase the usefulness of the MINING MANUAL the market names of many of the leading shares are put into the index of the work, with a cross-reference to the information supplied under the official title of the company. Thus Gold Fields will be found in the index with a cross-reference to Consolidated Gold Fields, and Chartered with a cross-reference to British South Africa Company.

Thanks are again tendered for the readiness and courtesy shown by the Secretaries and Officers of the several companies in responding to enquiries for information. The assistance thus rendered has materially contributed to make THE MINING MANUAL a standard authority and an indispensable book of reference.

The latest prices quoted throughout the book are those ruling on January 14th, 1911. Highest and lowest prices are also supplied for the four previous years in regard to many companies, and for these quotations we are largely indebted to the publications of Messrs. F. C. Mathieson and Sons.

An Appendix will be found on pages 1,364 to 1,372 containing the latest registrations of new companies, and other information completing the particulars up to within a few days of publication.

is and has been

For 120 YEARS the LEADING SUNDAY NEWSPAPER

An American Opinion.

In his well-known book, "England and the English," Mr. Price Collier writes as follows upon English newspapers:

"The Englishman takes his newspaper much more seriously than does the American; first, because his newspaper is, as a rule, more accurately and seriously written . . . and notably because of the wider sweep of interest . . . Such a newspaper as THE OBSERVER, which appears only on Sunday, is one of the best newspapers I know. It is well printed on good paper, its news is carefully chosen with an eye to the greatest variety of interests, and its editorial matter is sane and well-informed."

This company was registered in Victoria, Australia, September 1st, 1909, to acquire as a going concern the business and undertaking of De Bavay's Treatment Co, Ltd., registered in Melbourne, September 27th, 1905. The consideration was £255,000 in fully-paid shares, 247,500 of which were distributed among the shareholders in the vendor company, being at the rate of eleven for every four old shares held.

The assets acquired comprised:—(*a*) The exclusive right to the Australasian Letters Patent granted to A. J. F. De Bavay, for certain inventions for the production of zinc concentrates from tailings and the patented and other apparatus for using and working the same. (*b*) All mill works, plant and machinery erected, and in course of erection at Broken Hill, New South Wales. (*c*) All the tailings which were acquired by the vendor company by agreements with certain of the Mining Companies at Broken Hill (*as below*). (*d*) The full benefit and advantage of all the vendor company's contracts and agreements including those made for the sale of concentrates produced. The tailings referred to comprised: Dumped—100,000 tons from the mine of the North Broken Hill Mining Co., N.L. (purchased and paid for); 370,000 tons from the mine of the Broken Hill Prop. Block 10 Co., Ltd. (purchased and as to part paid for, the balance to be paid by this company); 150,000 tons from the mine of the Broken Hill South Silver Mining Co., N.L. (to be treated in terms of contract with that company); also the current production from the North Broken Hill Mining Co., N.L., for 10 years from January 1st, 1909, estimated from about 1,200,000 to 1,600,000 tons, and from the Broken Hill South Silver Mining Co., N.L., for 10 years (subject to termination at the expiration of 7 years, in terms disclosed in the contract with that company) from January 1st, 1910, estimated to total, if for 7 years, 1,200,000 tons; if for 10 years, 1,600,000 tons. During September, 1910, a further 152,000 tons tailings were acquired from Broken Hill Proprietary Block 10 Co., Ltd. The works and plant are situated on the lease of the North Broken Hill Mining Co., No Liability. A new mill, consisting of three sections of units and having a capacity of from 6,000 to 7,000 tons of tailings per week is erected, the first unit starting work in March, 1910, the second unit in July, 1910, and the third in October, 1910.

During half year ended April 2nd, 1910, 54,038 tons treated yielded 15,767 tons zinc concentrates and 220 tons lead concentrates. During half-year to September 30th, 1910, 161,957 tons treated yielded 47,418 tons zinc concentrates, and 767 tons lead concentrates.

An option for one year over the Potter flotation process is held.

The authorised capital is £500,000, in 500,000 shares of £1 each; all the shares are issued and fully paid, including vendors'. In October, 1909, 122,500 shares were offered for public subscription at par; the issue was underwritten by E. L. and C. Baillieu, for a commission of 5 per cent., and an option for three years over 122,500 shares at par (exercised Sept. 1910), shareholders in the vendor company had the right to apply for 45,000 shares at par. The final call of 5s. was payable May 2nd, 1910.

Dividends of 1s per share were paid Nov. 9th, 1910, and Feb. 9th, 1911.

AMALGAMATED ZINC (DE BAVAY'S)—continued.

The accounts for half year to April 2nd, 1910, submitted in Melbourne, June 16th, 1910, showed a profit of £28,816 carried forward.

The accounts to October 1st, 1910, submitted in Melbourne December 9th, 1910, showed a credit balance of £72,206 (taking spelter at £22 per ton); £10,000 was transferred to reserve for depreciation, and £25,000 to equalisation of dividends fund, leaving £37,206 carried forward; liquid assets over liabilities £119,485.

Transfer form, common; fee 2s. 6d. The 19th January, 1910, was appointed settling day in shares Nos. 1 to 247,500 and 255,001 to 377,500; and October 27th, 1910, in Nos. 377,501 to 500,000. Prices, 1910: highest, 35s. 6d.; lowest, 23s. 6d. Latest price, 33s. 6d., 34s. 6d.

THIS company was registered July 16th, 1897, and is a reconstruction of a company of the same name registered November 29th, 1894 (*see vol. for* 1899).

Various properties in New South Wales have been acquired and the Gibraltar, Gallymont, Mount Boppy, South Mount Boppy and Bimbimbi Proprietary companies floated. It was resolved on May 20th, 1903, that the company's operations be no longer confined to Australia, and interests in other parts have since been dealt with. At December, 1909, shareholdings included 32,307 Mt. Boppy, 21,450 Tasmania Gold Mining, 1,000 Mysore, 14,500 fully and 9,400 partly paid South Mt. Boppy and 36,204 shares in various undertakings.

The authorised capital is £125,000, in 125,000 shares of £1 each; 121,000 shares have been issued credited as fully paid. Under the scheme of reconstruction holders received two fully-paid shares for each fully-paid old ordinary share, and five for each fully-paid old deferred share. The directors also received 3,000 fully-paid shares for remuneration due.

Dividends paid before reconstruction: For 1895, 15s. 6d. per ordinary and 53s. per deferred share, and bonus of three fully-paid shares of Gibraltar company for every five ordinary and nine for every four deferred; for 1896, 1s. 6d., per ordinary and 1s. 10d. per deferred share.

Dividends paid by present company: 1903, 1s. 6d.; 1904, 2s. 6d.; 1905, 3s. 10d.; 1906, 2s. 6d; 1907, 2s.; 1908, 2s.; 1909, nil.

The accounts for year to December 31st, 1908, submitted January 28th, 1909, showed a profit of £17,159, making with balance forward a sum of £17,393; dividends absorbed £12,100, transferred to provision account £2,850, written off Aruba Gold shares £2,000, and tax £157, leaving £285 carried forward.

ANGLO-AUSTRALIAN EXPLORATION—continued.

The accounts to December 31st, 1909, submitted February 3rd, 1910, showed a profit of £10,932, making with balance forward a sum of £11,217; £8,000 was transferred to provision account against depreciation of shares held, making that account £17,000, less on shares held and expended on options, etc., £2,763, leaving £454 carried forward; cash £14,536, shareholdings £117 136 fully paid and £6,818 partly paid (with £4,417 uncalled liability); creditors £37; provision account £17,000.

Transfer form, common; fee, 2s. 6d. The 26th January, 1898, was appointed settling day in shares Nos. 1 to 121,000. Prices, 1907: highest, 21s.; lowest, 16s. 3d.; 1908: highest, 1; lowest, $\frac{3}{4}$; 1909: highest, $\frac{15}{16}$; lowest, $\frac{5}{16}$; 1910: highest, $\frac{5}{8}$; lowest, $\frac{5}{16}$. THIS company was registered November 25th, 1899, as the Briseis Tin Mines, Ltd., to acquire the Briseis Tin Mining Property, situated at Derby, Dorset County, in the North Eastern Tin Field of Tasmania, held under mining leases from the Tasmanian Government and covering about 180 acres; also to acquire an option to purchase (since exercised for £35,000) the Krushka Brothers' Home Mine adjoining, held under similar mining leases. The Briseis property was formerly worked by the Briseis Tin Mining Co., No Liability, of Tasmania. The purchase consideration was £510,000, paid £190,000 in cash and £320,000 in fully-paid shares. The company was promoted by the vendors, the Venture Corpn., Ltd. In 1906 an additional 330 acres, adjoining the property to the North and formerly owned by the Ringarooma Tin Mines, Ltd. (*see vol. for* 1905), was acquired for £5,000. The name was changed in January, 1909.

Water races have been constructed and operations have been directed to removal of overburden. An agreement was made with the New Brothers' Home No. 1 Co., for working the adjoining property jointly with the Briseis, the former company taking 42 per cent. and the Briseis 58 per cent. of proceeds; the property being worked out in June, 1910, the leases, &c., were acquired by the Briseis Co. for a nominal sum. The southern section of the Briseis property was exhausted in June, 1910, and on the northern section there was estimated at September, 1910, a reserve of 500 tons black tin, and on Kruska's Flat property a reserve of about 1,200 tons black tin. During 1910 an agreement was made to work the Mutual Hill property adjoining, the Briseis Co. receiving 52 per cent. of total tin won. The output for 1907 was 1,031 tons; average nett price £166 per ton; for 1908, 1,020 tons metallic tin, average nett price £133 per ton; 1909, 808 tons metallic tin; average nett price £138 per ton; 1910 (to Nov.) 609 tons black tin. An output of 45 to 50 tons black tin per month is practically assured for at least three years from October, 1910.

In January, 1909, the company acquired gold alluvial properties, known as the Wallace Leases, total area 2,112 acres, situate on Yackandandah and Sandy Creeks, North-East Victoria, Australia, together with water-rights, two bucket-dredges, &c. The consideration was £60,000 cash, of which £25,000 has been paid, and the balance (£35,000) is payable by the vendor taking 20 per cent. of actual profits or alternatively of the excess of gold recovered after deducting 2d. per cubic yard for working expenses. A new dredge has been erected making three now at work, and a fourth is under construction and is expected to be ready June, 1911.

The authorised capital is £600,000, in 600,000 shares of £1 each; all the

This company was registered November 11th, 1887, to acquire mining property, yielding silver, lead and zinc, comprising Blocks 15 and 16 of the Broken Hill Proprietary Co.'s land, in the Barrier Ranges, New South Wales. The property is about 144 acres in extent, held on lease for 20 years from 1885, at a nominal rent, now renewed for 20 years from December 31st, 1904, at same rent plus one per cent. royalty on profits up to £200,000 yearly. The purchase consideration was £1,075,000, payable £400,000 in fully-paid shares and £675,000 in cash. A mill and a concentrating plant are erected and at work (milling was suspended December, 1907 to June 14th, 1910). The lead-mill has been re-modelled and a zinc-extracting plant (Elmore process) erected to treat the tailings. The output of lead concentrates to December, 1911, and zinc concentrates to December, 1917, has been disposed of. Output for 1906: 115,229 tons treated produced 11,496 tons lead and 512,686ozs. silver, working costs, 18s. 7d. per ton; for 1907 136,675 tons treated produced 12,208 tons lead and 524,364ozs. silver. Estimated ore reserves at December 31st, 1907, 460,000 tons; at December 31st, 1909, about 500,000 tons.

The authorised capital is £264,000, in 240,000 ordinary shares of £1 each and 60,000 privileged shares of 8s. each; all the shares are issued and fully paid.

The capital was originally £1,200,000, in 240,000 shares of £5 each, of which 160,000 shares were offered for subscription by Messrs. Matheson & Co. in November, 1887, 110,176 being allotted in London and 49,824 in Melbourne. The capital was increased in August, 1890, to £1,320,000 by the creation of 60,000 new privileged shares of £2 each, ranking for dividends and other profits as if the same amount per share had been paid thereon as on the ordinary shares; but, in the event of liquidation, only to rank proportionately on the distribution of assets. These were offered at par to original shareholders in London and Australia, and allotted in September, 1890. In 1895, the capital was reduced to present amount by cancelling £4 on each £5 share and £1 12s. on each £2 share.

Dividends paid: for 1897, 1s. 6d.; 1898, nil.; 1899, 2s.; 1900, 4s.; 1901, 1s.; 1902 and 1903, nil; 1904, 1s.; 1905, 3s. 6d.; 1906, 5s.; 1907, 4s. 6d.

Accounts are made up to June 30th and December 31st and issued in November and May, but meetings are only held annually in May.

The accounts for year to December 31st, 1909, submitted May 11th, 1910, showed credit balance reduced to £8,210; cash £13,146, investments £31,662; creditors £3,481. Reserve fund £15,000. *Also see Appendix.*

Transfer form, common; fee, 2s. 6d. Separate deeds are required for each class of shares. A Colonial register is kept in South Australia, and shares may be transferred to and from the London register at a fee of 2s. 6d. The shares,

This company was incorporated in Melbourne, Australia, on the 13th August, 1885, to acquire the Broken Hill silver-lead (and zinc) mine, situate at Broken Hill Barrier Ranges, New South Wales. In April, 1893, an additional property, known as the Brisbane Blocks, was purchased for £5,000, and in 1894, two blocks of 20 acres each, known as the Underlay Blocks, were acquired for £100. In addition to concentrating works at the mine, the company has a smelting works and refinery at Port Pirie, South Australia. During 1908-9, 10 tube mills were added to the concentrating works. A spelter plant is erected. The lease of a limestone quarry situate at Point Turton, Spencer's Gulf, South Australia, also the Iron Monarch leases (for ironstone flux), area 360 acres, in same district, have

been acquired, enabling the company to supply its own wants. An option has been acquired over the Silverton Proprietary and Potosi mining properties, on which development work is in progress. Contracts have been entered into for the purchase of concentrates from the following Broken Hill companies:—South Blocks, Zinc, Block 10, Block 14, Sulphide and Junction North. In November, 1906, the ore reserves were estimated at 3,000,000 tons, and at the same amount in May, 1908.

During 1909 and 1910 mining operations were greatly interfered with owing to strike at mine and coal strike in New South Wales.

Yield from refinery for half-year to November 30th, 1909: 38,899 tons lead, 247 tons antimonial lead, 2,606,172ozs. silver and 1,054ozs. gold; for half-year to May 31st, 1910, 29,938 tons lead, 252 tons antimonial lead, 1,625,241ozs. silver. *Also see Australasian crushing returns at commencement of volume.*

The authorised capital is £384,000, in 960,000 shares of 8s. each; all the shares are issued and fully paid. The capital was originally £320,000 in shares of £20; in 1889 these were sub-divided into shares of £2; in February, 1890, a subdivision of each £2 share into five shares of 8s. each took place, and 160,000 new shares of 8s. were created for issue in London, making 960,000 shares of 8s. each.

CHILLAGOE COMPANY—continued.

purchase the assets of the Chillagoe Proprietary Co., Ltd., and first reconstructed as the New Chillagoe Railway and Mines, Ltd., in 1902 (*see vol. for* 1905). The company owns railway and mineral concessions granted by an Act passed by the Queensland Parliament, entitled "The Mareeba to Chillagoe Railway Act of 1897." The railway extends from Mareeba to Etheridge, Queensland, a distance of 246 miles; the extension from Chillagoe to Etheridge viâ Einasleigh was completed in January, 1910. The mineral concessions cover 1,480 acres, near Chillagoe, Queensland, on leases for 50 years from January 1st, 1898, subject to an annual payment of 20s. per acre, and the company has also about 1,200 acres under mineral lease applications. In March, 1901, the Mungana (Chillagoe) Mining Co., Ltd., was formed to acquire 271 acres of the mining leases; this company now holds 25,000 Mungana shares and treats that company's ore.

The railway is in operation and the mines (copper and silver lead) are being worked, smelting being resumed in October, 1902, and lead smelting started March, 1903. Additional plant (Huntingdon-Heberlein) has been erected and commenced work September, 1907. For the year ending March 31st, 1909, 77,912 tons yielded 2,966 tons copper, 6,703 tons lead, 159ozs. of gold and 786,692ozs. silver; during 1909–10, 50,798 tons yielded 2,736 tons copper, 2,253 tons lead, 1,798oz. gold and 437,449oz. silver.

The company, in addition to its interests above, has acquired mining leases in the Etheridge district and at Georgetown and Charleston. The Big Reef property in the last named district has been acquired under an option and consists of five leases nearly 4,000 feet along the line of reef; development work is in progress. The Nil Desperandum, Havelock and Queenslander Mines in the Etheridge district are being developed with satisfactory results. *See Appendix*

The authorised capital is £500,000 in 1,000,000 shares of 10s. each; all the shares are issued, 15,000 credited as fully-paid, and 985,000 having 9s. paid. One share 7s. 6d. paid was offered for each old fully-paid £1 share. The capital was increased from £350,000 in December, 1906, 300,000 shares being offered to shareholders in January, 1907, at 11s. each; the issue was underwritten.

There are £573,300 six per cent. first mortgage debentures of the Chillagoe Railway and Mines, Ltd., in bonds of £100 each (part of £575,000 authorised) redeemable at par in April, 1919, or at 110 on six months' notice; interest payable April 1st and October 1st, but in 1905 holders agreed to the following modifications: to accept deferred coupons for interest due and overdue at April 1st, 1905 (about £44,847), and future interest to be reduced to five per cent. except in years when 1s. per share dividend is paid; for year ended April, 1906, 3½ per cent. was paid; since then the full five per cent. has been paid.

There are £200,000 Chillagoe Railway and Mines, Ltd., Etheridge railway four-and-half per cent. first mortgage debentures in bonds of £100 each, of which £100,000 was offered for subscription at par in Melbourne, in February, 1908, and the balance (£100,000) at 95½ per cent. in London and Melbourne in October, 1908. The debentures are redeemable at par March 1st, 1921, and are a first charge on the concessions, &c., conferred by the Etheridge Railway Act, under which the Government of Queensland guarantees 2½ per cent. per annum on the cost of construction of the railway up to £450,000, and undertakes to purchase the railway in February, 1921 at 28⅞ times the average net earnings of the last five years. The difference between this valuation and the cost of construction to be equally divided between the Company and the Government, these debentures, both principal and interest, are therefore fully covered by the Queensland Government guarantee.

The accounts for year to March 31st, 1909, submitted in Melbourne July 27th, 1909, showed gross receipts £703,912 and a profit of £94,507 making with balance forward, etc, a sum of £108,202; debenture interest absorbed £24,915, various charges £24,915, and written off £49,563, leaving £23,270 carried.

The accounts to March 31st, 1910, submitted in Melbourne August 30th, 1910, showed gross receipts £520,425 and a profit of £88,348 making with balance forward and £4,504 adjustment charges, a sum of £116,123; debenture interest absorbed £26,540, written off £56,017, various charges £9,538, leaving £24,028 carried forward.

Chillagoe and Etheridge Railway debentures are quoted in the Official List. Transfer form, common; fee, 2s. 6d. The 22nd November, 1905, was appointed

THIS company was registered August 21st, 1906, to acquire from the Tokatea Trust, Ltd., a gold mining property in the Broad Arrow District, Coolgardie Goldfield, Western Australia, together with 20-stamp mill and cyanide plant, formerly the property of the Golden Arrow Mine, Ltd. (*see vol. for* 1906). The consideration was £4,000 cash and 70,000 shares credited as 15s paid. In May, 1908, the company acquired from the Union Consolidated Trust, Ltd., and the Claremont Trust, Ltd., a gold mining lease No. 1,334 W, area seven acres, known as Hill End, situate in Coolgardie Gold Field, W.A. The consideration was £2,500 in cash and the vendor companies had the right for four months to have allotted to them 10,000 shares each, credited as 16s. paid, the balance payable 2s. on application and 2s. two months after allotment. In October, 1908, the undertaking of Reward Gold Mines, Ltd. (*see vol. for* 1909), was acquired; the properties taken over comprised 78 acres on the Yalgoo Goldfield with 20-stamp mill. Shareholders in the Reward Co., were offered two shares credited as 4s. 6d. paid for every fully paid 10s. share held. In November, 1908, the Claremont Trust, Ltd. (*see vol. for* 1909), owning mining properties in West Africa was absorbed. Shareholders in that company were offered four shares credited as 4s. 6d. paid for every £1 share held. The company now owns 87 acres, together with 20-stamp mill on the Broad Arrow Goldfield and 78 acres with 20-stamp mill on the Yalgoo Goldfield, Western Australia, also a third interest in the Akoko Mine, West Africa, which is being developed.

The authorised capital is £100,000, in 400,000 shares of 5s. each; 319,235 shares are issued and fully paid. The capital, originally £75,000 in £1 shares, was increased to present amount in November, 1908, by the creation of 100,000 shares of 5s. each, and dividing each of the £1 shares into four of 5s. each. In August, 1906, shareholders in the Klerksdorp Gold and Diamond Co. (1904), Ltd., in liquidation, had the right to apply for 30,000 of the vendors' shares credited as 15s. paid.

The accounts for year to July 31st, 1910, submitted December 29th, 1910, showed gold receipts £1,211 and a loss of £354 increasing debit balance to £3,057; cash £1,062; calls in arrear, £113; creditors £185.

Transfer form, common; fee, 2s. 6d. The 18th September, 1907, was appointed settling day in £1 shares Nos. 1 to 20,860.

THIS company was registered February 22nd, 1896, to adopt an agreement made with David Ziman, for the purchase of properties on the West coast of the South Island, New Zealand. The following properties are now held:—Wealth of Nations Group, 119 acres, Golden Fleece, 238 acres, Humphrey's Gully (alluvial) 276 acres, Inkerman 28 acres, Water Rights, and freehold and leasehold property at Reefton used as the company's offices. Shares held: 93,224 Blackwater Mines, Ltd., 160,000 Progress Mines of New Zealand, Ltd., and 7,500 Kotuku Oil Fields Syndicate, Ltd.

The company has floated the Progress Mines of New Zealand, Ltd., and holds 160,000 shares. The Humphrey's Hydraulic Sluicing Co., Ltd., and Welcome Gold Mining Co., Ltd., were also floated, but in 1903 the company repurchased their undertakings. In 1905, the Inkerman mine, near the Progress mine, was acquired for £750, also an option over property adjoining the Waihi Grand Junction mine. During 1906, the Blackwater property, situate on the West Coast of New Zealand, consisting of 299 acres, was acquired, jointly with the Progress Mines of New Zealand, Ltd., for £30,000; this property has been sold to the Blackwater Mines, Ltd., for £200,000 in shares (*see that company*). The company is working the Wealth of Nations and Golden Fleece properties, on both of which a 20-stamp mill and cyanide plant are erected; a tube mill has been added to the Wealth of Nations plant; the Golden Fleece property has been let on tribute. For crushings *see table at commencement of volume.*

The authorised capital is £300,000, in 299,999 ordinary shares of £1 each and one founder's share of £1; 242,377 ordinary shares and the one founder's share have been issued and are fully paid. The founder's share is entitled to 25 per cent. of the profits after dividends or interest, amounting in all to 100 per cent. on the amount paid up on all the other shares constituting the issued original capital of the company (viz., £224,999), shall have been paid or satisfied. The company holds an option to April 1st, 1913, to commute the Founder's interest by the issue of 80,000 ordinary shares. The capital, formerly £225,000, was increased to present amount in 1898. The re-purchase of the two undertakings in 1903 as above involved the issue of 17,378 shares to ontside shareholders of those companies, being one for every four Humphrey's shares and one for every eight Welcome.

Dividends paid: 1899, 2s.; 1900, 2s.; 1901, 2s., with a bonus of 10 per cent. (one for every ten) in fully-paid shares of the Progress company; 1902, 2s. 1903, 1s.; 1904, 1s.; 1905, 1s.; 1906, 1s.; 1907, 1s. 6d.; 1908, 1s.; 1909, 1s. 1910, 2s. (1s. April 29th, and 1s. October 31st).

The accounts for year ended December 31st, 1908, submitted September 21st, 1909, showed receipts £35,573 and a profit of £13,231, making with balance forward a sum of £48,812; dividend (October, 1908) absorbed £12,119, leaving £36,693 carried forward.

This company was first formed in 1851, and registered as a limited liability company on the 15th March, 1864. The company owns smelting and other works at Port Adelaide, South Australia, and Newcastle (N.S.W.), and purchases the ore from neighbouring mines. In February, 1897, a share interest in the New Clara St. Dora Mining Co. (of S. Australia), was acquired in order to obtain the output of copper ore for the company's works; shares now held, 3,904.

The authorised capital is £105,000, in 70,000 shares of £1 10s. each; 68,659 shares (£102,988 10s.) are issued and fully paid. The capital was reduced from £350,000, in shares of £5, to £210,000, in shares of £3, in 1864, reduced to £140,000 by writing off £1 per share in 1886, and reduced to present amount by writing off 10s. per share in 1898. There are £35,000 six per cent. debentures of £50 each, renewed January, 1907, for five years; interest payable January 1st and July 1st.

From 1871 to 1883 dividends amounting to 54 per cent. were paid; 1884 to 1898, nil; for 1899, 6d.; 1900, 1s.; 1901, 6d.; 1902, 1s.; 1903, 1s; 1904, 1s.; 1905, 1s.; 1906, 1s.; 1907, 1s.; 1908, 1s. May, 1909; 1909, nil.

This company was registered June 30th, 1910, to acquire and deal with the Jingalalla properties in Victoria, Australia, and the property of the Mount Godkin Consolidated Copper Mines, N.L, consisting of copper mines in Queensland. The consideration was £7,000, payable £2,000 in cash, £4,750 in fully-paid ordinary and £250 in fully-paid deferred shares. The authorised capital is £20,000, in 19,750 ordinary shares of £1 each and 5,000 deferred shares of 1s. each; 1,817 ordinary shares are issued and fully paid. The ordinary shares are entitled to a fixed preferential dividend of 7 per cent. and the deferred are entitled to one-half of the surplus profits. Latest price, 1½, 1⅝.

Additional particulars officially supplied: The syndicate has acquired the right to develop and deal with the Jingallala Silver Lead Mines, four miles from Mount Bowen, immediately above the Snowy River in Gippsland, Victoria, Australia, and the Mount Godkin Consolidated Copper Mines about 35 miles from Cloncurry, Queensland. Reports on the Jingallala property have been made by R. C. Robinson, S. McClean and E. J. Dunn, and on the Mount Godkin property by B. H. H. Hooker, A.R.S.M. Samples of ore taken from the Mount Godkin property have been assayed with the following results:—

Sample Mark.	Copper Per Cent.	Gold Per Ton, Dwts.
Outcrop	5·8	Trace.
No. 1	19·2	1½
No. 2	12·5	¾
No. 3	9·5	¼
No. 4	29·5	Trace.
No. 5	11·1	,,
No. 6	15·9	1

Development work on both properties has commenced under the supervision of Ray C. Robinson, The official estimate of the value of the ore recently developed on two of the neighbouring mines in this district is £1,087,000, of which the value of one is officially estimated at £687,600, thus proving the great value of the ore bodies and their permanence at depth in this geological formation. It is proposed that after sufficient development work has been done to prove the value of the properties, a firm of well-known London engineers be instructed to make independent reports on both properties, with a view to their flotation or sale to larger companies, both of which should have a capital of not less than £250,000 each, and from which the syndicate would get about £300,000 cash and shares.

THIS company was registered October 14th, 1905, being a reconstruction of the Perseverance Gold Mines, Ltd. (*see vol. for* 1905). The property comprised the Webster's Gold Mine, 147 acres, at Mount Malcolm on the Mount Margaret Goldfield, W.A., also a 15-stamp mill and cyanide plant, but this has been abandoned and an option acquired over the Whitikouri mine.

The authorised capital is £19,500, in 260,000 shares of 1s. 6d. each; 209,080 shares (£14,652 9s.) are issued, 120,007 as fully paid and 75,359 as 1d. paid and 1s. 5d. called, making them fully paid. One share credited as 1d. paid (leaving 1s. 5d. liability) was offered for each fully-paid 10s. share of the Perseverance Co. (the issued capital of which was £143,961 in 287,923 10s. shares); holders of £8,200 outstanding Perseverance debentures agreed to their being extinguished by issue of fully-paid shares in repayment.

The accounts to May 30th, 1908, submitted December 31st, 1908, showed cash £14, calls in arrear £285; creditors £1,571.

Transfer form, common; fee, 2s. 6d. The 22nd November, 1905, was appointed settling day in shares Nos. 1 to 180,385.

During 1909, 263,361 tons produced gold value £606,316; profit £242,870. During 1910, 264,753 tons produced gold value £415,654, profit £24,887 (after deducting development and plant expenditure). Ore in sight at December 31st 1908, 1,065,409 tons, containing 633,577 ozs. fine gold; at December 31st, 1909, 1,071,638 tons, containing 593,924 ozs. fine gold; at June 30th, 1910, 993,592 tons containing 466,363 ozs. fine go'd (*also see below*). For crushings *see table at commencement of volume.*

Extract from General Manager's report dated July 23rd, 1910, as to the cause of the reduction in the output during the early part of 1910:—

"There are several causes which have led to the serious reduction of output. In the first place, the grade of ore raised for the half-year does not fairly represent the grade of the ore reserves, as we have been unable to work some of our higher grade stopes. As you are aware, the estimated value of the ore reserves at December 31st, 1909, was 11·08 dwts. We find that the grade of ore raised this year, if calculated at the value appearing in the ore reserves statements against the sections from which the ore has been taken, would be 10·5 dwts., showing that we have been able to work only such stopes as appear in the ore reserves statments at half a pennyweight below the average grade. The actual value of the ore raised for the first half of 1910 was 9·5 dwts. The difference of one pennyweight is on account of the grade of some of the stopes not coming up to expectations, and an unusual number of our stopes being in slide zones. The shrinkage in value of some of the stopes I first considered to be of a temporary nature only, but in this I have been disappointed. A large factor in the reduction of the grade has been the unusual number of stopes that are in slide zones. It is extremely difficult for anyone to realise the extent of these slides, and how they affect the value and the mining of the ore raised, unless their course has been defined well ahead by winzing, driving, and stoping. Operations have disclosed that a lot of ground from the 1,200ft. to the 1,500ft. levels is affected by slides. In calculating the reserves at December 31st, 1909, we made allowance for these slides, but we could not foresee that such a large section was affected. We are gradually getting our developments work further ahead, which will enable us to deal better with these slides in future. In view of the operations for the first half of 1910, the position and prospects of the mine are not quite as favourable as at December 31st, 1909, yet when we take into account the splendid ore bodies proved at the 2,000ft. level, the very important development at the 2,600ft. level on our eastern boundary, the prospects of our Treasure Leases, and the immense quantity of probable ore reserves that we may reasonably expect from these developments, it proves that the mine is in a sound position and has an exceedingly good outlook."

During the latter part of 1910 an independent report on the mine was made by Henri Kuss, of Paris, the French Inspector General of Mines, who estimated the ore reserves at November 1st, 1910, at 750,000 tons containing 350,000ozs. or 8dwts. per ton net.

The authorised capital is £1,500,000 in 300,000 shares of £5 each; all the shares have been issued credited as fully paid in the proportion of three for each £1 share of the old company. There are £100,000 six per cent. debentures created March, 1910, redeemable by annual drawings commencing 1912.

Dividends paid:—By the old company: 75 per cent. on January 14th, 1899; 75 per cent. in March, 1899. By present company: for 1899, 15s. per share; 1900, 15s.; 1901, 23s.; 1902, 18s.; 1903, 18s.; 1904, 18s.; 1905, 18s.; 1906, 16s.; 1907, 17s.; 1908, 16s.; 1909, 16s. (6s. April 28th, 5s. August 26th, and 5s. December 29th); 1910, 5s. April 29th.

The accounts for year ended December 31st, 1908, submitted April 28th, 1909 showed receipts £618,340 and a profit of £243,517, making with balance forward £298,271; dividends absorbed £240,000, and £35,071 was written off property,

This company was registered in Victoria July 17th, 1908, and is a reconstruction of the Great Fitzroy Gold and Copper Mines, Ltd., registered May 3rd, 1907 (*see vol. for* 1908). The property comprises gold and copper mines, area 273 acres, situated at Mount Chalmers, near Cawarrell, 16 miles from Rockhampton, Queensland, also the Tungamull Freehold Estate of 5,050 acres, situate about 24 miles from the mine (acquired during 1910 for water and timber rights). Smelting plant is erected and commenced work February, 1908; extensions have been made, and the plant now consists of two furnaces with a capacity of 200 tons per day each. It is proposed to run one furnace only and keep one in reserve. A concentrating plant to treat the silicious ore bodies started work March, 1910, but was shut down in July, 1910, and has since been dismantled. A flotation plant (Minerals Separation Process) with a capacity of 6,000 tons monthly has been erected and started work January, 1911. A sintering plant (Dwight-Lloyd Process) has been installed to make the concentrate more amenable to treatment in the smelters. From July, 1908, to June 30th, 1909, 34,261 tons yielded 980 tons copper, 5,990ozs. gold and 32,499ozs. silver; cost per ton 31s. 2 3d. During 1909-10, 53,416 tons treated yielded 1,268 tons copper, 6,482 ozs. gold and 35 204 ozs. silver; costs 32s. 8d. per ton. *For monthly returns see table at commencement of volume.* Ore reserves at July 12th, 1910, 654,833 tons value 2 98 per cent., copper and 2 57 dwts. gold, or 46·56s. per ton.

The authorised capital is £600,000, in 600,000 shares of £1 each, 450,000, shares are issued and fully paid. Shareholders were offered one new share credited as 18s. paid for every old fully-paid share held. In May, 1909, 25,000 shares were taken up at par, subscribers having an option for two years over 100,000 shares at same price. There are £75,000 (part of £100,000) six per cent. first mortgage debentures, issued at par, June, 1910, repayable at par in five years, holders having the right for the period of the debentures or not less than two years, to subscribe at par for 75,000 shares.

The accounts to June 30th, 1909, submitted in Melbourne August 31st, 1909, showed product sales £73,035, and a net profit of £12,187; £11,687 was written off construction and development accountsleaving £500 carried forward. THIS company was registered June 2nd, 1898, as the Star of Gwalia, Ltd., to acquire four leases, 96 acres in all, adjoining the Sons of Gwalia Mine, Western Australia. The consideration was £110,000, in fully-paid shares. In 1900, the name was changed, and the company purchased (for 465,000 fully-paid shares) the undertakings of the Empress of Gwalia, Ltd., Pride of Gwalia, Ltd., and Prince of Gwalia, Ltd. (*see vol. for* 1901), holding adjacent properties. These Gwalia leases have all been abandoned.

Early in 1902, the company acquired from the London and Westralian Mines and Finance Agency, Ltd., two new properties known as Lake Violet, with 10-stamp mill erected, and Essex, adjoining, situate in the Lake Way District, East Murchison Gold Field, W.A. In 1906, the assets, comprising 114 acres, £5,000 cash and 20-stamp mill, of the Lake Way Goldfield, 1899, Ltd. (*see vol. for* 1907), were acquired for 150,000 fully paid shares; the additional 20 stamps have been added to the 10-stamp mill, making 30 stamps of 1,000 lbs. each. The Essex property has been abandoned; on the Lake Violet the mill, a cyanide and slimes plant, and a filter press are erected. It is proposed to erect a roasting plant for the treatment of the sulphide ore. The total area now held is 276 acres. Ore reserves at June, 1910, 48,690 tons, average value 31s. 10d. per ton. For crushings *see table at commencement of volume.*

The authorised capital is £100,000, in 800,000 shares of 2s. 6d. each; all the shares are issued and fully paid. The capital was originally £160,000, in £1 shares, 25,000 of which were offered for public subscription by the two vendor companies in June, 1898, and allotted; in July 1900, the capital was increased to £625,000 in £1 shares, in order to acquire the other undertakings as above, and Star of Gwalia shareholders received from the original vendors a bonus of 15 per cent. in fully-paid shares. On December 22nd, 1902, it was resolved to reduce the capital to £50,000 by cancelling 200,000 shares surrendered for the purpose by the London and Westralian Mines and Finance Agency, Ltd., and 25,000 reserve shares, and by writing down the remaining £1 shares to 2s. 6d. each; this reduction received the sanction of the Court on January 21st, 1905. The capital was increased from £50,000 to £75,000 in November, 1906 and to present amount in September, 1903, 200,000 shares being offered to shareholders *pro rata* at 3s. 3d. each, the issue being guaranteed; the final call of 1s. was payable February 20th, 1909.

GWALIA CONSOLIDATED—continued.

The accounts to June 30th, 1908, submitted November 24th, 1908, showed bullion receipts £54,691, and a net profit of £2,109 carried forward after writing off £8,000; cash £951, debtors £459; creditors £1,184 (capital since increased).

The accounts to June 30th 1909, submitted November 15th, 1909, showed receipts £82,497, and a profit of £11,424 after writing off £13,901, making with balance forward £13,533, which was carried forward; cash balance after deducting liabilities £33,441. *See Appendix for later accounts.*

Transfer form, common; fee, 2s. 6d. A share register is kept in Adelaide. A settlement has been granted in shares Nos. 1 to 600,000, and Nos. 600,001 to 800,000. THIS company was registered in Western Australia November 4th, 1908, as the Great Tower Hill Gold Mines (1908), Ltd., to acquire the undertaking of a company of same name registered in Western Australia, May 30th, 1904 (*see vol. for* 1908). The name was changed November 28th, 1908. The company owns the following mining properties in Western Australia: Paddington Consols, area 134 acres, Broad Arrow Goldfield, with 10-stamp battery and Great Tower Hill mine, area 295 acres, situate at Mount Leonora, Mount Malcolm district, on which a 40-stamp mill is erected, also cyanide plant. The Paddington lease is let on tribute. Development work is in progress on the Great Tower Hill property.

The authorised capital is £250,000, in 205,250 non-cumulative six per cent. preference and 794,750 ordinary shares of 5s. each. All the preference and 500,100 ordinary shares are issued and fully paid. The final call of 3d. on the ordinary shares was payable August 25th, 1909. Preference shareholders in old company received one new preference share credited as fully paid for every two old fully-paid preference shares of 1s. each, and ordinary shareholders received six new ordinary shares credited as 4s. paid for every five old fully-paid ordinary shares of 5s. each. The subscription of 500,000 ordinary shares was guaranteed by the London Colonial Synd., Ltd., for a commission of 11¼ per cent. There are £2,000 ten per cent. debentures redeemable in 1913, which were issued in exchange for debentures in the old company.

The Manager in his report dated November, 1909, stated as follows:—"The lode was cut through in the new shaft at a depth of about 60 feet from the surface, the width, as I cabled you, is five feet of quartz and about 2 feet of schist on the foot-wall side is gold-bearing, the values of same, including everything, I can safely say, are not less than 25dwts. free gold; you can understand that my estimate must be a modest one when I tell you there is about 2 feet 6 inches of the most beautiful-looking ore that I have ever seen, highly mineralised and containing carbonate of copper, oxide of iron, chromate of lead, and carrying visible gold in almost every piece of rock broken. The lode in itself is in schist, dipping east at an angle of 55 degrees from the horizon and about 75 feet from the granite contact on the east side of the ore channel. I expect this will take up its position on the schist and granite contact at a lower level. I am now down about 80 feet with the shaft, and cross-cutting east and west to connect with similar work from the shaft which we will describe as No. 1; this shaft, in which the lode has been cut, is situated about 200 feet east of No. 1, and we will refer to it in future as No. 2. Yesterday we commenced to drive from No. 2 East, and this morning I made my pannings from the schist formation, result between 6dwts. and 7dwts. I may here state that to my knowledge gold has never previously been found in schist on this property, although on the adjoining property, the Sons of Gwalia, the best values are obtained from schist formation. I expect to encounter the lode at about 15 feet

GWALIA PROPRIETARY—continued.

from the shaft in the cross-cut East. I may add that this portion of your property has never been prospected until I commenced operations—not only on the South end, but, I am also working much further East from the quartz outcrops than has hitherto been worked. I think that I explained to you in my last letter that this property is practically identical with that of the Sons of Gwalia, and I think that you will agree with me that our latest developments have borne out the opinion held by me at the time of writing. I am almost confident of encountering other ore bodies before reaching the granite and schist contact.

This property, judging from its present appearance, leads me to predict that it eventually will become one of the big dividend-payers in this country. I will keep you fully advised of development progress, and if I make any important discovery I will inform you by cable. I am looking forward to finding on the contact something good. I also wish to impress on you that the present discovery on your property is quite distinct and far away from any other line of previous development.

THIS company was registered August 14th, 1909, and is a second reconstruction of the Hampton Plains Estate, Ltd., registered October 3rd, 1894, and first reconstructed as Hampton Plains Estate (1906), Ltd., on December 13th, 1906. The properties comprise 189,192 acres freehold land, with mineral rights, subject to royalty, and 292,932 acres pastoral leasehold land, situate near Coolgardie, Western Australia. In 1895 certain rights were sold to the Coolgardie Waterworks, Ltd. (*see vol. for* 1900), but in January, 1901, it was decided to purchase the undertaking of that company and the waterworks is now owned by this company, but the revenue has almost ceased owing to Government supply; the company has also brickworks, township, &c. The Lady Millar Mine at Norseman is being developed, and it is proposed to form a subsidiary company to work same. At the time of reconstruction the company agreed to subscribe for 25,000 fully paid shares in the Uruguay Consolidated Gold Mines, Ltd., receiving as commission 35,000 fully paid shares, making 60,000 shares now held.

The authorised capital is £120,000, in 240,000 shares of 10s. each; 202,000 shares (£101,000) are issued and fully paid. There is £93,720 debenture stock issued in exchange for debenture stock in Hampton Plains Estate (1906), Ltd., with rights as below: Under the scheme of reconstruction shareholders were offered one share credited as 6s. 6d. paid for each fully-paid 10s. share in Hampton Plains Estate (1906), Ltd., the liability being payable 6d. on application, 1s. on allotment and the balance in calls of 6d. at intervals of not less than three months. The debenture stock bears interest at four per cent. per annum, payable (until November 30th, 1912) out of the revenue to be obtained from assets in Australia taken over from the old company, but in any year when the profits are sufficient to pay ten per cent. on the share capital the interest is to be six per cent. half the surplus remaining after paying dividends and interest to be applied in redeeming debentures. After November 30th, 1912, the interest is chargeable on all revenue and assets. The stock is redeemable at par by annual drawings of £5,000 commencing January, 1914, and the proceeds of the sale of any of the assets are to be applied towards redemption; holders have the right to convert into fully-paid shares at par at any time. Interest payable February 28th and August 31st. The capital was increased from £200 in September, 1909.

The accounts to May 31st, 1910, submitted December 19th, 1910, showed £1,692 to debit of profit and loss; cash £1,798; debtors £1,476; Uruguay shares held £25,000; bullion £391; creditors £5,804; debenture interest account £1,884.

Transfer form, common; fee, 2s. 6d. The 7th December, 1910, was appointed settling day in shares No. 1 to 202,000.

This company was registered April 5th, 1906, and is a second reconstruction of the Lake View South Gold Mine (W.A.), Ltd., registered December 9th, 1895, and first reconstructed September 12th, 1901 (*see vol. for* 1906). The property, acquired by the original company from the Associated Gold Mines of Western Australia, Ltd., consists of lease No. 75E, about 20 acres, known as Lake View South, in the East Coolgardie Gold Fields, Western Australia. In 1903 the company acquired the Robinson Mine, 50 acres, at Kanowna, W.A., with a 20-stamp mill. In 1906 the Wallaby Central, situate at Yarri, 68 miles east of Kookynie, W. A., was acquired, and two other leases were subsequently pegged out, but during 1910 this property was disposed of. The Lake View South and Robinson properties are being worked by tributors. A small interest in a syndicate operating on the Maikop Oil Field, South Russia, has been acquired.

The authorised capital is £80,000, in 400,000 shares of 4s. each; 126,673 shares are issued, and fully paid; the final call was 6d. payable July 1st, 1906. One share 2s. paid was offered for each old fully-paid £1 ordinary share, the 12,000 old preference shares being discharged by payment of £1,000 cash.

The accounts for year to December 31st, 1909, submitted September 22nd, 1910, showed profit and loss debit balance increased from £1,243 to £1,956; cash £861, calls in arrear £92, debtors £423, loan against security £2,000, creditors £50.

This company was registered June 14th, 1907, to acquire the undertaking of a company of same name registered in Melbourne in 1906 (*see vol. for* 1907). The property comprises the Mount Elliott Copper Mine of 300 acres, 72 miles south of Cloncurry, North Queensland. A railway has been constructed to connect the mines with Cloncurry, one half the cost (estimated at £93,900) being borne by the Queensland Government and the balance by the Cloncurry Smelting and Railway Co., Ltd. in which the Mount Elliott Co. holds 60,000 £1 shares. Development work is in progress; depth of main shaft 550 feet. The ore contains copper, also gold and silver; a new smelting plant has been erected with a capacity of 550 tons blister copper monthly. Smelting commenced May, 1909, was suspended August, 1909, and resumed with new plant September, 1910, and to December 31st, 1910, 2,310 tons blister copper, 4,101ozs. gold and 2,480ozs. silver were produced. A contract has been made for three years for the disposal of the blister copper. Ore reserves at June 30th, 1910, above No. 4 level, 140,000 tons, value 10 to 12 per cent. copper, and 300,000 tons, value 3 per cent. copper. Prospects of meeting with a body of high grade ore at the 5th level are most promising.

The authorised capital is £750,000 in 150,000 shares of £5 each; 130,000 shares (£650,000) are issued and fully paid. Shareholders in the former company (capital £120,000 in £1 shares) received one new fully-paid £5 share for each old £1 share held. In May, 1909, 10,000 shares were offered for public subscription at par, shareholders receiving preferential allotment; subscribers have the right to June 30th, 1911, to take up two shares at par for every share subscribed; the issue was guaranteed for a commission of 10 per cent. cash.

The accounts for year to June 30th, 1909, submitted December 1st, 1909, showed a loss of £13,115, increasing debit balance to £23,258. The accounts to June 30th, 1910, submitted December 6th, 1910, showed a profit of £6 790, reducing debit balance to £16,467; cash £2,871, copper and matte on hand £17,293, debtors £94, investments at cost £60,000; creditors £863.

A share register is kept in Melbourne. Transfer form, common; fee, 2s. 6d. The shares are quoted in the Official List. The 10th September, 1909, was appointed settling day in option certificates for 20,000 shares. Prices, 1907: highest, $5\frac{3}{4}$; lowest, $1\frac{29}{32}$; 1908: highest, $4\frac{25}{32}$; lowest, $2\frac{3}{16}$; 1909: highest, $4\frac{13}{32}$; lowest, $3\frac{1}{8}$; 1910: highest, $5\frac{9}{16}$; lowest, $3\frac{9}{16}$. Latest price, $5\frac{3}{16}$, $5\frac{5}{16}$.

THIS company was registered in Melbourne, Victoria, August 11th, 1903, to take over the undertakings of a former company of same name and the North Mount Lyell Copper Co., Ltd.

The former Mount Lyell Mining and Railway Co., Ltd., was registered in Melbourne, Victoria, in 1893, being a reconstruction of a former company of same name formed to acquire copper mining leases comprising 323 acres situate at Mount Lyell, about 18 miles from Macquarie Harbour, on the west coast of Tasmania, also 43 acres for reduction works site. The ore of the mines consists of a mixture of iron and copper pyrites with silver and gold. A special lease for 30 years was granted by the Tasmania Legislature in September, 1893. The company constructed a railway from the mines to Macquarie Harbour. In August, 1900, the adjoining property of the South Tharsis Mining Co., No Liability, was purchased for £45,000 cash; the adjoining Royal Tharsis Mine, area 40 acres, was also acquired at a total cost of £13,347, and the King Lyell Mine at a cost of £2,600. In March, 1902, M.L. Reserve leases and Glen Lyell leases, and in September, 1902, North Crown Lyell Block No. 602-93 (65 acres) and Central Lyell Block 47G (10 acres) were also acquired.

The North Mount Lyell Copper Co., Ltd., was registered on 20th September, 1897, to acquire the property of the North Mount Lyell Mining Co., No Liability, of Melbourne (*see vol. for* 1902), consisting of 30 acres of mining land, in three contiguous blocks of 10 acres each, situate in the northern portion of the Mount Lyell field, Tasmania, and held under mining leases from the Crown; also the right to construct a railway 28 miles long from the mines to Macquarie Harbour. The chief product is copper, but the mine also yields gold and silver. The purchase

consideration was £395,000, in 395,000 fully-paid shares. The railway was constructed, and wharf, pier and jetty at Macquarie Harbour completed. The company also erected smelting works.

The adjoining property of the Lyell Tharsis Mining Co. (*see vol. for* 1905) has been purchased for £2,000, also the Chester Mines (iron sulphur deposits) near Farrell Junction, making total area now held, about 4,108 acres in all. Smelting was commenced by former company in June, 1896, and 11 furnaces are now at work, also plant for treating converter matte. The company has also erected works at Yarraville and Port Adelaide, South Australia, and at Rocky Bay, Fremantle, Western Australia, for the manufacture of superphosphates. For half-year to March 31st, 1910, 190,446 tons produced 4,164 tons blister copper, containing 4,114 tons copper, 338,976ozs. silver and 7,627ozs. gold; costs 16s. 4·3d. per ton. For half-year to September 30th, 1910, 198,617 tons produced 4,077 tons blister copper, containing 4,028 tons copper, 325,559ozs. silver and 5,672ozs. gold; costs 16s. 5·3d. per ton. Ore reserves September 30th, 1910, Mount Lyell: 2,720,693 tons, value ·53 per cent. copper, 1·96ozs. silver and ·02ozs. gold; North Mount Lyell, 927,683 tons, value 6 per cent. copper, 1·3ozs. silver and ·005ozs. gold per ton. For crushings *see table at commencement of volume.*

The authorised capital is £1,300,000, in 1,300,000 shares of £1 each; 1,200,000 shares have been issued credited as fully paid in exchange for shares of the former companies.

The following were the terms of the amalgamation scheme:—One fully-paid share for each North share (absorbing 600,000), $2\frac{2}{3}$ shares for each Mount Lyell share of £3 (absorbing 600,000); North debentures exchanged for new debentures of similar amount (since paid off); 4s. per share (£68,750) cash bonus to Mount Lyell shareholders before amalgamation; final cash payments of 3d. per share to Mount Lyell shareholders and 2d. per share to North shareholders by liquidators.

Dividends (including bonuses) paid (in London on same date as in Australia) by former Mount Lyell Co.: In 1897, 8s. per share; 1898, 14s.; 1899, 12s.; 1900, 17s.; 1901, 9s.; 1902, 7s. 6d.; 1903, 7s. 3d. THIS company was registered in Melbourne April 28th, 1905, to acquire the Mount Molloy group of copper mines at Herberton, Queensland, Australia. The consideration was £52,000. In November, 1907, the company acquired a concession from the Government until June, 1913, to deal with a timber area 36 miles in extent, and in 1908 the Granite Saw Mills were acquired on lease with option to purchase. A controlling interest in the Anniversary Mine at Herberton has been acquired.

MOUNT MOLLY—continued.

Smelting plant is erected. Development work is in progress, and a railway is constructed, connecting the mines with Biboohra.

The authorised capital is £150,000, in 50,000 preference and 100,000 ordinary shares of £1 each; all the shares are issued and fully paid. In December, 1906, 20,000 ordinary shares were taken up in London at 30s. each, less 2s 6d. per, share commission. The capital was increased from £100,000 in May, 1908, by creation of preference shares which were offered to shareholders credited as 10s. paid *pro rata*. The ordinary shares do not participate in profits until the preference shares have received 10s. per share in dividends; after such event all shares rank alike.

THIS company was registered at Rockhampton, Queensland, on the 1st October, 1886, to acquire the Mount Morgan Gold Mine, consisting of 640 acres freehold, and about 90 acres held under a perpetual lease from the Crown. The property is situate about 25 miles from Rockhampton, Queensland. The consideration was £875,000, payable by the issue of the whole of the shares credited with 17s. 6d. as paid. In 1895, owing to a question arising as to ownership of gold obtained from freehold land, the directors converted 75 acres of freehold into three leases of 25 acres each. In 1903 the company acquired two mining leases covering 25 acres situate under its water rights, and also took up leases covering 480 acres along River Dee, to secure outlet for tailings, &c., annual rental £1 per acre. An area of 30 acres containing limestone, 53 miles distance from the mine, has been acquired to provide flux for the copper reduction works, and in 1906 the Many Peaks Copper Mine, containing an extensive lode of pyritic ore was acquired. In 1907 it was decided to erect an electrolytic refinery for treating the blister copper to save shipping same to America for treatment, and the Electrolytic Refining and Smelting Co. of Australia, Ltd., has been formed to erect smelting works near Sydney and an agreement entered into with that company to treat the blister copper for a period of ten years.

Various reduction works are in operation. A discovery of gold-copper ore occurred in 1903, and a separate plant consisting of four blast furnaces and converters has been erected and smelting operations commenced January, 1906.

IS the one systematically critical Financial Newspaper in existence. Without its help Brokers, Bankers and other agents who guide the public in making investments can never be fully equipped for their work.

It has never lent itself to any powerful coterie or individual; it has never published a bucket-shop advertisement; it has no axes to grind, and merely seeks to tell its readers the truth. That is often neither a gracious, nor a profitable endeavour, but it is invaluable for those who have, or who handle, money.

Besides the pages of the INVESTORS' REVIEW itself, there is the ENQUIRY DEPARTMENT, through which special information and advice can be given privately on most moderate terms, and wholly without the element of self-interest in the counsel given.

This company was registered December 12th, 1906, and is a second reconstruction of the Royal Oak of Hauraki, Ltd., first reconstructed December 13th, 1900 (*see vol. for* 1906). The property comprises 90 acres known as North Mount Boppy, adjoining the Mount Boppy mine, in the Cobar district of New South Wales. Development work was in progress up to July, 1910, with a view to the intersection of the Mount Boppy lode, but results proved disappointing and work on this property has been suspended. A new property, the Blue Spec Mine, area 47 acres, about 27 miles from Mudgee, New South Wales, has been acquired on which development work is in progress.

The authorised capital is £125,000, in 845,430 preference shares of 1s. each and 661,828 ordinary shares of 2s. 6d. each; 300,000 preference and 661,828 ordinary shares are issued, the preference having 9d. paid and the ordinary being fully paid. One share, 2s. 3d. paid, was offered for each old fully-paid 2s. 6d. share. The preference shares were created November, 1908, by conversion of 338,172 unissued ordinary shares, and shareholders were invited to subscribe for 338,172 preference shares at par. The preference shares are entitled to a cumulative dividend of 12½ per cent. out of profits and half surplus profits remaining, the ordinary taking the balance. The original company paid a dividend of 3d. per share in May, 1898. This company was registered September 8th, 1897, to acquire twenty-four mining properties covering 160 acres, on the Peak Hill Goldfield between the Murchison and Gascoyne rivers, Western Australia. The consideration was £185,000, paid £93,000 in cash and £92,000 in fully-paid shares. In 1900, certain outstanding interests were purchased for £19,000 in fully-paid shares.

The property now comprises 398 acres and a half interest in one lease of 6 acres, also machinery and water areas. A 40-stamp battery and cyanide and slimes plant are erected. Portions of the property are being worked on tribute. For 1905-6 (18 months) gold value £54,000 was obtained; 1906-7, £17,734; 1907-8, £34,574; 1908-9, £31,868.

The authorised capital is £160,000, in 100,000 ordinary shares of £1 each and 300,000 deferred shares of 4s. each; 25,000 ordinary and 299,920 deferred shares are issued and fully paid. The capital was formerly £250,000 in £1 shares; in October, 1897, 138,000 shares were offered for public subscription and allotted. In 1900, the capital was increased to £300,000; 19,000 shares were issued for outstanding interests, 20,000 were issued in 1900 at £3 each, and the remainder in 1902 at £2 each. In June, 1904, £50,000 six per cent. debenture stock was offered to shareholders, and £45,801 is issued; stock redeemable in July, 1913. In August, 1908, debenture holders were invited to subscribe for £20,000 ten per cent. Prior Lien Bonds of £1 each repayable at par June 30th, 1913, or earlier at company's option on three months' notice; £10,081 were allotted. Interest on debentures and prior lien bonds has been postponed to June 30th, 1911.

In March, 1906, the sanction of the Court was obtained to reduce the capital from £300,000 to £60,000 by conversion of £1 shares into deferred shares of 4s. each, and in July, 1906, the capital was increased to present amount by creation of 100,000 ordinary shares of £1 each, of which 50,000, together with the balance of debenture stock unissued, were offered to the shareholders for subscription; 50,000 shares are held in reserve to provide for debenture-holders' rights for conversion. In April, 1908, further funds being required, shareholders were invited to subscribe for 12,000 ordinary shares at par; no

THIS company was registered October 29th, 1895, as the Sulphide Corpn., (Ashcroft's Process), Ltd., to acquire the patent rights in Europe, Asia, Africa, and Australasia, of the Ashcroft process for the treatment of sulphide ores, to purchase the Central Broken Hill Silver Mine, at Broken Hill, New South Wales, and to erect works for the treatment of sulphide ores. The purchase consideration was (1) for the patent rights, £500,000, payable in fully-paid ordinary shares, and (2) for the Central Broken Hill Silver Mine, £250,000 in fully-paid preference shares. In 1896, the American patent rights of the process were purchased for £50,000, in fully-paid ordinary shares, and an option to subscribe for 50,000 preference shares at par. The company is working the silver mine, and smelting works have been erected and are in operation at Cockle Creek, near Newcastle, New South Wales. The use of the Ashcroft process at the works having been discontinued, the words "Ashcroft's Process" were eliminated from the title of the company in 1899. The lease of the mine has been renewed for 20 years from December, 1903, and in January, 1903, the North Central lease of 40 acres, adjoining the Central Mine lease, was acquired at a cost of £2,500, the lease being for 20 years from January 1st, 1906. A new mill has been erected at the Central mine and commenced work January, 1907. During 1908-9, 195,332 tons treated yielded 2,636,329 ozs. silver, 34,047 tons lead, and 37,017 tons zinc; costs 18s. 6d. per ton. During 1909-10, 231,339 tons ore and 47,129 tons tailings produced 2,996,231 ozs. silver, 45,521 tons lead and 51,750 tons zinc; costs 19s. 10d. per ton. Ore reserves at June 30th, 1909, 2,803,920 tons; at June 30th, 1910, 2,702,000 tons.

A subsidiary company has been formed to erect zinc distilling works in England and to enter into a contract with the Corporation for the purchase of a large annual tonnage of zinc concentrates, 5 per cent. interest on the paid-up capital of such company to be guaranteed by the corporation for ten years from 1906. *See Central Zinc Co., Ltd.*

The authorised capital is £962,500, in 550,000 preference shares of £1 each, and 550,000 ordinary shares of 15s. each; all the shares are issued and fully paid. There are £61,902 five per cent. debentures redeemable December 31st, 1912, at 105 per cent.; interest payable January 1st and July 1st. THIS company was registered April 14th, 1910, to acquire from the debenture holders the property and assets of the Sydney Harbour Colleries, Ltd., registered in New South Wales May 15th, 1903 (*see vol. for* 1910). The property comprises mining leases granted by the Government of New South Wales over an area of 10,182 acres under Sydney Harbour, held for a term of 20 years and renewable for a similar term, subject to 1s. per acre annual rent, a royalty of sixpence per ton on large coal and 3d. per ton on small; also a freehold surface site from which the coalfield can be worked, consisting of $4\frac{1}{2}$ acres at Balmain, Cumberland, New South Wales. The consideration was £1,105 in cash and £17,750 first debenture stock and £100,932 income debenture stock. Two shafts have been sunk to a depth of 2,880 feet, the coal seams having a thickness of 5 feet 9 inches.

The authorised capital is £5,000, in 100,000 shares of 1s. each; all the shares are issued and fully paid.

There are £200,000 six per cent. debenture stock (£80,000 issued) and £100,932 seven per cent. non-cumulative income debenture stock. In April, 1910, 80,000 shares and £80,000 six per cent. debenture stock were offered for public subscription, the shares being payable in full on application, and the debentures, offered at 95 per cent., payable 10 per cent. on application, 20 per cent. on allotment, 10 per cent. three months after allotment, and the balance in instalments of not more than 20 per cent. at intervals of not less than three months. A preferential application for the issue of shares at the rate of one share for each £1 of debenture stock was given to applicants for debenture stock. The debenture issue was underwritten at a commission of 5 per cent. in cash. The first debenture stock is subject to a mortgage of £11,000, and is redeemable by annual drawings at 105 per cent. of £10,000, commencing 1920, the company reserving the right to redeem at 105 per cent. the whole or part at any time after 1919. Interest payable January 1st and July 1st. The interest on the income stock is payable only out of profits, and is not cumulative. The stock is repayable at 105 per cent. by annual drawings of £10,000, commencing upon the extinction of the first debenture stock and ranks next to such stock.

The statutory report was submitted July 26th, 1910.

Transfer form, common; fee, 2s. 6d.

THIS company was registered February 23rd, 1904, and is a reconstruction of a company of same name registered December 19th, 1899 (*see vol. for* 1904), to acquire five gold mining leases, near Karangahake, Province of Auckland, New Zealand. In 1900, the adjoining property of the New Zealand Talisman Gold Mining Co., Ltd. (registered April 30th, 1896, *see vol. for* 1900), was purchased and in March, 1902, the adjoining property of the Imperial Gold Mining Co., No Liability, comprising about 60 acres, was purchased. The adjoining property, formerly owned by the Woodstock Gold Mining Co., Ltd. (*see vol. for* 1904), was acquired for £7,000 at the time of reconstruction, and is being actively developed; the increase of capital in August, 1910, was to provide funds for this purpose and to increase plant, &c.

The company now owns total mining area 507 acres, and 16 acres sites. A 50-stamp mill and cyanide plant are at work. Three tube mills have also been erected. During 1909-10, 44,800 tons yielded bullion value £201,692; during 1910-11 (to December, 1910), 39,320 tons yielded bullion value £181,837, and a profit of £106,762. Ore reserves at February, 1909, 51,459 tons, value £5 6s. 9d. per ton; at February, 1910, 35,738 tons, value £5 15s. 3d. per ton; August 31st, 1910, 51,376 tons, value £5 18s. 9d. per ton. For crushings *see table at commencement of volume*.

The authorised capital is £345,000, in 345,000 shares of £1 each; all the shares are issued, 300,000 being fully-paid, and 45,000 having 10s. paid. One share credited as 17s. paid was offered for each old fully-paid £1 share. The final call of 2s. on the old shares was met by a bonus of 2s. paid June 21st, 1910.

The capital was increased from £300,000 to present amount in August, 1910, by the creation of 45,000 shares which were offered to shareholders, in the proportion of three for every 20 held, at a premium of 5s. per share, payable 10s. on application (including the premium), and the balance in three equal instalments of 5s. per share at periods of three, six and nine months respectively.

Dividends (including bonuses) paid:—For 1905-6, 2s.; 1906-7, 4s.; 1907-8, 6s.; 1908-9, 7s. 3d.; 1909-10, 8s. (1s. 6d. each on May 25th, August 25th, and November 25th, 1909, and February 25th, 1910; also bonus of 2s. to meet final call due June 21st, 1910); 1910-11, 1s. 6d. May 25th, 1s. 6d. August 27th, and 1s. 9d. November 25th.

TALISMAN CONSOLIDATED—continued.

The accounts for year ended February 28th, 1909, submitted June 15th, 1909, showed bullion receipts £208,282 and a profit of £108,508 (after writing off £2,770 depreciation), making with balance forward a sum of £155,997; dividends absorbed £93,750, leaving £62,247 carried forward, out of which a bonus of 1s. per share was paid. The accounts to February 28th, 1910, submitted June 21st, 1910, showed bullion receipts £201,692 and a profit of £95,930 after providing £8,486 for taxes, making with balance forward (less bonus) a sum of £143,177; dividends (including bonus) absorbed £120,000, leaving £23,177 carried forward; cash £2,103, uncalled capital at date £30,000, bullion in transit £49,254, debtors £263; creditors £10,425.

Transfer form, common; fee, 2s. 6d. The 17th August, 1904, was appointed settling day in shares Nos. 1 to 300,000, and November 16th, 1910, in shares, 5s. paid, Nos. 300,001 to 345,000. This company was registered December 7th, 1887, to acquire gold-mining properties at Waihi, Thames district, New Zealand. In 1895, the Union property was sold to the Union-Waihi Gold Mining Co., Ltd. (registered 1895, *see vol. for* 1902), in 1902, the undertaking of the Union-Waihi Co., which included the Waihi Silverton Mine, and 40-stamp mill was purchased. The mining area now held at Waihi is 765 acres, with special sites for mill, tailings, &c. The company has also acquired the Fern Spur mining claim of 100 acres on the Ohinemuri River, and 50 acres of freehold land adjoining it, at the junction of the Ohinemuri and Waitekauri rivers, upon which site a new mill, known as the Victoria mill, has been built, consisting of 200 head of stamps. The Victoria mill is worked by water power and has steam power in reserve; it is connected with the mine at Waihi by a steam tramway 4½ miles in length. The company has also a 90-stamp mill at Waihi close to the mine, and a 40-stamp mill acquired from the Union Co., on the Ohinemuri river, about a mile distant, making a total of 330 stamps, all at work; there are also twenty tube mills at work. In January, 1910, the company acquired from the New Zealand Government, a license for a period of 42 years, to take 10,000 horse power from the Hora Hora Falls at an annual rental of £1,200, commencing in 1912. Large hydro electric works are being erected, and power will be transmitted to the work which is situate about 50 miles distant from the Falls. During 1908, 393,214 tons yielded bullion value £930,511; for 1909, 416,813 tons yielded £959,594; for 1910, 442,020 tons yielded £905,914. For crushings *see table at commencement of volume.* Ore in sight at December 31st, 1908, 1,329,872 tons; at December 31st, 1909, 1,335,586.

The authorised capital is £500,000, in 500,000 shares of £1 each; 495,907 shares are issued and fully paid. The capital, originally £100,000, was increased in November, 1890, to £150,000, the 50,000 new shares being issued at par, to pay off £20,000 debentures, &c.; in January 1895, increased to £160,000, the 10,000 new

THIS company was registered July 4th, 1906, to acquire from the Imperial and General Securities Co., Ltd., a copper mining area of 100 acres freehold and 200 acres leasehold, together with water rights, on Balla Balla Creek, West Pilbarra district, North-Western Australia. The consideration was £100,000 in fully paid shares, the vendors agreeing to provide £20,000 working capital. The properties have been reported on by R. Schloesser, A.M.I.C.E. Additional properties known as Balla Balla and Mons Cupri with smelting plant, &c., have since been acquired, also town sites and ironstone leases. Total area now held 100 acres freehold and 397 acres leasehold. A lease of the jetty at Balla Balla has been obtained and a railway connecting the mine to the jetty, a distance of 14 miles, has been constructed and a steam and two sailing lighters have been purchased. Ore shipments are in progress.

The authorised capital is £200,000, in 200,000 shares of £1 each; 182,000 shares are issued and fully paid, including vendors'. The capital was increased from £150,000 in January, 1910. Dividends paid:—For 1909, 15 per cent. (10 per cent., July 26th, 1909, and 5 per cent. August 3rd, 1910).

The accounts to December 31st, 1908, submitted June 22nd, 1909, showed ore sales £63,094 and a profit of £17,711 carried forward. The accounts to December 31st, 1909, submitted October 11th, 1910, showed ore sales £49,440 and a profit of £15,805 making with balance forward (less tax and manager's commission) a sum of £32,254; dividends absorbed £20,730, written off £2,675, leaving £8,849 carried forward.

Transfer form, common; fee, 2s. 6d. The 8th August, 1907, was appointed settling day in shares Nos. 1 to 7 and 100,008 to 120,007 May 26th, 1909, in Nos. 8 to 100,007 and 124,001 to 129,000, and January 12th, 1911, in Nos. 129,001 to 180,000. Latest price, $1\frac{9}{16}$, $1\frac{11}{16}$.

Additional particulars officially supplied:—

RECENT DEVELOPMENTS.—Deep level developments are being vigorously

WHIM WELL COPPER MINES—continued.

prosecuted. At the main shaft, which is down about 120 feet, ore is being developed. At 96 feet the lode was struck 10 feet wide, carrying 12½ per cent. ore.

Diamond Drilling.—Borehole 10. The following results in pyritic copper ore have been reported :—108 to 112 feet, 7¾ per cent.; 114 feet, 10¼ per cent.; 116 feet, 8½ per cent.; 118 feet, 9¼ per cent.; 124 feet, 4 per cent.; 126 feet, 10¾ per cent.; 128 feet, 9⅛ per cent.; 130 feet, 7⅛ per cent.; 132 feet, 4 per cent.; 134 feet, 3 per cent.

Ore Shipments.—Approximately 8,000 tons of copper ore have already been shipped during the present year, the assay value ranging from 11 to 25 per cent. of copper. The ore is forwarded to Europe by sailing ship, and the ship "Glenbank" arrived at Balla Balla in December, 1910, to load a further 2,300 tons of ore.

Ore at Dump.—The tonnage of ore on the dumps is rapidly increasing, and is now considerably over 40,000 tons of about 7 per cent. copper. Plans are now being completed for the erection of a concentrating plant to deal with this ore and with the large bodies of carbonate ores in the mine.

Mons Cupri :—A separate company has recently been formed to take over and work the Mons Cupri leases, and the Whim Well Company will hold a substantial interest in the new company.

The company during the past year has obtained a quotation of its shares on the Paris Bourse.

THIS company was registered November 18th, 1892, to acquire a silver and lead mining property known as the Montana section, about 40 acres in extent, situate on the Mount Zeehan Silver Field of Tasmania. The purchase consideration was £65,000 in fully-paid shares. In September, 1896, an adjoining block of 27 acres was purchased for £3,000. In March, 1899, the company purchased the whole of the adjoining property of the Tasmania Crown Silver Mining Co., Ltd. (*see vol. for* 1899), comprising 200 acres, for £5,000 in cash; a further 200 acres have been taken up under the Minerals Land Act, and a portion of the adjoining Silver Queen property was purchased in 1902 for £1,500, making total area 420 acres. Concentrating plant is at work. The company (with others) has floated the Zeehan-Western, Ltd., and holds shares therein. During 1910, owing to developments proving unsatisfactory, a tin mining property of 160 acres, north-east Dundas district, was acquired for £1,300. An interest is also held in the Zeehan-Dundas Mines, Ltd.

The authorised capital is £80,000, in 80,000 shares of £1 each; all the shares are issued and fully paid. Dividends paid: 1894, 8d. per fully-paid and 5d. per partly-paid share; 1895, 1s. and 7½d. respectively; 1896, 3s. 1d. and 2s. 1d.; 1897, 1s. per fully-paid and 9d. per partly-paid share in July, and 9d. per share (all shares fully paid) in October, 1897; 1898, 4s. per share; 1899, 2s. 6d.; 1900, 3s. 9d.; 1901, 6d.; 1902, 1s. 6d.; 6d. This company was registered in Victoria October 18th, 1905, to acquire from the Hill Synd., contracts for the purchase of the tailings output, and to deal with the tailings heaps (some two million tons) of various Broken Hill silver and lead mines, Barrier Ranges, New South Wales, and to treat same for zinc. The consideration was £80,000, in fully-paid ordinary shares. Contracts have been entered into with the British Broken Hill, Broken Hill Block 10, Broken Hill Block 14, and Broken Hill South Co.'s, for treatment of their tailings, and two leases, area 100 acres, at North Broken Hill, have been acquired, and large concentrating works (Elmore process and Minerals Separation, Ltd., process) and plant for manufacture of sulphuric acid have been erected and are at work. The plant was extended during the latter part of 1910 by the addition of the Minerals Separation process, and the capacity increased by about 8,000 tons monthly. Arrangements have been made for the sale of the whole of the output of zinc concentrates up to 1919. At December, 1909, the company had 1,225,000 tons tailings on hand and paid for, and 1,430,000 tons under contract to purchase. The total quantity was equal to eleven years supply at the current rate of treatment.

The authorised capital is £582,000, in 182,000 preference shares of £1 and 500,000 ordinary shares of 16s. each; 179,026 preference and 453,132 ordinary shares are issued and fully paid, including 80,000 vendors' shares. In November, 1906, the capital was increased from £350,000 to £500,000; 113,333 were offered to shareholders at 25s. each in the proportion of one for every three shares held; the issue was guaranteed at same price, the guarantors receiving an option for two years over the remaining 46,667 shares at £2 each. The capital was again increased to £682,000 in August, 1907, by creation of 182,000 preference shares, which were offered to shareholders at par, at the rate of two for every five ordinary held; 100,000 were underwritten in consideration of a call for one year at a premium of 12½ per cent. over any shares not taken up, the company having the right after January 1st, 1908, to call on the guarantors to exercise this call at par; about 108,000 shares were taken up, and in February, 1908, half the unsubscribed preference shares were offered to shareholders at par, subscribers having an option over a similar number as taken up, at par, for six months (option exercised September, 1908). The capital was reduced to present amount in August, 1909, by writing 4s. per share off the ordinary shares, being capital lost or unrepresented by assets. The preference shares take all profits until they have received 100 per cent., they then take a cumulative preferential dividend of 20 per cent. and share *pro rata* with ordinary in surplus profits.

Dividends paid on preference shares: For 1909, 25 per cent.; 1910, 50 per cent. (12½ per cent. March 31st, June 28th, September 28th, and December 29th).

The accounts to December 31st, 1908, submitted in London May 26th, 1909, and in Melbourne July 2nd, 1909, showed a profit of £25,504, reducing debit balance to £59,650, which was carried forward.

The accounts to December 31st, 1909, submitted in London May 11th, 1910, showed a profit of £100,867; deducting debit balance forward (less £29,650 written off by reduction of capital) £30,000, preference dividend absorbed £44,756, provision for income tax £5,000, leaving £21,111 carried forward; cash £41,383, debtors £35,635, concentrates on hand and shipped £5,804, investments at cost £17,030; creditors £40,442.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. The 4th January, 1906, was appointed settling day in ordinary shares Nos. 1 to 160,000; November 13th, 1906, in Nos. 160,001 to 240,000; January 3rd, 1907, in Nos. 240,001 to 453,233; February 19th, 1908, in preference shares Nos. 500,001 to 608,142; October 28th, 1908, in Nos. 608,143 to 645,996; June 24th, 1909, in Nos. 645,997 to 646,026 and 649,027 to 664,026; and July 13th, 1909, in Nos. 646,027 to 649,026 and 664,027 to 679,026. THIS company was registered in the Transvaal December 29th, 1897, to take over the whole of the assets and liabilities of Ad. Goerz and Co. (limited under German Law). The last named was itself a continuation and extension of a syndicate formed in 1889 with a view principally to finance, exploit, develop, and work gold mines in South Africa and elsewhere. The purchase consideration was £640,000 in fully-paid ordinary shares. In 1906 it was decided to extend the sphere of operations to countries outside South Africa. The assets at December, 1909, included the following mining properties in the Witwatersrand district Transvaal:—195 claims, mostly West Rand deep-level blocks, and 11,920 acres of unproclaimed land in the South-western district of the Rand; also shares in various companies, including: The Cloverfield Mines, Elandsfontein Estate Co., Fanti Consolidated Geduld Proprietary Mines, Klerksdorp Exploration, Lancaster West, May Consolidated, Modderfontein Deep Levels, Otavi Mines and Railway, Princess Estate, Randfontein Deep, Roodepoort Central Deep, South Randfontein Deep, South West Africa Co., South Western Exploration, Spring Mines, Tudor Gold, Van Dyk Proprietary, Voorspoed Diamond, West African Mines, and Withok Proprietary Co., Ltd. In January, 1907, the company offered 30,000 fully-paid ordinary shares in the Otavi Mines and Railway Co., for subscription at £7 5s. each.

The authorised capital is £1,500,000, in 1,500,000 shares of £1 each; 1,400,000 shares are issued and fully paid. The capital was formerly £1,015,000, in 1,000,000 ordinary and 15,000 founders' shares of £1, and in March, 1898, 200,000 fully-paid ordinary shares were offered for sale to the public by a private syndicate at £1 12s. 6d. per share. The capital was increased and altered to £1,100,000 in ordinary shares in June, 1903, by conversion of the 15,000 founders' shares into 100,000 ordinary shares. In June, 1904, the capital was increased to present amount, 225,000 shares being issued at £2 10s. each, of which 220,000 were offered to shareholders; the Deutsche Bank guaranteed the entire issue for 1s. per share and an option for one year to take up 75,000 shares at £2 10s. (option exercised); the directors may create and dispose of the remaining 100,000 authorised shares as thought fit.

In October, 1904, shareholders were offered 132,500 shares in the Van Dyk Proprietary Mines, Ltd., at 35s. each, being one for every ten Goerz held.

Dividends paid: Out of the profits for 1898, 11⅓ per cent. was paid in April, 1899, on the (then) ordinary shares Nos. 1 to 320,000, and Nos. 640,001 to 1,000,000; 8 per cent. on ordinary shares Nos. 320,001 to 640,000; and 8s. 6¼d. per share on the founders' shares. For 1899, 10 per cent. was paid on ordinary shares for 1901, 10 per cent.; for 1902, 12½ per cent. and 8s. 6d. per share on founders' (founders' shares since extinguished); for 1904, 15 per cent.; 1905 to 1908, nil; 1909, 10 per cent. paid May 26th, 1910.

The accounts for year ended December 31st, 1908, submitted in Johannesburg May 28th, 1909, showed a net profit of £37,160, and £21,329 credit carried forward after deducting debit balance brought forward; cash assets in excess of liabilities £595,258.

The accounts to December 31st, 1909, submitted in Johannesburg May 21st, 1910, showed a net profit of £279,040, making with balance forward a sum of

THIS company was registered February 24th, 1909, and is an amalgamation of the Abbontiakoon (Wassau) Mines, Ltd., and Abbontiakoon Block 1, Ltd. (*see vol. for* 1909). The property consists of leases for 99 years from December, 1880, of the mining surface, timber and rubber rights over the Abbontiakoon Concession, near the town of Tarkwa, Wassaw district, Gold Coast Colony. The concession measures 9,550 ft. along the line of reef by 7,500 ft. wide and is equal to 967 mining claims. Ball mills and cyanide plant are erected. Milling was suspended May, 1909, to permit of further development. A stamp battery is to be erected in lieu of the Ball mills which in the past have not worked economically, and the sands and slimes plants are to be increased. volume. Estimated ore reserves at September 30th, 1910, 295,363 tons value 12·6dwts., and 228,408 tons value 3·4dwts. per ton.

The authorised capital is £700,000, in 1,400,000 shares of 10s each; 953,956 shares (£476,978) are issued and fully-paid (*see below*). Shareholders in the Abbontiakoon Block 1 Co. (other than Abbontiakoon (Wassaw) Mines, Ltd., which held 156,835 shares) received share for share, also the right to take up four new shares at 12s. 6d. each in respect of every five old shares held, with an option for two years over one new share at 12s. 6d. for every two shares taken up. The Abbontiakoon (Wassaw) shareholders received 19 new for every 20 old shares held with the right to subscribe for one share at 12s. 6d. in respect of every four old shares held, with an option for two years, over a number of shares equal to half the shares subscribed at 12s. 6d. The subscription of 282,436 shares was guaranteed in consideration of an option for two years, over a similar number at 12s. 6d., and a commission of 3d. per share.

In March 1910, arrangements were made with the Fanti Consolidated Mines, Ltd., and Gold Coast Amalgamated Mines, Ltd., by which those companies agreed to advance in equal proportions, a sum of £120,000 at seven per cent. per annum, in consideration for an option at par until February 29th 1912, on 22,470 reserve shares and a further option at par at any time between February 25th, 1911 and February 29th, 1912, over any shares not taken up by subscribers and underwriters. The loan is repayable February 29th, 1912 (*but see below*).

In December, 1910, it was proposed that the holders of options on 423,574 shares under call be asked to call up and pay at the rate of 10s. per share for one-half of these shares on or before January 14th, 1911. This would provide the company with about £105,000. In consideration of the option-holders doing this and cancelling their existing options, one quarter of the shares at present under option would be given to them under call at 10s. per share until December 31st, 1911, and the remaining quarter at 10s. per share until December 31st, 1912, for which option certificates would be issued. By the end of December, 1910, the company would owe about £95,000 in respect of advances made by the Fanti Consolidated Mines and the Gold Coast Amalgamated Mines: the money to be received from the options exercised would be used to pay off this indebtedness with interest. The company will then require about £100,000 for equipment and further development, and it is proposed that the Fanti Consolidated Mines and the Gold Coast Amalgamated Mines be asked to advance this amount jointly, at 7 per cent. per annum. It was suggested that the capital of the company be increased by £100,000 by the creation of 200,000 new shares of 10s. each, and that, in consideration of the lending companies waiving their rights to the options they are now entitled to, they be given in lieu thereof the call of 200,000 shares for a period of three years at par. No call whatever is to be attached to the fresh advances.

The accounts to December 31st, 1909, submitted June 2nd, 1910, showed gold receipts £35,345 and a credit balance of £990 carried forward after writing off £4,467 depreciation; cash £13,439; debtors £6,722; stores £17,072; calls in arrear £465; creditors £6,757; share premium account £1,336.

Transfer form, common; fee, 3s. 6d. The 16th June, 1909, was appointed settling day in shares Nos. 8 to 474,644 and 475,008 to 671,803; and in shares fully and partly paid, Nos. 1 to 7 and 671,894 to 954,239. Prices, 1909: highest, 16s. 6d.; lowest, 9s. 6d.; 1910: highest, 15s. 3d.; lowest 8s. Latest price, 8s. 3d., 8s. 9d.

This company was registered on June 18th, 1901, to acquire from the Taquah and Abosso Gold Mining Co. (1900), Ltd., the Obyew or Abosso Mine of 1,000 fathoms square (equal to 600 Transvaal claims), situate on the banket reef formation about six miles from Taquah Station, in the district of Wassau, Gold Coast Colony, and adjoining the property of the Wassau (Gold Coast) Mining Co., Ltd. The purchase consideration was £250,000 in fully-paid shares, but in 1904 the vendors agreed to give up 100,000 shares to facilitate the raising of further capital. A 20-stamp mill and cyanide plant started work in March, 1905, and thirty stamps have been added, making 50. A further 50 stamps of 1,500 lbs. each, also a re-grinding plant are being added which will bring the crushing capacity up to 200,000 tons yearly. The cyanide plant is being enlarged and a plant for the treatment of the slimes is being installed. During 1907-8, 44,021 tons yielded gold value £110,980, or 50s. 0·5d. per ton; costs 35s. 1·8d. per ton. During 1908-9, 60,702 tons yielded gold value £138,466 or 45s. 7·4d. per ton; costs 33s. 3·4d. per ton. Ore in sight at June, 1908, 210,801 tons, average value 18·7 dwts. per ton; at June, 1909, 350,888 tons, value 14·4dwts. per ton. For crushings, *see table at commencement of volume.*

The authorised capital is £400,000, in 400,000 shares of £1 each; all the shares are issued and fully paid. In June, 1901, 95,000 shares were offered to shareholders of the vendor company, at par. Of the 100,000 shares surrendered by the vendor company, 49,509 were issued in redemption of a like amount of debenture stock, and 50,491 were offered to shareholders for subscription in November, 1909, at 41s. each, the final call of 11s. being payable February 15th, 1910; the issue was guaranteed by the Oceana Consolidated Co., Ltd., for a commission of 1s. per share.

Dividends paid: for 1905-6, 10 per cent.; for 1906-7, 10 per cent.; for 1907-8, 10 per cent.; for 1908-9, 5 per cent. January 29th, 1910; for 1909-10, 10 per cent., 5 per cent. May 10th, 1910, and 5 per cent. December 31st.

The accounts for year ended June 30th, 1908, submitted December 17th, 1908, showed gold receipts £110,980 and a profit of £26,255, after writing off £10,607. depreciation; adding balance forward made £43,285, dividend (December, 1908), absorbed £34,951, leaving £8,334 carried forward.

THIS company was registered May 30th, 1910, to acquire and deal with mining property in West Africa.

The authorised capital is £100,000, in 400,000 shares of 5s. each.

Additional particulars officially supplied: The company has entered into an agreement to acquire from the Imbatiem Goldfields, Limited, the Imbatiem Gold Mines, area five square miles, at Imbatiem, Adansi, Ashanti, together with 5-stamp mill, buildings, etc. The mines are located in the quartz belt area, running north-east of the Obuassi mines, and have been favourably reported upon by the following well-known mining engineers, viz., Messrs. Collins, Wallace, Hedlund, Schilling, Stewart and Heussler, and a considerable sum of money has already been spent in opening up and equipping them. The reefs are reported to resemble closely in formation those found in the Obuassi and Prestea mines. In the case of the Imbatiem Mines, the reefs outcrop on a high range of hills. They have been proved by shafts and adits over a considerable distance and high values have been encountered, and a considerable quantity of ore opened up. Mr. A. F. Hedlund and Mr. T. Schilling, of Stockholm, in a joint report dated 12th November, 1906, state: "The width of the quartz reef varies from about $1\frac{1}{2}$ feet to 4 feet, the length covering the whole property, that is $2\frac{1}{2}$ miles. In the Hill No. 4 it (the reef) can be put as a minimum 30 grammes, say 1 oz. per ton for the quantity of ore, about 100 tons which has already been taken out. In some parts it is very much richer, in fact one sample showed as much as 527 grammes (over 17 ozs. per ton). (As per analysis from Falun, Swedish Government Assayer)." Mr. Wallace, in his report dated 25th April, 1908, states: "He confined the bulk of his work to Hill No. 2. On No. 2 Hill there is a splendid reef outcropping some 500 yards in length; along the outcrop I have discovered two very good shoots of stone 156 feet apart; of 40 samples taken from these places the poorest assay I can get is $\frac{1}{2}$ oz. per ton and the best 1 oz. 5 dwts." An important discovery of "banket" reef was made in the Imbatiem mine during last year, and writing on July 31st, 1910, Mr. Stewart says: "Have trenched some 50 ft. north-east along the 'banket' reef and exposed it; am putting in a cross-cut, which is now in 17 ft.; expect to strike the reef at about 23 ft. Have also trenched south-west and exposed the banket reef. Have obtained prospects from same, going as high as 15 dwts. per ton or can average 9 dwts. per ton. The reef is a very strong one, confined between two walls." Writing on the Imbatiem mines, Mr. C. A. Heussler, M.I.M.M., who visited the mines, says: "The most striking feature is the discovery and proving of the Banket Reef, which in my opinion, is the same line as has been found in Abrokrum, on the south, and Assacherie, on the north. The results obtained by Mr. Stewart prove conclusively the necessity of pushing on the development of the Banket Reef, which has been proved practically throughout the entire length of the property, a distance of two and a half miles."

The Imbatiem mines possess great natural advantages, are favourably situated, and in a forward condition. Railway communication is easily accessible. Being an adit proposition, the mines are economical to work. There is efficient water power, capable of driving fifteen head of stamps. A five-stamp mill, with accessories, is erected. There is also a well-equipped camp.

THIS company was registered in the Transvaal August 27th, 1904, to acquire from Messrs. Lewis and Marks 118 farms (freehold) covering 726,223 acres in various districts of the Transvaal and Orange River Colony, also the business and assets of the African and European Agency, Ltd. (registered May 14th, 1901, *see vol. for* 1905), and the following shares: 50,000 East Rand Mining Estates, 50,000 Vereeniging Estates, 31,250 South Rand Exploration (and £3,120 debentures), 21,745 Swazieland Corporation, 2,000 Transvaal Estates and Development, 2,500 Transvaal Proprietary and 329 Grootvlei Proprietary. The purchase consideration was £1,000,000 in fully-paid shares, and the right to one-fourth of available profits after 100 per cent. in dividends or bonuses has been paid.

The company has since acquired three stands in Johannesburg, together with Lewis and Marks' Building erected thereon, a portion of Farm Rietfontein No. 501, near Pretoria, formerly belonging to Schuller's Diamond Mines, Ltd. (*see vol. for* 1905), the property and assets of the Woodbine G. M. Co. (*see vol. for* 1905), comprising mining claims in the Barberton District (half-interest sold in 1907 to Sheba G. M. This company was registered October 31st, 1894, and is a reconstruction of a company of same name registered October 10th, 1889. The capital is invested in real estate, buildings, &c., in Johannesburg, Pretoria, Port Elizabeth, Newcastle (Natal), Jagersfontein, and Klerksdorp, South Africa. The amount invested at December 31st, 1909, was £564,496.

The authorised capital is £375,000, in 125,000 six per cent. cumulative preference (with priority for capital) and 250,000 ordinary shares of £1 each; all the preference and 220,334 ordinary shares are issued and fully paid. The capital was formerly £200,000, in ordinary shares; holders received three fully-paid shares for every four ordinary shares of the old company 15s. paid, one for each old fully-paid ordinary share, and fifty for each old founders' share. The object of the reconstruction was to extinguish the founders' shares and the liability on the ordinary. In October, 1895, the capital was increased to £250,000, and the 50,000 new shares were offered to shareholders at 30s. each. In March, 1897, the shares were divided into preference and ordinary. In November, 1901, the capital was increased to present amount, and 75,000 ordinary shares were issued in January, 1902; in January, 1905, 50,000 ordinary shares then in reserve were offered to ordinary and preference shareholders at 30s. each, 20,334 being taken up. There are £200,000 five per cent. first mortgage debentures.

The preference dividend is paid on July 1st and January 1st.

Dividends on ordinary before reconstruction:—For 1890, 3 per cent., and 300 per cent. on founders' shares; for 1891, 4 per cent., and 400 per cent. on founders'; for 1892, 4 per cent., and 400 per cent. on founders'; for 1893, 5 per cent., and 500 per cent. on founders'. Dividends on ordinary since reconstruction:—1894, 6 per cent.; 1895, 8 per cent.; 1896, 10 per cent.; 1897, $12\frac{1}{2}$ per cent.; 1898, 5 per cent.; 1903, $7\frac{1}{2}$ per cent.; 1904, $8\frac{3}{4}$ per cent.; 1905, $7\frac{1}{2}$ per cent.; 1906, 5 per cent. 1907, nil; 1908, nil; 1909, $2\frac{1}{2}$ per cent. paid April 1910.

The accounts to December 31st, 1908, submitted April 5th, 1909, showed £9,427 carried forward after paying preference dividends.

The accounts to December 31st, 1909, submitted April 18th, 1910, showed £9,048 credit balance carried forward after paying dividends Reserve £65,000.

THIS company was registered December 24th, 1889, and holds share investments and interests in properties in South Africa and elsewhere. The company acts as London agents for the following companies:—Anglo-French Land, Anglo-French (Transvaal) Navigation Coal, Apex, Benoni, New Boksburg Gold Mines, Afrikander Proprietary, Kleinfontein Estates and Township, New Kleinfontein, Rooiberg Minerals Development, and Rand Klip, Ltd., there are also located in its offices three London companies, the Anglo-French Matabeleland, Rezende and Penhalonga Proprietary.

The authorised capital is £1,000,000, in 500,000 preference and 500,000 ordinary shares of £1 each; all the shares are issued and fully paid. The capital was originally £150,300, in 30,000 ordinary shares of £5 and 300 founders' shares of £1; in June, 1894, each ordinary share was subdivided into 5 shares of £1. The capital was increased to £350,300 in November, 1894, by creation of 200,000 new ordinary shares of £1; 120,000 of these were offered to shareholders at par, and to the underwriters an option was given over 50,000 shares at 21s. 6d. This option was exercised, and a further 15,000 shares were sold in October, 1895, at £6 15s. each, and 15,000 in December, 1896, at £3 each. In August, 1896, the capital was increased to £700,300 by creation of 350,000 preference shares, of which 223,333 were then offered to shareholders at par and the remaining 126,667 in February, 1899. In March, 1902, the capital was increased to present amount; 150,000 additional preference and 150,000 ordinary shares were created, and the founders' shares were cancelled by giving holders the right in respect of each founders' share held to subscribe for 260 ordinary shares at par. In May, 1904, 72,000 ordinary shares remaining unissued were issued to ordinary shareholders at £3 each, payable in full on application; and in December, 1904, 150,000 preference shares remaining unissued were issued to ordinary shareholders at 22s. each. The preference shares take a cumulative preferential dividend of 6 per cent. per annum with a prior charge for capital, but have no further claim on profits, and no voting power except on liquidation resolutions.

The preference dividend is paid half-yearly in January and July. The founders' shares received the following dividends to date of cancellation: for 1895, £143

THIS company was registered in the Transvaal March 6th, 1893, to acquire 7,571 acres of freehold land on the farm Rietfontein No. 11, Eastern Witwatersrand. A three-eighths interest in 183 claims on the adjoining farm, Benoni, was acquired and resold for 16,838 shares of the Kleinfontein Deep, Ltd., and 48,000 shares of Van Ryn Deep, Ltd. (since sold and proceeds placed to reserve for development of gold section). The farm Rietfontein No. 11 has not yet been proclaimed as a goldfield, but a colliery has been working thereon since October, 1896. On the said farm are situate 87·05 discoverers' claims awarded to the company by the Government in November, 1909. On proclamation the company's interest will be equal to about 1,120 claims. Coal sales for 1906, 295,260 tons; 1907, 229,967 tons; 1908, 200,300 tons; 1909, 258,012 tons. A stone quarry which was being worked by the company has been let on a five years' lease from 1906. In 1903 the company acquired 15 stands in Jeppestown, on which is constructed the company's own railway siding. An option to lease the coal rights on farm Groenfontein No. 159, Middelburg District, is also held.

The estate has been planted with trees. The gold reef underlying the property were tested by deep-level boreholes, and a seven-compartment shaft sunk. In March, 1909, the main reef series dipping approximately south-east were struck at 1,741ft. value 9·02dwts. over 55·31 inches; depth of shaft at December, 1909, 1,893ft. A dip vertical shaft is being sunk. A milling plant to treat 60,000 tons monthly is being erected for the joint use of this company and the Benoni Consolidated Mines, Ltd., this company to have 40-stamps and the Benoni Co., 20-stamps.

The authorised capital is £300,000, in 300,000 shares of £1 each; all the shares are issued and fully paid. The capital was increased from £50,000 to £125,000 in July, 1895, 25,000 shares being issued to shareholders at 35s. each and 31,500 sold at 35s. The 18,500 shares remaining were afterwards taken up under option at 40s. each. The capital was increased to £150,000 in April, 1899, the 25,000 new shares being offered to shareholders at £5 each. In October, 1908, the capital was again increased to £200,000 and 50,000 shares offered to shareholders at 45s. each, at the rate of one for every three held, subscribers having the right for two years to take up an additional share at 57s. 6d. for every two shares subscribed The issue was guaranteed by the Anglo-French Exploration Co., Ltd., which received an option for two years over 25,000 shares at 57s. 6d. per share. 49,785 option shares were exercised and the capital increased. In June, 1909, the capital was further increased by an issue of 215 shares at £5 10s. each. In September, 1909, the capital was increased to present amount and 50,000 shares offered to shareholders at £5 each (being one for every five), subscribers having the right to February 28th, 1911, to take up one new share at £5 10s. for every two subscribed. The issue was guaranteed by the Anglo-French Exploration Co., Ltd., and others, in consideration of the right to February 28th, 1911, to take up 25,000 shares at £5 10s. The directors have power to increase the capital to £350,000, to provide shares under the option rights.

This company was registered July 20th, 1910, and is a reconstruction of the Appantoo Mines, Ltd., registered December 29th, 1900. The properties comprise the Gie Appantoo and Himan Concessions (subject to underleases to Prestea Block A, Ltd.), area 257 acres and the Quaw Badoo concession and a strip 570 feet along the line of reef to the S.W. of the Broomassie Concession, and the Appantoo Deeps property (acquired from the Fanti Consolidated Mines, Ltd., and Wernher, Beit & Co.). The properties are situate on the Prestea-Broomassie range, Wassau District, Gold Coast Colony, adjoining the property of Prestea Block A, Ltd., and represent a compact block of ground measuring 7,000 feet along the line of reef (equal to 969 claims). The consideration was £100,000 in fully-paid shares, of which 28,000 were payable to the Appantoo Mines, Ltd., and 72,000 to Fanti Consolidated Mines, Ltd., and Wernher, Beit and Co. (48,000 for Quaw Badoo Concession and 24,000 for Appantoo Deeps). The vendors also received in the same proportions the call of 75,000 shares for two years at 25s. per share. On the Quaw Badoo property some development work had been carried out and three reefs disclosed. Prospecting work is in progress and it is proposed to sink a shaft close to the Prestea Block A property.

The authorised capital is £500,000 in 500,000 shares of £1 each; 100,007 shares are issued and fully paid. 150,000 shares are to be offered for subscription at par, 40,000 to shareholders of the Appantoo Mines Ltd., and 110,000 to shareholders of the Fanti Consolidated Mines, Ltd., subscribers having the option until August 17th, 1912, of taking up one new share at 25s. per share in respect of each two shares subscribed; 50,000 shares were guaranteed proportionately by the vendors in consideration of a call for two years on 25,000 shares at 25s. per share. Transfer form, common: fee 2s. 6d.

THIS company was registered May 25th, 1897, and acquired the undertaking of the Côte d'Or Co., Ltd., including concessions in respect of gold mines and timber over 100 square miles in the districts of Bekwai and Adansi, Ashanti, Gold Coast Colony. The purchase consideration was £52,500, payable £2,500 in cash and £50,000 in fully-paid shares. The property is held on lease for 90 years from January 1st, 1897, subject to a royalty of 5 per cent. on gold and other products. The Sansu portion of the property, 320 acres (subsequently increased to 640 acres), was sold for £100,000 cash and £50,000 in fully-paid shares of the Sansu Mine, Ltd., but in Jan., 1910, this was re-acquired for 21,500 fully-paid shares; the company also floated the Ashanti Goldfields Auxiliary, Ltd. (now Ashanti Rivers and Concessions, Ltd.), and holds 85,839 of its shares. During 1909 the Bekansi and Dampia Concessions were acquired, but in February 1910, these concessions together with the mining rights over 93 square miles of the original concession, were transfered to Ashanti Goldfields Territories, Ltd., the consideration being £105,000 (£5,000 cash and £100,000 in fully-paid shares) and shareholders had the right to apply for 401,800 shares at par being at the rate of two for every five shares held.

The property now held comprises an area of seven square miles. The principal mines being worked by the company are known as: Obuasi, Justices, Côte d'Or, and Ashanti. Crushing is in progress, 50 stamps being erected, also cyanide plant. A small plant for treating the richest and most refractory portion of the ore by dry crushing, roasting and cyanidation, commenced working January, 1907, and a second unit started work March, 1908; a five-unit roasting plant has been erected and commenced work during 1910 (the two-unit plant is being used for treating the accumulated tailings). A slimes treatment (filterpress) plant started work in January, 1909. The combined capacity of the roasting and filter press plants is 11,500 tons monthly. During 1906-7, 48,610 tons yielded gold value £188,528; during 1907-8, 59,156 tons yielded £173,809; during 1908-9, 70,345 tons yielded £174,369; during 1909-10, 90,860 tons yielded £306,322. THIS company was registered in the Transvaal May 6th, 1895, and is a second reconstruction of the Aurora West Gold Mining Co., Ltd, formed in August, 1889. In March, 1897, the company purchased the property of the Aurora Gold Mining Co., Ltd., for 45,000 fully-paid shares and £14,000 cash. The company now own equal to 142 claims, situated in the western section of the Witwatersrand Gold Fields, about eight miles west of Johannesburg. Of these about 26 claims lie to the north of the main reef outcrop, the actual mining area being 116 claims. In addition water rights, bewaarplaatsen, &c., are held equal to 50 claims. Two shafts have been sank, the main shaft to a depth of 1,142ft. and the east incline shaft to 746ft.

Crushing commenced on the 1st January, 1892. The mine was shut down in April, 1894. Crushing was resumed February, 1899, and stopped on commencement of the war, and again resumed in August, 1908. A 60-stamp mill and cyanide and slimes plant, have been erected with a monthly capacity of 11,000 tons. During 1908 (five months) 40,599 tons yielded gold value £40,980; profit £6,592 or 3s. 3d. per ton. During 1909, 125,272 tons yielded £139,259; profit £17,653. During 1910, 128,281 tons yielded £142,460; estimated profit £31,820. Ore reserves at December 31st, 1909, 259,000 tons, value 5·7dwts. per ton. For crushings *see table at commencement of volume.*

The authorised capital is £212,705, in 212,705 shares of £1 each; all the shares are issued and fully paid. The capital, originally £140,000, was increased to £250,000 in March, 1897, 45,000 shares being allotted to the Aurora Co., as above, and 65,000 issued at par for working capital. In April, 1909, the capital was reduced to £62,500, shareholders receiving one share for every four shares held; it was then increased to £212,500, and 150,000 new shares were taken by the General Mining & Finance Corpn., Ltd. at par, and offered to shareholders for subscription at 21s. in the proportion of three for every five old shares held; subscribers had an option until June 30th, 1910, to take up a similar number of shares at 22s. 6d. each as subscribed for. The corporation had an option on similar terms over any shares not subscribed and also a further option between July 1st, and July 14th, 1910, to apply at 22s. 6d. each for such of the new shares not taken up under the option. The capital was increased from £212,500 to £212,680 in August, 1909, and to present amount in May, 1910.

The accounts for year ended December 31st, 1908, submitted in Johannesburg March 12th, 1909, showed debit balance increased to £123,987; liabilities in excess of liquid assets £302,943 (chiefly owing to General Mining and Finance Corpn., Ltd., and others), capital re-organisation scheme since carried into effect.

The accounts to December 31st, 1909, submitted in Johannesburg March 11th, 1910, showed excess of liabilities over liquid assets, £166,847 (chiefly owing to General Mining and Finance Corpn., Ltd.)

A share register is kept in London. The 30th June, 1909, was appointed settling day in shares Nos. 1 to 212,500 and option certificates issued with shares Nos. 62,501 to 212,500, and December 28th, 1909, in Nos. 212,501 to 212,680. THIS company was first registered in the Transvaal September 8th, 1887, as the Bantjes Reef Gold Mining Co., Ltd., to acquire 104 gold-mining claims on the Farms Vogelstruisfontein and Langlaagte, Witwatersrand, Transvaal. The vendors received £70,000 in fully-paid shares. In December, 1888, 16 claims on the Langlaagte Farm, with adjoining mynpacht 33½ morgen, were sold for £60,000 cash. In 1893 six south claims were purchased for £1,150. On September 9th, 1895, the company was reconstructed in the Transvaal under the present title, various adjoining properties being acquired (for 195,600 shares). Early in 1896, the company purchased for £76,000 cash the freehold of 3,148 acres, comprising about half of the farm Vogelstruisfontein known as Van der Hoven's portion, including the part on which the company's mining claims are situated, also including the Old and New Florida Township and the Florida Lake water-right. Mining area now held, 820 claims, also four water-rights. Three shafts are being sunk, and at December 31st, 1909, the east incline shaft has been sunk to a depth of 1,667 feet, the central shaft to 1,067 feet, and the west shaft to 677 feet; ore reserves at December 31st, 1909, 537,805 tons, value 7·6dwts. per ton, also 287,727 tons, value 3·5dwts., and 89,779 tons, value 3·16dwts. per ton; at June 30th, 1910, 802,994 tons, value 7·9dwts. A 70-stamp battery, tube mill, and cyanide and slimes plant, with a capacity of 20,000 tons monthly, are erected, and crushing commenced August 9th, 1910, and for 1910, 97,205 tons yielded gold value £123,461; estimated working profit, £12,468. The capacity of the plant is being raised to 25,000 tons monthly.

Provided the development operations continue satisfactory the estimated life will exceed 25 years treating 240,000 tons yearly.

BANTJES CONSOLIDATED—continued.

A revenue is derived from claim licences on the freehold and from stands in the Old Florida Township; the New portion is about to be dealt with.

The authorised capital is £502,306, in 502,306 shares of £1 each; all the shares are issued and fully paid. Under the scheme of reconstruction in 1895, five fully-paid new shares were given for every four old shares, with the right to subscribe for one new share at 50s. The issue was guaranteed in consideration of an option over 60,000 reserve shares at 60s. This option was exercised in September, 1896. In August, 1908, the capital, formerly £435,000, was reduced to £108,588 by cancelling 650 reserve shares and issuing 1 share for every 4 shares held; it was then increased to £295,200 and 140,000 shares offered *pro rata* to shareholders at par, being 8 for every 25 old shares held; the issue was guaranteed; subscribers received an option to November 11th, 1910, at 22s. 6d. per share over the same number of shares subscribed; the options were exercised and the capital increased accordingly. In May, 1909, 30,000 shares were taken up by H. Eckstein & Co., at 75s. each. In July, 1910, the capital was again increased and 83,718 shares offered to shareholders at 55s. each *pro rata* to their holdings, the issue being guaranteed by H. Eckstein & Co., for a commission of 2s 6d. per share. The directors have power to increase the capital to £600,000, such new shares to be offered to shareholders *pro rata*.

The accounts for year to December 31st, 1909, submitted in Johannesburg March 18th, 1910, showed cash £7,523, debtors, £2,426; creditors and loans, £42,363; share premium account £85,657 (capital since increased).

Duplicate share registers are kept in London and Johannesburg. Transfer form, common; fee, 2s. 6d. per 100 shares or part thereof per deed. Share warrants to bearer for 1, 5, and 25 shares may be had at a fee of 1s. for 1 to 5 shares, and 2s. 6d. per 100 shares or part of 100 beyond 5, besides 1s. per warrant; fee for reconversion, 5s. per 100 shares or part of 100, and 1s. for each certificate. THIS company was registered April 2nd, 1897, to acquire 280 claims in the Bulawayo, Belingwe, and Filabusi districts of Rhodesia, and the Insnkamine farm of 6,250 acres situate 12 miles from Gwelo, Rhodesia. The purchase consideration was 130,000, in fully-paid shares. Some of the claims have been abandoned. Additional claims are being acquired. (*See below*).

The authorised capital is £200,000, in 200,000 shares of £1 each; 135,000 shares are issued and fully paid. The capital was increased from £150,000 in December, 1910.

The accounts to December 17th, 1910, submitted December 29th, 1910, showed cash £10,295. A loan has been made to the company of £12,500 for three years at five per cent. with the right to call 12,500 shares at par.

Transfer form, common; fee, 2s. 6d. The 7th May, 1902, was appointed settling day in shares Nos. 1 to 150,000. Latest price, 6s. 6d., 7s.

Additional particulars officially supplied: Some of the original claims have been abandoned, but 80 claims near Bulawayo have been retained, 10 of which are known as Ingubu, from which very rich ore has been taken. One lump of gold weighing 450 ozs. was discovered at a depth of 60 feet from the surface and was sold for about £1,600. Other rich pockets have been found. Prospecting work is being proceeded with, also on 15 claims known as Albert, and 55 continuous claims known as Abalozwe.

By a special resolution passed on November 17th, 1910, the Company was empowered to increase its capital by the issue of 50,000 additional shares. This was done to enable the company to set aside a portion of the said shares for provision of further working capital, and to acquire with the remaining portion of the said shares some properties which are believed to be of very great value and in the vicinity of some mines that are well known. The properties have been inspected by the company's engineer, and he reports most favourably upon them; in fact, in respect of one or two of the properties, the company can immediately commence work, as the ore is at the surface, and the reefs exposed show that they can be made profitable from the very commencement of work.

The Engineer to the Company left London on December 31st for the purpose of expediting the development work that is now being done on the claims above referred to, and also for starting up work on the new properties.

This company was registered May 12th, 1905, to acquire a 60 years' lease of areas equal to 666 gold mining claims on farm Berlin, No. 331, on the Harmony Estate, Leydsdorp district, Northern Transvaal. The consideration was £100,000 in fully-paid shares, of which the Leydsdorp Proprietary (Transvaal), Ltd., receive £37,500, the British Mines, Ltd., £37,500, and the Harmony Proprietary Co., Ltd. (as lessors), £25,000, the latter company also to receive a royalty of 2½ per cent. on gross output of gold with a minimum rent of £666 per annum. The property was reported upon by Harold Fletcher and Cyril F. Michell, of Johannesburg, and Percy C. Adams, of Gloucestershire. Arrangements are being made to secure the right to mark out a new mynpacht under the new Transvaal Gold law in lieu of that previously located. Notice was given in September, 1910, by the Transvaal Government of its intention to proclaim the farm as a public goldfield. Operations are at present suspended, but will be resumed on the completion of the Selati Railway extension.

The authorised capital is £150,000, in 150,000 shares of £1 each; 120,007 shares are issued, 100,000 (vendors') credited as fully paid, and 20,000 subscribed for working capital on which 1s. per share has been paid up.

THIS company was registered October 13th, 1910, to acquire from the Bisichi Synd., Ltd., tin mining rights over an area of three square miles in the Bisichi Valley Tin Area, Bauchi Province, Northern Nigeria. The consideration was £150,000, payable 7,000 in cash and £143,000 in fully-paid shares. *See map on opposite page.*

The authorised capital is £200,000, in 200,000 shares of £1 each; all the shares are issued and fully paid. Transfer form, common; fee, 2s. 6d. Latest price, $\frac{15}{16}$, 1.

Additional particulars officially supplied:—The company was formed to acquire and work mining rights over a property known as the Bisichi Valley tin area, approximately three square miles in extent, situated in the Bauchi Province. The Bisichi or Shen River traverses it from west to east, and there is an excellent waterfall at the western end. The Consulting Engineer, Mr. H. W. Laws, states: "One of the most pleasing features of this property is its constant supply of water for sluicing and power purposes, and the ample head of water given by the three falls for hydraulicking." Only one-tenth of the area actually owned by the company has so far been tested, and on this there are estimated to be 7,800 tons of black tin, containing over 70 per cent. of pure metal. Allowing £15 per ton for working expenses and £30 per ton for transport and contingencies—estimates which are more likely to be over than under the mark—this represents a profit of £350,000, or not far short of double the capitalisation of the company. It should be noted, however, that this estimate of profits is based on black tin at £90 per ton, whereas with metallic tin at its present price Nigerian black tin can safely be estimated at over £110 per ton. The tested area averages 4 yards in depth and contains approximately 2,120,000 cubic yards of payable alluvial wash, the average value being no less than 7·27 lb. of black tin per cubic yard. In order to turn this to account Mr. Laws advises the immediate erection of an hydraulicking plant capable of dealing efficiently with wash dirt sufficient to produce 800 tons of black tin annually, for which purpose an ample head of water is stated to be available throughout the year, and, providing no unforeseen difficulties arise, he is of opinion that the whole of the plant would be in operation within nine months. The production of 800 tons of black tin per annum will, on the conservative basis adopted by Mr. Laws, give a profit of approximately £40,000, or equal to 20 per cent. on the capital of the company, but as working expenses and transport charges will probably be considerably below Mr. Laws' estimates, the annual profit will most likely be in excess of the figures stated. The Consulting Mining Engineer, Mr. Laws, has spent seven or eight years in Northern Nigeria and is fully acquainted with the potentialities of the property, and concludes his report by stating: "I consider the Bisichi Valley a very valuable property and one that can hardly fail to be successful." The working capital of £50,000 has all been privately subscribed.

THIS company was registered in the Transvaal February 16th, 1903, to acquire from the Transvaal Coal Trust Co., Ltd., two mynpachts covering 881 gold-mining claims on the farm Weltevreden or Brakpan No. 166, East Rand, Transvaal; also such further claims and gold-mining rights as the vendors might become entitled to on proclamation of the farm. The consideration was £260,000 in fully-paid shares and rights to subscribe as below. Owing to results from boreholes, the company exchanged its south-eastern mynpacht for a similar area at the northe west end of the farm. In May, 1905, a further 202 claims and 3 stands on tha adjoining farm Benoni No. 160 were acquired (including 78 claims from New Er- Consolidated, Ltd.), for 68,514 fully-paid shares. The company now owns a complete block of 1,150½ claims. The Brakpan-Witbank Railway runs through the property. *For plan of property see opposite page.*

Two shafts have been sunk, and No. 1 shaft has reached a depth of 3,129 feet, and No. 2, a depth of 3,777 feet. Estimated ore reserves at September 30th, 1910, 1,503,135 tons, value 6·5dwts. per ton; also 724,700 tons, value 2·1 dwts. A plant, consisting of 160 stamps of 2,000lb. each, cyanide plant and tube mills, with a capacity of 60,000 tons monthly, is being erected, and crushing is expected to start about April, 1911. The plant will be driven by electrical power supplied by the Victoria Falls and Transvaal Power Co., Ltd.

The authorised capital is £750,000, in 750,000 shares of £1 each; all the shares are issued and fully paid, including 328,514 vendors' shares. The vendor company received 260,000 fully-paid shares, and its shareholders were offered 250,000 shares at £2 each; the guarantors of the latter received an option for two years on 250,000 shares at £2 10s. each: 50,000 were taken up. The capital was increased from £660,000 to present amount in May, 1905. THIS company was incorporated by Royal Charter October 29th, 1889 (and Supplemental Charter of June 8th, 1900), to acquire administrative rights over territory in South Africa, lying to the north of Bechuanaland, to the north and west of the Transvaal and west of Portuguese East Africa; to extend the Cape railway and telegraph systems northward; to make concessions of mining, forestal or other rights, &c. (For full text of the Royal Charter, *see vol. for* 1897; for Supplemental Charter, *see vol. for* 1900).

The company in the first instance acquired from the Central Search Association, Ltd., the Rudd-Rhodes Concession obtained from Lo Bengula, King of Matabeleland, conferring mining rights over his territory, the Central Search Association being thereby entitled to one moiety of the net receipts of this company, which right was subsequently merged in the United Concessions Co., Ltd., and capitalised in 1893 by the issue of 1,000,000 fully-paid shares of that company (since wound up, *see vol. for* 1895).

The company has also been granted administrative power over the whole of the British sphere north of the Zambesi and west of Nyassaland. The rights of the African Lakes Co. were acquired in 1894. Mining rights over the territories of the chiefs Khama and Gungunhana have also been acquired. The total area of the company's sphere of operations is now about 440,000 square miles; the use of the name "Rhodesia" to describe the whole of the territories under the company's administration has been sanctioned by the Government, the portion south of the Zambesi being described as Southern Rhodesia.

The territory of Southern Rhodesia is divided into the two provinces of Mashonaland and Matabeleland, with a High Court and Executive and Legislative Councils; the seat of administration is at Salisbury, Mashonaland. Northern Rhodesia is divided into the two provinces of North-Eastern and North-Western Rhodesia. North-Eastern Rhodesia is administered under the North-Eastern Rhodesia Orders in Council, 1900 and 1909, and North-Western Rhodesia under the Barotziland-North-Western Rhodesia Order in Council, 1899.

For the purpose of extending the railway northwards, the Bechuanaland Railway Co., Ltd., was formed, and in June, 1899, its name was changed to the Rhodesia Railways, Ltd.; the extension to Bulawayo was opened on November 4th, 1897. A line to connect Salisbury with Bulawayo via Hartley and Gwelo has since been completed, various other branch lines have also been constructed. The extension of the railway northward from Bulawayo was completed to the Wankie district (in which important coal deposits are being worked) in September, 1903, and to the Victoria Falls of the Zambesi River in April, 1904; the line has since been extended beyond the Falls over the Kafue River to the Broken Hill Mine, and has been further extended by the Rhodesia Katanga Junction Railway and Mineral Co., Ltd., to the border of the Congo Free State and from there to the Star of the Congo Mine (the property of the Union Minière du Haut Katanga) by the Campagnie du Chemin de Fer du Katanga. The right to develop electrical energy at the Victoria Falls has been acquired by the Victoria Falls Power Co., Ltd., in which this company holds 400,000 fully-paid ordinary shares.

During 1909, 400,000 acres of ranching land in Southern Rhodesia were acquired by Liebig's Extract of Meat Co., Ltd.

The British South Africa Co. subscribed for debentures of the Bechuanaland Railway Co., and in September, 1898, offered to British South Africa shareholders £420,800 of these at 93 per cent., all being taken up. In May, 1899, the British South Africa Co. undertook the issue of £3,125,000 four per cent. debentures of the Rhodesia Railways, Ltd., guaranteed principal and interest, and gave subscribers an option either to exchange their bonds for fully-paid British South Africa shares at £5 per share, or to take up the same number of shares at £5 each by paying cash and retaining their debentures; this option expired on May 15th, 1902, when a new arrangement was entered into (as below). Early in 1909, the company subscribed for £150,000 debentures in the Rhodesia-Katanga Junction Railway and Mineral Co., Ltd. During 1910, the loans to Rhodesia Railways Trust, Ltd.,

BRITISH SOUTH AFRICA COMPANY—continued.

Rhodesia Railways, Ltd., and Mashonaland Railway Co., Ltd., amounting to £1,385,000, were converted into £1,250,000 five per cent. convertible debentures and £135,000 shares of the Rhodesia Railway Trust, Ltd., at par.

The Beira Railway (through Portuguese territory) has been extended into the company's territories by the Mashonaland Railway Co., Ltd., and reached Salisbury, Mashonaland, in April, 1899. The telegraph system has been extended from Southern Rhodesia to Lake Tanganyika and German East Africa as far as Ujiji by the African Trans-Continental Telegraph Co., Ltd. Townships established: Bulawayo, Salisbury, Umtali, Victoria, Gwelo, Melsetter, Enkeldoorn, Selukwe, Rusapi, Gwanda, &c. Mining operations are being carried on by various companies and the output of gold is declared monthly (*see Rhodesian Crushings and Gold Output tables*). In 1898 the company decided to take an active part in the development of mining interests in its territories by financially assisting companies &c., the issue of shares in January, 1899 (as below), being chiefly for this purpose.

In 1906, shareholders had preferential allotment to 312,500 preference shares in the Victoria Falls Power Co., Ltd.

The authorised capital is £9,000,000, in 9,000,000 shares of £1 each; 8,053,499 shares are issued and fully paid (and have no further liability). None were offered for public subscription, the recent issues having been taken up by the shareholders. There are about 40,000 shareholders, not including holders of bearer shares.

The capital was increased from £1,000,000 to £2,000,000 in November, 1893, and to £2,500,000 in July, 1895, the 500,000 new shares being offered to shareholders at 70s. per share. In November, 1896, the capital was increased to £3,500,000, the 1,000,000 new shares being issued (500,000 in November, 1896, and 500,000 in January, 1897) to shareholders at £2 each. In April, 1898, the capital was increased to £5,000,000, 250,000 new shares being issued to shareholders at £2 each. In January, 1899, 625,000 of the reserved shares were issued to shareholders at £2 10s. each, leaving 625,000 unissued. In May, 1902, holders of Rhodesia Railway debentures were given the option to pay up in full 20 per cent. of their holding, and exchange such 20 per cent. for Chartered shares at £5 per share, or to purchase an equivalent number of shares at £5 each for cash; by so doing they became entitled to an option expiring May 31st, 1903, to exchange a further 40 per cent. of their debentures for shares at £5 each, or take an equivalent number of shares for cash at £5 each, and to a similar option expiring May 31st, 1904, in respect of the remaining 40 per cent. of their debentures. In February, 1904, 431,580 shares then unissued were allotted to shareholders at £1 13s. 9d. In October, 1904, the capital was increased to £6,000,000 by creation of 1,000,000 shares, which were issued to shareholders at 21s. each and in March, 1908, was again increased to present amount to provide the necessary shares for conversion of second debentures and the exercising of options held by second debenture-holders.

There are £1,250,000 five per cent. first mortgage debentures, which were issued in July, 1896, at the price of £97 10s. per cent. (former debentures having been redeemed in February, 1896). The whole of the issue was guaranteed, but shareholders were given the option of applying for £25 debentures for every 50 shares held. The bonds (which are mostly to bearer) are repayable at 105 per cent. in 1920, or on six months' notice from the company at any time. Interest is payable August 1st and February 1st.

There is also £20,154 five and a half per cent. second mortgage debenture stock, outstanding balance of £1,000,000, offered to shareholders for subscription at par in March, 1908; £981,000 was subscribed, but this has been reduced to present amount owing to conversion rights being exercised. The stock is transferable in multiples of £1 and is repayable on February 1st, 1928, or after February 1st, 1913, on six months' notice from the company; subscribers had the right to June, 1910, to take up one ordinary share at par for each £1 of stock subscribed and a second share at par at any time up to June 1st, 1912, and in addition had the right to exchange their stock for fully-paid ordinary shares at any time previous to June 1st, 1910. The option rights are represented by separate bearer documents and can be exercised by the holders in whole or part or can be disposed of. Interest is payable August 1st and Febrnary 1st.

The accounts for year to March 31st, 1908, submitted February 26th, 1909, showed general expenditure for the year £893,941 and revenue £741,052, leaving £152,889 debit on the year, making total debit to general expenditure account £4,682,015.

The accounts for year to March 31st, 1909, submitted Februnary 28th, 1910, showed general expenditure for the year £893,950, and revenue £827,440, leaving £66,510 debit on the year, making total debit to general expenditure account £4,748,526.

THIS company was registered October 19th, 1909, and is a second reconstruction of a company of same name, registered May 16th, 1901, and first reconstructed February 16th, 1904 (*see vol. for* 1909). The company owns sub-leases of: (*a*) the north-east half portion of the Broomassie Concessions, known as East Broomassie, and (*b*) about two-thirds of the adjoining south-west portion (West Broomassie). The two properties are situate at Broomassie, on the River Ancobra, about 20 miles north-west of Tarkwa in the Wassau district, Gold Coast Colony, and extend 5,430 ft. along the line of reef by 6,000 ft. across; the sub-leases run for 50 years from March 15th, 1880, at an aggregate annual rental of £125, renewable for 50 years at same rental. Dredging rights over 14 miles of the Ankobra and Mansi Rivers, two timber concessions and mining and timber rights over two other concessions, each of 825 acres, are also held. In 1908, a forty-five per cent. interest in the Dainsu Lease (area 1,653 acres) was acquired from Gold Coast Leases, Ltd., for 8,000 fully-paid shares, and subsequently transferred to the Broomassie-Prestea Main Reef Proprietary Synd., Ltd., for 45,000 fully-paid shares. Total area now held, 825 acres.

An old 20-stamp mill commenced crushing in September, 1904; this has since been replaced by a new 20-stamp mill. A cyanide plant commenced work February, 1908, and a concentrating plant during 1909. Crushing is at present suspended pending the development of the mine at depth. Depth of main shaft at October 31st, 1910, 1,117 ft. Estimated ore reserves at December 31st, 1908, 9,851 tons, value 32·6dwts., and about 70,000 tons, value 7dwts. For crushings *see table at commencement of volume.*

The authorised capital is £350,000, in 700,000 shares of 10s. each; 404,192 shares are issued, 299,970 credited as fully paid, and 100,062 having 4s. paid. Shareholders were offered one share credited as fully paid for every old £1 share held with the right to take up one new share at par for every three shares held, subscribers having an option to December, 1911, over one further share at par in respect of every two subscribed; the issue was guaranteed by the Share Guarantee Trust, Ltd., in consideration of a call to December, 1911, over 50,000 shares at par, and the right for one year after December, 1911, to take up at 12s. 6d. per share such of the shares reserved for debenture holders conversion rights.

There is £44,041 six per cent. first mortgage debenture stock which was issued in exchange for debenture stock of the old company, and holders have the right to December, 1911, to convert into shares at 12s. 6d. each; interest is payable January 1st and July 1st.

Transfer form, common; fee, 2s. 6d. The 9th March, 1910, was appointed settling day in shares Nos. 1 to 292,582, 292,613 to 292,622, and 300,018 to 404,017

BULUWAYO AND GENERAL EXPLORATION—continued.

Ltd., (registered in Transvaal), for 60,000 fully-paid shares. It is proposed to float a company to work the Idaho property.

The authorised capital is £200,000, in 200,000 shares of £1 each; 188,137 shares are issued and fully paid; shareholders were offered one share credited 16s. paid for each old fully-paid £1 share, the liability being payable 6d. on application, 6d. on allotment, and the balance in calls of 1s. at intervals of not less than three months. The accounts to September 30th, 1910, submitted December 28th, 1910, showed cash £4,271, loan against security £20,000, debtors £215, creditors £970.

Transfer form, common; fee, 2s. 6d. The 1st September, 1909, was appointed settling day in shares, Nos. 1 to 188,137. Prices, 1909: highest, 15s.; lowest, 4s. 3d; 1910: highest, 11s.; lowest, 4s. 6d. Latest price, 5s., 5s. 6d.

Additional particulars officially supplied:—Tweefontein.—Heidelberg district.—The directors are pleased to report that the Roodeklip Company, owners of adjacent claims, have purchased the whole of our Tweefontein claims, which gives them a large property in one compact block. The purchase price was £60,000, in 60,000 fully-paid shares of £1 each; out of an authorised capital of £150,000, there is a guaranteed working capital of £20,000, and 30,000 shares are held in reserve for providing further working capital. The favourable results already obtained by the work done on the property lead to the conclusion that these shares possess a very substantial value.

Rose of Sharon and Shamrock Gold Mines, Ltd.—The reports from these mines in which a substantial interest is held are most encouraging, and arrangements are in progress to provide further working capital.

Mafungabusi and Sebakwe districts.—The directors have not, up to the present, let or disposed of the 60 claims they hold in these districts, but with the improved prospects in Rhodesia they hope they may before long be able to do so. Owing to the footage done by the tributors of the Leopard and Pearl Mine no expense has been incurred by the company in reference to the above claims.

Idaho Group of Mines, U.S.A.—We consider that this extensive group of mines is a most valuable asset. It was always intended to work them as one large property, and with this end in view developments were carried out down to the 400ft. level, and several hundred feet of driving were accomplished. The upper levels on the Annie vein were subsequently let on lease to tributors, and the ore taken therefrom and sent by them to the mill averaged from $24 to $30 (equivalent to 24 to 30dwts.) to the ton. Your directors are of opinion that the time is approaching when it will be possible to float a company for the purpose of working this property on the lines originally contemplated, and steps are being taken to carry out this project.

This company was registered April 30th, 1888, being a reconstruction of the Cape Copper Mining Co., Ltd., registered January 17th, 1863. The company owns copper mines in Namaqualand, Cape Colony, known as O'okiep (the principal mine), Nababeep South, Spectakel, Koperberg, O'okiep East, North Spectakel, O'okiep South, Narrap, and Carolusberg East; also an interest in the Britonferry Chemical and Manure Co., Ltd. Output from chief mines for 1908-9: O'okiep 15,968 tons of ore, Nababeep 54,000 tons, leaving reserves at 10,000 tons O'okiep and 150,000 tons Nababeep; 1909-10: O'okiop, 15,196 tons of ore, Nababeep, 54,050 tons, leaving reserves at 8,000 tons O'okiep and 219,800 tons Nababeep.

An option until March, 1913, over a property in India has been acquired, upon which exploratory work is proceeding. A share interest in a mine in Spain is also held.

In June, 1890, the company acquired from the Tilt Cove Copper Co., Ltd., a lease for 99 years, at a rent of £4,400 per annum, of the Tilt Cove Copper Mines, situate in Newfoundland. The consideration for the lease was the advance of a sum of £15,000 to the Tilt Cove Co., by way of loan at 5 per cent. per annum, secured by a first charge on profits, and repayable (with all other advances and capital expenditure on the mines) before the Tilt Cove Co. participate in the pro-

fits; the repayments are completed, and profits are now equally divided between this company and the Tilt Cove Co.

The authorised capital is £750,000, in 75,000 six per cent. cumulative preference and 300,000 ordinary shares of £2 each; 45,000 preference and all the ordinary are issued and fully paid, making paid-up capital £690,000.

The capital was formerly £600,000, in ordinary shares of £2, shareholders in the old company receiving 15 shares of £2 each, fully paid, for each old share of £10 with £8 paid up. In December, 1891, the capital was increased to its present amount by the creation of the preference shares, which were offered to shareholders; they rank in priority for capital, and for a cumulative preferential dividend of 6 per cent., and also rank *pari passu* with the ordinary shares for further profits after the latter have received a similar cumulative dividend.

Dividends and bonuses to the amount of £67 13s. 9d. per £10 share were paid by the old company during the period from 1864 to the time of reconstruction the last being £2, March 24th, 1888. Dividends on both preference and ordinary are now paid half-yearly on 1st January and 1st July. The preference have received similar dividends to the ordinary, as below, except that the ordinary received no dividends for 1901-2, the arrears being made up in January, 1904. THIS company was registered in the Transvaal August, 1895, as a reconstruction of the Cassel Colliery Co., Ltd., and owns 635 acres of coal lands on the farm Daggafontein No. 175 at Springs, about 26 miles east of Johannesburg. The properties are held on lease from the Clydesdale Co. at a rental of £100 per annum, increasing to £200; the lease expires in 1917, but the company has the right to purchase the freehold and full mining rights for £5,000 at any time before the expiration of the lease. In November, 1898, it was resolved to acquire for £35,000 the property and assets of Landau's Transvaal Collieries, Ltd. (*see vol. for* 1899), situate in the Middelburg district of the Transvaal, and comprising 26,860 acres on the farms Klipfontein, Klippan, Kleinkoppe, Wolvekrans and Blaauwkrans. Owing to the intrusion of a dyke, work on the company's Springs colliery is suspended. The Landau colliery is being worked. Coal output for 1905, 181,071 tons; 1906, 227,499 tons; 1907, 180,912 tons; 1908, 159,531 tons; 1909, 187,932 tons; 1910, 221,726 tons.

By arrangement with other companies, boring operations have been conducted on the north-west portion of Daggafontein to test the value of the property as a deep level gold mine; main reef has been struck at 5,540 feet depth, value about 7dwts., over 32in. width; boring was stopped at depth of 5,582 feet, the hole having deflected 2,255 feet to the north-east, the actual depth being 4,880 feet.

The authorised capital is £250,000, in 250,000 ordinary shares of £1 each; 200,000 shares are issued and fully paid. The capital originally £50,000 was increased to £75,000 in January, 1894, 20,000 new shares being then sold for £15,000; the remaining 5,000 were sold in August, 1894, at 25s. each. The capital was increased to £360,000 under the reconstruction in July, 1895, shareholders receiving four fully-paid shares in exchange for each old share; the reconstructors subscribed for 50,000 shares at 25s. In November, 1898, the capital was increased to £410,000 by creation of 50,000 preference shares, which were issued to shareholders at par. In August, 1909, the capital was re-organised by cancelling 250,000 ordinary shares and issuing two new ordinary shares for every seven held, thereby reducing the capital to £160,000; it was then increased to £200,000 by creation of £50,000 ordinary shares. The preference shareholders received one-and-half fully-paid ordinary for each preference share held, and 25,000 shares were offered to shareholders at par, the issue being guaranteed in consideration of an option to August 23rd, 1910, over 25,000 shares at 25s. each, and to August 23rd, 1911, over 25,000 at 30s. each.

CASSEL COAL—continued.

Dividends paid: 1895, 30 per cent.; 1896, 15 per cent.; 1897, 10 per cent.; 1898, 10 per cent.

The accounts for year to December 31st, 1908, submitted in Johannesburg March 30th, 1909, showed debit increased to £121,952 (capital since re-arranged and debit balance cancelled and £140,388 written off property, machinery, &c.)

The accounts to December 31st, 1909, submitted in Johannesburg April 5th, 1910, showed a profit of £5,906 carried forward; cash £20,665, debtors £5,589; creditors £2,408.

THIS company was registered May 9th, 1905, to acquire the undertaking of the African Ventures Synd., Ltd., registered November 2nd, 1903 (*see vol. for* 1905). The company carries on investment and general financial business, in connection with South African gold mines. An interest in the Diamond Synd. has been secured which deals with a large proportion of the diamonds produced in South Africa.

A provisional agreement has been entered into with Wernher, Beit & Co., to acquire as from January 1st, 1911, the goodwill of their business (excepting their business of diamond dealers and merchants) and of H. Eckstein & Co., Johannesburg, together with certain assets to be agreed upon between a committee of shareholders and Wernher, Beit & Co. The committee (Messrs. Otto Beit, G. Rouliot and R. T. Bayliss) and Wernher, Beit & Co. are to determine the purchase price of such assets which will consist of interests principally on the Witwatersrand, such as buildings and landed property in Johannesburg, interests in unfloated ground (held either alone or jointly), share holdings, &c., the approximate value being about £1,250,000. The consideration is to be satisfied in fully-paid shares of the Corporation (ranking for dividend as from January 1st, 1911) at a price to be fixed, but may be partially liquidated in cash or agreed securities. No payment will be made for the goodwill of either of the two firms. The current liabilities of the firms (excepting bills payable), existing contracts, &c., will be assumed by the Corporation, which will also take over all debts owing to the firms (excepting bills receivable). Any differences resulting from these items will be liquidated in cash or agreed securities. It is proposed to increase the capital of the Corporation to £5,100,000 by the creation of 125,000 new shares of £12 each. Any shares not absorbed by the purchases above referred to are to be offered to shareholders *pro rata* at a price which will be fixed by the board. Most of the present partners of Wernher, Beit & Co., and H. Eckstein & Co., will join the board as "participating directors," and will not be entitled to any remuneration for their services, except a 25 per cent. interest in the profits of each year after the payment of a dividend of 5 per cent. on the paid-up capital and the setting aside to reserve of such sums as may be deemed advisable.

The authorised capital is £3,600,000, in 300,000 shares of £12 each, all issued and fully paid. The capital was reduced from £6,000,000 in £20 shares (issued at 5s. premium) to £3,600,000 in December, 1908, by paying off capital to the extent of £4 per share (being capital in excess of company's wants) satisfied by issue at par of four-and-a half per cent. debentures (since redeemed), and writing off £4 per share, being capital unrepresented by assets.

Dividends paid: For 1908-9, £1 per share; 1909-10, £1 (10s. January 7th, 1910, and 10s. August 3rd, 1910); 1910-11, 10s. January 7th, 1911 (for half-year ending December 31st, 1910).

The accounts for year to June 30th, 1909, submitted July 30th, 1909, showed a profit of £553,516; dividend absorbed £300,000, transferred to reserve £100,000, manager's and French directors' percentage £60,173, leaving £93,343 carried forward.

The accounts to June 30th, 1910, submitted July 27th, 1910, showed a profit of £418,106 making with balance forward a sum of £511,449; dividends absorbed £300,000, manager's and French directors' percentage £52,383, leaving £159,066 carried forward; shares and interests in South African and other companies and contracts for purchases for forward delivery at or under cost £2,383,023, investments in British, Colonial and Foreign Government stocks £1,245,429, shares in other companies £276,332, contracts for sales of shares forward delivery £45,873, loans at short notice £525,000, debtors £50,070, office furniture £1,518, cash £29,173; creditors £526, contracts for purchases of shares for forward delivery £152,359, uncalled liability on shares held, etc., £126,793.

THIS company was registered in Pretoria November 22nd, 1895, as Cinderella Deep, Ltd., to acquire from the Johannesburg Gold Fields, Ltd. (under an agreement made by Messrs. G. and L. Albu with that company), the portion of the Ziervogel Mynpacht, 288·78 claims, originally owned by the Ziervogel Co., situate on the farm Leeuwpoort, Eastern Witwatersrand, and forming a deep level of the Cason Gold Mines. The purchase consideration was £75,000 in fully-paid shares.

In May, 1910, the following interests were acquired and the name of the company changed:—

Vendor.	Assets acquired.	Purchase Price. Cash.	Shares.

Total area required	1,803·09 claims.	£222,350	409,450

The total area now held consists of 2092·09 claims on Farm Leeuwpoort, 154, Eastern Witwatersrand, Transvaal, forming the deep level of the East Rand Proprietary Mines, Ltd. (*See map opposite.*) The mining area is being opened up by three shafts, of which one, the West Shaft, is already equipped and will open up the western portion of the property. The second, or "Central Shaft," is located about 5,000 ft. east of the West Shaft and will open up the central portion of the property, and the eastern section will be exploited by a third shaft, "East Shaft," situate about 6,000 ft. south-east of the Central Shaft. Both the Central and the East Shafts will have seven compartments, and will be located to strike the reef at a depth of, approximately, 3,000 ft. Sinking of the Central Shaft has commenced, and it is estimated will intersect the reef about the end of 1912. Sinking operations at the East Shaft have not yet commenced.

A crushing plant consisting of 50 stamps, a tube mill and cyanide plant, commenced work September 28th, 1908, and a further 50 stamps and an additional tube mill have been added, the whole plant having a capacity 28,000 tons monthly. A large tonnage of ore is to be opened up and additional plant and machinery

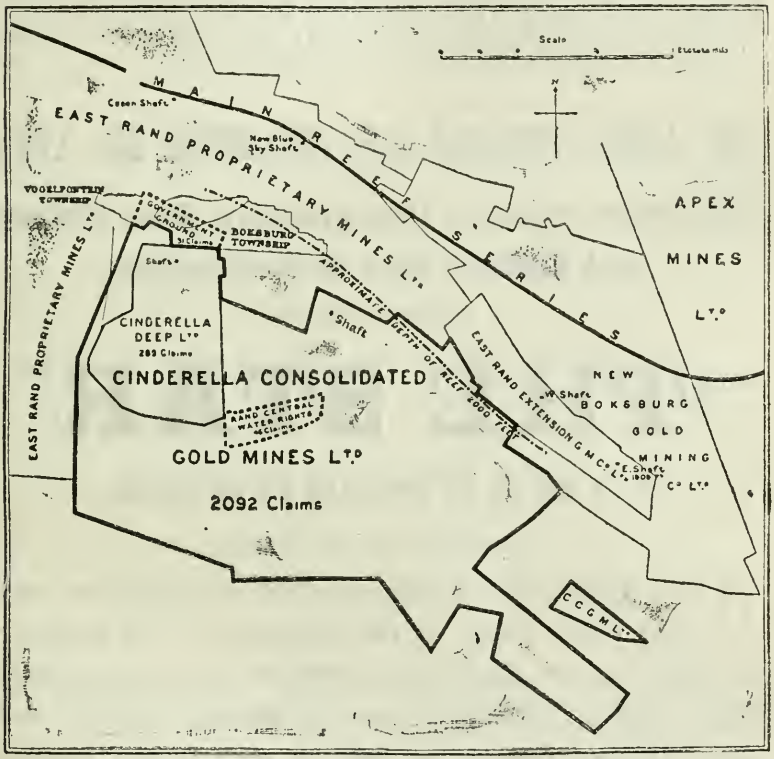
erected, bringing the crushing capacity up to 100,000 tons monthly; this will eventually be extended to deal with a monthly tonnage of 200,000 tons.

During 1909, 157,548 tons yielded gold, value £229,831; profit £59,268, or 7s. 8d. per ton; costs 21s. 7·8d. per ton. During 1910, 181,100 tons yielded £257,409; estimated profit £51,396. *For particulars of crushing see table at commencement of volume.* It was estimated at the time of amalgamation that the ore contents in the combined area exceeded 50,000,000 tons.

The authorised capital is £1,500,000, in 1,500,000 shares of £1 each; 1,159,450 shares are issued and fully paid. The capital was originally £235,000; 78,333 shares were offered to shareholders of vendor company at par, the issue being guaranteed by the promoters (Messrs. G. & L. Albu, of Johannesburg), who received a bonus of 25,000 fully-paid shares. In April, 1899, the capital was



increased to £500,000, 235,000 new shares being offered to shareholders at 21s. each; the General Mining and Finance Corporation, Ltd., took the remaining 30,000 new shares at par and received 1s. for each share taken by shareholders, as consideration for guaranteeing the whole issue. In May, 1910, the capital was increased to present amount to acquire the various adjoining properties mentioned above, and to provide shares for debenture holders' conversion rights and 409,450 shares were issued credited as fully paid and 250,000 shares offered to shareholders at £2 2s. each (being one for every two shares held), the issue being guaranteed by General Mining and Finance Corpn., Ltd., and Johannesburg Consolidated Investment Co, Ltd., for a commission of 2s. per share.

There are £500,000 five and a half per cent. first mortgage debentures in bonds of £10, £50 and £100 each, offered to shareholders in May, 1910, at par, the issue being guaranteed by General Mining and Finance Corpn., Ltd., and Johannesburg Consolidated Investment Co., Ltd., at 95 per cent. Debenture-

holders have the right to June 1st, 1913, to convert into fully paid shares at £3 6s. 8d. each, being three shares for every £10 debenture held. The debentures are redeemable by annual drawings of £25,000, commencing 1915.

The accounts for year ended December 31st, 1909, submitted in Johannesburg March 11th, 1910, showed a profit of £62,294 making with balance forward a sum of £68,467; interest and tax absorbed £10,820, leaving £57,647 carried forward. The capital has since been increased and debentures issued, making the cash available at May, 1910, £681,050.

A share register is kept in London. Share warrants to bearer for 1, 5, 10, or 25 shares can be obtained; fee, 1s. per warrant and 2s. 6d. per 100 shares or part thereof. Transfer form, common; fee, 2s. 6d. per deed of 100 shares or part thereof. The 17th August, 1910, was appointed settling day in shares Nos. 1 to 1,159,450 and August 18th, 1910, in £500,000 debentures. THIS company was registered in Natal in 1887 as the City and Suburban Gold Mining Co., Ltd., to acquire 24 claims, being the mynpacht of the farm Doornfontein, and 79 claims on the farm Turffontein, Witwatersrand, Transvaal. The vendors received £30,000 in fully-paid shares. In 1891 the company purchased for £14,000 the freehold of the entire estate (formerly held on lease), total area 454 acres. The mining property now comprises about 140 main reef claims, including deep levels. The northern portion of the estate adjoining Johannesburg has been laid out as a township, and 666 stands were sold in 1894, on a 99 years' lease, realising £63,292; the company still holds 185 stands. The company was reconstructed and the present title adopted in June, 1895.

Up to April, 1891, 20 stamps were crushing; a further 10 were then added, and 10 more in July and 10 in August, 1891, making 50; in 1894 a new 80-stamp mill was started, and 80 stamps were added in 1895; the 50 old stamps have since been shut down, leaving 160 working. A cyanide plant was started in 1893 and a new plant in 1894. A slimes plant is also working. Crushing was suspended in

CITY AND SUBURBAN GOLD—continued.

October, 1899, owing to the war, and resumed in June, 1901. During 1909, 276,430 tons yielded £326,987; profit £58,304; costs 19s. 5·2d. per ton. During 1910, 308,366 tons yielded £408,037; estimated profit £99,553. For crushings *see table at commencement of volume.* Ore reserves at December 31st, 1908, 1,345,753 tons payable and 543,288 tons under 4·5 dwts. (unpayable); at December 31st, 1909, 723,133 tons payable and 916,453 tons under 3·8 dwts. (unpayable); at June 30th, 1910, 766,796 tons.

Estimated life (not including Main Reef, which at present is unpayable) about seven years from January 1st, 1911.

The authorised capital is £1,360,000, in 340,000 shares of £4 each; all the shares are issued and fully paid. The capital, formerly in £1 shares, was increased from £50,000 to £60,000 in 1888, to £65,000 in January, 1889, and to £85,000 in July, 1892; 10,000 shares were issued to shareholders in August, 1892, at £6 10s. per share, and 10,000 in January, 1893, at £8 12s. 6d. per share. On the 26th June, 1895, it was resolved to increase the capital from £85,000 in £1 shares to its present amount, four new fully-paid shares of £4 each being given in exchange for each £1 share.

This company was registered in the Transvaal on September 12th, 1895, to acquire a portion of the freehold farm Daggafontein No. 175, 1,270 acres in extent, situate at Springs, about 26 miles east of Johannesburg, in the Witwatersrand district, Transvaal. The purchase consideration was £95,000 in fully-paid shares. The northern half of the property has been leased to the Cassel Coal Co, Ltd., for 24 years from 1893, at an annual rental of £100 (increasing to £200), the Cassel Co. having the option to purchase the freehold for £5,000 at any time before the lease expires; owing to a dyke, the Cassel Co.'s Colliery is now being worked by this company under royalty agreement. In March, 1904, it was resolved to purchase the assets of the Pioneer Coal Syndicate, consisting of the freehold farm Reitfontein No. 150, in extent 7,551 acres, the mineral rights over farm Taaiboschspruit No. 205, in extent 10,108 acres, and certain options (since lapsed), all situate in the Heilbron district of the Orange River Colony; the purchase consideration was £24,000 cash and 40,000 fully-paid shares.

The gold contents of Daggafontein have been tested by borehole, *see* Cassel Coal Co., Ltd.; the company is working its collieries at Springs, and also at Taaiboschspruit, Heilbron. A stone quarry on the Orange River Colony property has been let on lease. Coal output for year 1907-8, from Springs 122,785 tons, from Taaiboschspruit 81,520; 1908-9, from Springs, 136,649 tons, from Taaiboschspruit 100,571 tons; 1909-10, from Springs 134,104 tons, from Taaiboschspruit 116,937 tons.

The authorised capital is £200,000, in 200,000 shares of £1 each; 180,000 shares are issued and fully paid. The capital, formerly £150,000, was increased to present amount in March, 1904. In 1907, £50,000 debentures were created, out of which the balance of the old debentures (£8,600) were paid off; the debentures now carry seven per cent. interest and are repayable by yearly drawings in December of £5,000; present amount issued £20,000.

Dividends: 1897-8, 10 per cent.; 1898-9, 20 per cent.; 1901-2, 5 per cent.; 1902-3, 20 per cent.; 1909-10, 5 per cent., declared June 17th, 1910. Dividends are paid simultaneously in London and Johannesburg, about eight weeks after declaration.

The accounts for year ended June 30th, 1910, submitted in Johannesburg September 29th, 1910, showed £23,938 net profit, making with balance forward a sum of £48,721; £7,673 was written off depreciation, dividend absorbed £9,000, debenture interest £2,295, leaving £29,753 carried forward; liabilities in excess of liquid assets £13,307.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. The 28th January, 1903, was appointed settling day in shares Nos. 1 to 140,000, and December 14th, 1904, in Nos. 140,001 to 180,000. Latest price, 10s.

Africa. The area is computed to be about 5 square miles, and a good hammock road is cut from the Station to the property. The lease is held for 99 years from the 12th March, 1896. A parallel range of small hills, rising steeply from the valleys 80ft. to 100ft., run through the property. There has been already spent in development work, etc., over £5,000. The drifts, shafts and adits are thoroughly well timbered. There is ample water, both for milling and personal use and a plentiful supply of timber both for milling and for fuel. Labour is plentiful and can be obtained for 1s. to 1s. 6d. per day.

Captain Louis P. Bowler, the Company's Manager at the Mines, in confirming previous reports made by Mr. A. A. Gearns, C.E., F.R.G.S., and Mr. Kipping, M.I.M.E., that a gold-bearing reef is traced running through the property and carrying heavy gold values, draws attention to the existing Banket formation; and further states:—"There are acres of alluvial gold and by trial pits have proved depth to average some feet. By hand washing it should yield when sluiced 5s 3d. per cubic yard. The estimated cost of treatment per ton 1s. 6d. The tonnage and estimated value over a mile will be £50,000, and will undoubtedly become more valuable in depth, developing at the bottom of the valley into a valuable gold-bearing deposit." A special plant for treating these alluvials has been sent out to the property, and it is expected the Company will be shortly receiving gold returns from the property. In regard to plant and buildings, there is at the present time on the property the manager's six-roomed bungalow, storehouse, and a small assay house built in galvanized iron and containing small furnace. There is also a native village.

THIS company was registered October 20th, 1899, and is a reconstruction of a company of same name (*see vol. for* 1900), formed to carry on an investment business. At March 31st, 1910, investments amounted to £9,737 (valued at cost).

The authorised capital is £50,000, in 49,985 ordinary shares of £1 each and 300 founders' shares of 1s. each; 28,788 ordinary and all the founders' shares have been issued credited as fully paid. Shareholders received one fully-paid founders' share for each founders' share of the old company, one fully-paid ordinary share for each old fully-paid ordinary share, and a sufficient number of fully-paid ordinary shares in exchange for the old partly-paid ordinary shares to represent the amount actually paid up on the latter. The founders' shares are entitled to 15 per cent. of the net profits, the directors take 15 per cent. for fees, and the ordinary shares take the remaining 70 per cent.

Dividends paid by old company:—On ordinary shares, 7½ per cent. for 1889-90, 10 per cent. in May, 1895, and 10 per cent. in June, 1896; on founders' shares, for 1889-90, £33 5s. per £1 share (shares afterwards sub-divided), and in June, 1896, £4 per 1s. share.

The accounts for year ended March 31st, 1910, submitted in Paris June 9th, 1910, showed a loss of £109 increasing debit balance to £13,050, cash £218, loan against security £1,000, debtors £101; creditors £10.

Some of the shares are registered and some are to bearer; these are interchangeable on payment of 1s. per certificate, together with the stamp duty of 1½ per cent. in exchanging to bearer. Transfer form, common; fee, 2s. 6d.

CONSOLIDATED AFRICAN COPPER TRUST, LIMITED.

This company was registered February 17th, 1902 (*see vol. for* 1910). On September 16th, 1910, it was resolved to wind up voluntarily and reconstruct as the South African Copper Trust, Ltd., shareholders receiving, for each preference, or ordinary, share held, one fully-paid 5s. share in the new company. Shareholders had also the right of applying for 300,000 shares in the new company at par with an option for two years over one share at par for every two shares allotted: Liquidator, H. G. This company was formed in Kimberley in January, 1888, to take over the properties of the Adamant Diamond Mining Co., Ltd., and the French and D'Esterre Diamond Mining Co., Bultfontein Mine, Ltd. The property now embraces 430 claims in the Bultfontein Diamond Mine, Kimberley, Cape Colony. As from 1st July, 1889, the property has been leased in perpetuity to the De Beers Consolidated Mines, Ltd., that company paying an annual rent equal to a dividend of 7½ per cent. upon the capital of this company.

The subscribed capital is £721,500, in fully-paid shares of £1 each. Dividends of 4 per cent. in June, 1888, 2 per cent. in September, 1888, 4 per cent. in March, 1889, and 5 per cent. in November, 1889, were paid. Since March, 1890, the dividend of 7½ per cent. per annum received from the De Beers Co. has been regularly distributed to shareholders half-yearly in March and September.

The accounts for the year ended December 31st, 1909, submitted in Kimberley February 2nd, 1910, showed £2,782 dividends on investments and a credit balance of £37,140 carried forward.

Duplicate share registers are kept in London and Kimberley. Transfer form, common; fee, 2s. 6d. per deed of 500 shares or less. This company was registered October 20th, 1909, and is a reconstruction of a company of same name (*see vol. for* 1910). At the time of reconstruction the company acquired from the Consolidated Gold Fields of South Africa, Ltd., a 17½ per cent. interest in arrangements made by that company in connection with the acquisition of about 450 mining claims, in the vicinity of Lone Star Hill, Abercorn, district, Rhodesia. The consideration for the new interest and in liquidation of the indebtedness (about £24,000) of the old company was 25,000 fully paid shares, and an option at par for two years over a further 25,000 shares. The company now owns 1,575 shares in the Abercorn Extension Synd., Ltd. (representing the 17½ per cent. interest mentioned above), 251 gold and an 80 per cent. interest in 90 copper mining claims in Rhodesia, two farms, town stands in Bulawayo, Salisbury, Victoria, &c., and shareholdings in companies operating in Rhodesia.

The authorised capital is £200,000, in 200,000 shares of £1 each; 137,507 shares are issued and fully paid. Shareholders were allotted one new for every four old fully-paid shares held, with the right to subscribe for 50,000 shares at par *pro rata*, the subscription of which was guaranteed by the Consolidated Gold Fields of South Africa, Ltd. 25,000 shares are under option at par for two years (*as above*).

The statutory report was submitted January 18th, 1910.

Transfer form, common; fee, 2s. 6d. The 5th January, 1910, was appointed settling day in shares Nos. 1 to 111,762, and March 15th, 1910, in Nos. 111,763 to 137,507. Prices: 1910, highest, $1\frac{3}{16}$; lowest, $\frac{5}{8}$. Latest price, $\frac{31}{32}$.

This company was registered in the Transvaal September 20th, 1902, to acquire the undertakings of the New Croesus Gold Mining Co., Ltd. (registered October, 1891), and the Langlaagte Star Gold Mining Co., Ltd. (registered 1894) (*see vol. for* 1905). The property consists of a compact block of 343 claims and 210 deep level claims on the farm Langlaagte, four miles west of Johannesburg, Transvaal, also three pieces of ground equal to 30 claims held under lease for erecting plant or buildings and six water rights. The deep level claims were acquired in November, 1903, from the Johannesburg Consolidated Investment Co., Ltd., for 114,213 fully-paid shares. Owing to the intrusion of the Ferreira Crown Reef dyke, which has caused an upthrow of the reef, two new shafts are being sunk on the southern portion of the property to work the deep levels, and when sufficient development work has been done, a 200-stamp mill and tube mills are to be erected.

The present mill consists of 140 stamps, also cyanide works. A new slimes plant with a monthly capacity of 15,500 tons commenced work February, 1910. Crushing by the present company commenced March 24th, 1905. During 1909 293,440 tons yielded £490,598; profit £135,717; costs 18s. per ton; During 1910 275,423 tons yielded £364,931; estimated profit £86,197. For crushings *see table at commencement of volume*. Estimated Ore reserves at December 31st, 1908, 504,540 tons value 8·6dwts. per ton; at December, 1909, 520,747, value 7·4dwts. per ton.

Estimated life of mine with 140 stamps at work 33 years from January 1st, 1911; with 200 stamps at work about 24 years.

The authorised capital is £950,000, in 950,000 shares of £1 each; 732,679 shares are issued and fully paid. The capital formerly £1,000,000 in £1 shares (890,000 issued), was reduced to £593,334 in November, 1908, by cancelling 110,000 unissued shares and offering shareholders two new for every three old shares held; it was then increased to present amount, 114,213 shares being issued, credited as fully paid to the Johannesburg Consolidated Investment Co., Ltd., for 210 claims and shareholders having the right to take up one share at par for every four shares held; the Johannesburg Consolidated Investment Co., Ltd., agreed to advance a sum not exceeding £250,000 until November, 1913, and in consideration for so doing, received an option at par until that date over the unissued shares.

There are £100,000 six per cent. debentures in bonds of £25 each (part of £250,000) offered to shareholders at par in December, 1904, the issue being guaranteed by Barnato Brothers; debentures are redeemable at 103 by annual drawings commencing January 1st, 1910, or at the company's option at 105 by six months' notice any time after January 1st, 1907; £125,000 were paid off January 1st, 1910, and £25,000 in January, 1911.

CONSOLIDATED LANGLAAGTE—continued.

The accounts for year ended December 31st, 1908, submitted in Johannesburg March 31st, 1909, showed gold receipts £401,054 and a profit of £128,271, making with balance forwand and sundry revenue a sum of £149,956; debenture interest, tax, etc., absorbed £27,701, leaving £122,255 carried forward.

The accounts to December 31st, 1909, submitted in Johannesburg March 30th, 1910, showed gold receipts £400,958 and a profit of £135,716, making with balance forward and sundry revenue a sum of £263,611; debenture interest, tax, etc., absorbed £27,248, depreciation £10,042, leaving £226,321 carried forward; cash asse'ts £151,865; investments (shares in Victoria and Transvaal Power Co., Ltd.) £45,926.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. per 100 shares or part of 100. The 3rd March, 1909, was appointed settling day in shares Nos. 1 to 593,334 and 707,548 to 732,679; and March 23rd, 1905, in £250,000 debentures. This company was registered in the Transvaal July 9th, 1896, to acquire the properties of the Main Reef Gold Mining Co., Ltd, formed in the Transvaal in 1888 (*see vol. for* 1899), and the Consolidated Angle-Tharsis Gold Mining Co., Ltd., formed in the Transvaal in January, 1893 (*see vol. for* 1899), also various adjoining claims. The company took over 751½ main reef claims and an estate of 7·66 square miles (including the Maraisburg township), situate on the farm Paardekraal No. 42, about six miles west of Johannesburg, Transvaal; the company has since acquired the freehold of the farm. In May, 1899, two subsidiary companies, Main Reef Deep, Ltd., and Main Reef East, Ltd., were formed but in June, 1909, these companies were absorbed (*see below*). The company in 1905 acquired from the liquidators of the Rand Central Ore Reduction Co., Ltd., 18 claims, 66 bewaarplaatsen, 2 machine stands and a water right, for the nominal sum of £5. In June, 1909, the undertaking of Main Reef East, Ltd., and Main Reef Deep, Ltd., owning 240·7 and 245·6 claims respectively were acquired for 334,757 fully paid shares, also 214 claims lying to the south for 64,200 fully paid shares. The total area now held is 800 claims in a compact block, Three shafts are sunk, the Western, Eastern (or Main), and Central, and at June 30th, 1910, the depth of the Western shaft was 3,295 feet and the Eastern 2,767 feet.

Crushing by the present company was commenced in January, 1898, with 20 stamps, and in April 1898, 40 stamps were working; the mill power is now 120 stamps and three tube mills, also cyanide plant. Crushing was suspended before the war and resumed in May. 1904. During 1908-9, 197,083 tons yielded £297,186 or 30s. 1d. per ton; cost 20s. 11d.; profit 9s. 2d. per ton. During 1909-10, 235,391 tons yielded £310,389 or 26s. 4d. per ton, cost 20s. 2d.; profit 6s. 2d. per ton. For crushings *see table at commencement of volume.* Ore reserves at June 30th, 1910, 414,150 tons, value 6·3 dwts. per ton at September 30th, 1910, 424,470 tons.

Extract from General Manager's report for 1909-10.—Reviewing the development for the year, the disappointing results obtained in the Eastern Section have been more than counterbalanced by the improvement which has taken place in depth in the Western Section; further, it seems unlikely that the poor zone in the Eastern Section will extend indefinitely downwards; considering also the fact that present indications favour the encountering of payable ore in depth in the Central Section, I am of opinion that the prospects are decidedly better than they were at this time last year.

The authorised capital is £950,000, in 950,000 fully paid shares; 924,364 shares are issued and fully paid. The capital, formerly £800,000 in £1 shares (788,054

issued) was reduced to £525,370 in June, 1909, by issuing two for every three shares held; it was then increased to present amount, 334,757 shares being issued to acquire the undertakings of Main Reef East, Ltd., and Main Reef Deep, Ltd., and 64,237 shares to acquire additional claims.

Dividends declared (paid about seven weeks after declaration): 1906-7, 1s.; 1907-8, 1s. 6d.; 1908-9, 1s.: 1909-10, 1s. 6d. declared June 14th, 1910; 1910-11, 1s. December 14th, 1910 (interim).

The accounts for year ended June 30th, 1909, submitted in Johannesburg September 1st, 1909, showed gold receipts £297,187 and a profit of £90,472 making with forward and sundry revenue a sum of £158,905; dividend absorbed £39,403, capital expenditure £11,806, taxes, directors' remuneration, &c., £8,271, leaving £99,214 carried forward, which was transferred to capital expenditure account: £120,326 share premium account was written off property, &c.

The accounts to June 30th, 1910, submitted in Johannesburg September 7th, 1910, showed gold receipts £310,389, and a profit of £72,575, making with sundry revenue a sum of £89,649; dividend absorbed £69,327, capital expenditure £3,000, taxes, directors' remuneration, &c. £4,792, leaving £9,530 carried forward; cash assets for development and plant £307,878.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. per 100 shares or part thereof. THIS company was registered June 25th, 1897, to take over the undertakings of the African Metals Co., Ltd., registered July 12th, 1895 (*see vol. for* 1899), and the Mines Selection Co., Ltd., registered May 21st, 1895 (*see vol. for* 1899). The company took over some Witwatersrand deep level claims, farms, &c., in the Transvaal, and shares in South African, Australasian, American, and British Columbian companies. The company floated (privately) the Anglo-Klondyke Mining Co., Ltd., Viloro Synd., Ltd., Karabournon Mercury, and Koniah Mercury Syndicates, Ltd. In October, 1905, the company acquired the Johannesburg interests of Messrs. A. Dunkelsbuhler & Co., for 400,000 fully-paid shares. A large interest in Brakpan Mines, Ltd., is held. During 1910, the West African Mines Selection Synd., Ltd., was formed to acquire interests in West Africa.

The authorised capital is £1,200,000, in shares of £1 each; 1,105,000 shares are issued and fully paid, 210,942 in exchange for shares of the old companies. The capital, formerly £300,000, was increased to £600,000 in March, 1903, when 200,000 shares were issued at 22s. 6d. each, 150,000 being offered to shareholders, and 50,000 allotted at same price to the Bank für Handel und Industrie, Berlin, as sole consideration for guaranteeing the entire issue; the remaining 100,000 were issued in February, 1905, at 30s. In October, 1905, the capital was increased to present amount, 400,000 shares being issued to Messrs. Dunkelsbuhler & Co., and 200,000 held in reserve for conversion of debentures.

In November, 1905, £400,000 five per cent. first mortgage debentures to bearer of £20 and £100 each were offered to shareholders at par, the issue being guaranteed by the Bank für Handel und Industrie at a commission of 2½ per cent.; debentures may be redeemed before December 31st, 1913, at 5 per cent. premium, or after that date by 15 annual drawings; the company may at any time purchase debentures in the market at 105 or less per cent.; present amount issued £258,120.

THIS company was registered in the Transvaal March 31st, 1892, as the Rand Deep Level Gold Mining Co., Ltd. In June, 1894, the name was changed to Crown Deep, Ltd., and in June, 1909, to present title on the acquisition of the various interests hereinafter mentioned. The company originally owned 185·7 main reef deep level claims on the farms Langlaagte and Turffontein, Witwatersrand, Transvaal. The vendors received 200,000 fully-paid £1 shares. In 1898, 15·93 claims were sold to the Robinson Central Deep, Ltd., for 107,538 shares in that company, and the right to subscribe for a further 35,846 shares at £2, which right was exercised.

In April, 1909, it was resolved to change the name of the company, increase the capital, and to acquire the following interests as from June 30th, 1909:—

In September, 1909, the whole of the property and assets of Paarl Ophir Gold Mining and Milling Co., Ltd., were acquired for 17,200 fully paid shares. During May, 1910, the Booysen Reserve Township was acquired for £17,438.

The property now owned comprises a compact block of 2,216·59 mining claims (of which 1,979·2 were unworked, as at June 30th, 1909), freehold rights over 3,630 morgen, the townships of Ophirton and Booysen Reserve and 19 Water Rights situate on farms Langlaagte No. 129, Turffontein No. 137, Mooifontein No. 130, Vierfontein No. 131, and Ormonde No. 134, Witwatersrand Goldfields, Transvaal. A dyke extends through the property in an easterly direction, 701 claims being situated to the north, and 1,278 claims to the south.

CROWN MINES—continued.

Operations are confined to the northern portion, the ore contents of which, based on an average of a little over 51,000 tons per claim, were estimated in January, 1909, at about 36 million tons, equal to a life of 16½ years. The exploitation of the southern area is to be considered when the workings in the northern portion approach the lower ground. Eleven shafts have been sunk.

The life of the entire property is expected to exceed 50 years, from January, 1911. Crushing commenced in August, 1897, and to June 30th, 1909, 200 stamps and four tube mills also cyanide and slimes plant were at work. The reduction plant (not including two obsolete plants of 60 and 140 stamps respectively) now consists of 675 stamps, 15 tube mills, also cyanide plant, with a capacity of 1,884,000 tons yearly. A new 160-stamp mill is being erected near the South Rand shaft, also additional tube mills and requisite cyanide plant which will bring the crushing capacity to 2,424,000 tons yearly. Estimated ore reserves at June 30th, 1909, 4,482,487 tons, value 7·9 dwts. per ton; at December 31st, 1909, 3,916,593 tons, value 7·7 dwts. also 817,103 tons, value 3·2 dwts. During 1909, 984,939 tons yielded gold value £1,647,845; working profit £846,413, or 17s. 2d. per ton. During 1910, 1,514,000 tons yielded gold value £2,554,507; estimated profit £1,200,125. For particulars of crushing returns *see table at commencement of volume.*

The authorised capital is £1,000,000, in 2,000,000 shares of 10s. each; 1,880,212 shares (£940,106) are issued and fully paid. The capital, originally £250,000 in £1 shares, was increased to £300,000 in 1895, the 50,000 new shares being offered to shareholders at £11 each in June, 1897. In July, 1909, the capital was sub-divided into shares of 10s. each, shareholders receiving two shares for every old £1 share held; it was then increased to £1,000,000 by creation of 1,400,000 shares, of which 1,263,012 were issued credited as fully paid on the acquisition of the various interests before-mentioned.

THIS company was registered in Cape Colony March 13th, 1888, with a nominal capital of £100,000, with the object of consolidating the diamond mining interests in the De Beers and Kimberley Mines, Griqualand West, Cape Colony.

In April, 1888, the company took over the whole of the property and undertaking of the De Beers Mining Co., Ltd., formed in 1880, shareholders in the latter company receiving two fully paid-up £5 shares in this company for every £10 fully paid-up share held. Debentures were exchanged for bonds of this company.

In October, 1888, an amalgamation was effected with the Kimberley Central Diamond Mining Co., Ltd., formed in 1880, shareholders in the latter company receiving twenty-two £5 fully paid-up shares in this company and £2 11s. in cash (including 3s. brokerage) per share for every ten £10 fully paid-up shares held. Debentures were exchanged for bonds of this company.

In August, 1889, the company took over in perpetuity the lease of the Griqualand West Diamond Mining Co.'s property, consisting of 519 claims in the Dutoitspan Diamond Mine, the terms of the agreement being the payment of an annual sum equal to 4 per cent. on the capital of that company, together with the responsibility of, and the interest on, the debenture debt of £158,000 (since paid off).

In September, 1889, the lease of the Consolidated Co., Bultfontein Mine, Ltd., was also taken over in perpetuity, the property comprising 291 claims in the Bultfontein Mine; the conditions of the agreement were the payment of an annual sum equal to 7½ per cent. on the capital of that company.

In September, 1889, the company purchased from the South African Co., Ltd. (of Kimberley), the whole of that company's property, except money invested, book debts, and diamonds and cash in hand on the 30th June, 1889. The purchase money was £125,000 in cash.

In November, 1889, the property of the Bultfontein Mining Co., Ltd., was purchased for £745,454, payable by the issue of De Beers Bultfontein Obligations.

In December, 1891, the company purchased the Wesselton Estate, including the Wesselton Diamond Mine, for £300,000.

Other companies whose properties have been acquired:—The Anglo-African Diamond Mining Co. (for £677,500 in De Beers debentures); the Compagnie Générale (including their

interest in the Canvieras Mines in the Brazils); the Sultan Diamond Mining Co.; the United Diamond Mining Co.; the Spes Bona Bultfontein Diamond Mining Co. (for 60,000 fully-paid £1 shares in the Consolidated Co., Bultfontein, and discharge of debenture debt of £8,500); the South African Diamond Mining Co. (Pullinger); the New Gordon Diamond Co., Ltd.; British United Diamond Mining Co.

In June, 1899, the company purchased the properties of the London and South African Exploration Co., Ltd., and Kimberley Diamond Co., Ltd., for £1,600,000 and £100,000 respectively (besides £25,000 for compensation of staff, &c.), payable in cash or debentures at par as below; the properties comprised three farms, Bultfontein 14,434 acres, Alexandersfontein 12,556 acres, and Dorstfontein 6,578 acres, total 33,568 acres, with diamond mines and townships thereon; the De Beers Co. had been paying £45,000 per annum claim licences to the L. and S. A. Exploration Co., a number of its claims being on that company's property; by the purchase of the Kimberley Co.'s property, the De Beers Co. acquired extensive sites required for depositing floors and other surface works.

In 1900 the company purchased the property of the New Bultfontein Mining Co., Ltd.; £151,562 10s. cash was paid to that company, £5,000 to Bultfontein Synd., Ltd., and the liability of £41,300 New Bultfontein debs. (since paid off) was taken over, making total cost £197,862 10s.

In November, 1906, it was announced that the original surface area of De Beers Mine was 662 claims and of Kimberley Mine 470, a total for two mines of 1,092 claims. The surface areas of Wesselton, Bultfontein, and Dutoitspan were respectively 1,162, 1,753 and 1,777 claims, a total area of 4,692 claims, or about 4½ times as large as Kimberley and De Beers combined.

The company holds the pre-emptive right to any diamond mines discovered in the territories of the South-West Africa Co., Ltd.

The company has established an explosives factory at Somerset West, Cape colony, and now obtains its supply of dynamite therefrom; various mining groups in the Transvaal are also supplied.

The authorised capital is £4,500,000, in 800,000 preference and 1,000,000 deferred shares of £2 10s. each; all the shares are issued and fully paid. The preference are entitled to a cumulative dividend of 40 per cent. per annum, the deferred taking all the remaining available profits; preference shares have no voting rights, except at a meeting to reduce capital or to wind up or sell the undertaking, but they have priority as to capital to the extent of £20 per share.

The capital, formerly £3,950,000 in fully-paid £5 shares, was increased and altered to its present amount and form in December, 1901; for each old £5 share holders received one fully-paid preference and one fully-paid deferred share of £2 10s. each; 50,000 fully-paid deferred shares were distributed as bonus (as below); and 160,000 fully-paid deferred shares were issued to extinguish rights of life-governors to proportion of profits, the certificate for these 160,000 shares being marked "non-transferable prior to June 30th, 1906."

All outstanding first mortgage debentures were paid off January 2nd, 1911.

There are £1,662,495 De Beers South African Exploration debentures outstanding part of £1,750,000 created in 1899 in order to purchase the London and South African Exploration and Kimberly Diamond Companies' properties; £1,183,260 were taken at par by shareholders of those companies, and the balance, £566,740, was offered for public subscription in June, 1900, at par; they are in bearer bonds of £5, £10, £50, £100, and £500, secured by first mortgage on all the immovable property purchased from the two companies, and also as a direct obligation of the De Beers Co. for capital and interest; they bear 4½ per cent. per annum interest, payable on January 1st and July 1st, and are redeemable at par on January 1st, 1930, the company having the right to redeem earlier, at 105 per cent, at any time on giving six months' notice.

The dividends paid by the old De Beers company were as follows:—1881, 5 per cent.; 1882, 3 per cent.; 1883, 5⅞ per cent.; 1884, 7 per cent.; 1885, 7½ per cent.; 1886, 12 per cent.; 1887, 16 per cent.; and 1888, 25 per cent. The Kimberley Central Co. paid dividends amounting to 34½ per cent. in 1887; 9 per cent. in April, 1888; and 5 per cent. in January, 1889.

THIS company was registered February 12th, 1902, to acquire prospecting rights and Government concessions in British East Africa and Uganda, and has taken up a mineral grant of 89 square miles, covering a soda deposit known as Lake Magadi, south-west of Nairobi, about 50 miles from the Uganda Railway; also a lease of 46 acres at Nairobi. Prospecting for gold has proved unsuccessful. A lease of 320,000 acres of land at Naivasha has been acquired from the Government, with option of purchase for £50,000 at any time before July, 1920, and farming operations are in progress. An option until June, 1911, has been granted to Messrs. M. Samuel & Co., over the Lake Magadi soda deposit which covers an area of 30 square miles.

The authorised capital is £150,000, in 149,800 ordinary shares of £1 each and 4,000 deferred shares of 1s. each; 75,657 ordinary and all the deferred are issued and fully paid. The ordinary shares are first entitled to an aggregate dividend of 100 per cent., after which profits are to be divided, 50 per cent. to ordinary, 40 per cent. to deferred, and 10 per cent. to directors. The capital, formerly £50,000, was increased to present amount in June, 1905, by creation of 100,000 new ordinary shares, 45,807 of which were offered to shareholders at 30s. each, being one for each ordinary share already issued, 13,900 shares were underwritten for a commission of 1s. per share. In January, 1910, 21,019 shares were offered to shareholders for subscriptions at par, at the rate of one for every three shares held; subscribers have the option to December 31st, 1911, to take up one ordinary share at par in respect of every two shares subscribed; 10,000 shares were underwritten, the underwriters having a call to December 31st, 1911. over 5,000 shares at par. There are £9,500 (part of £10,000 five per cent. debentures). It is proposed to create £30,000 six per cent. debentures, and out of the proceeds pay off the existing debentures.

The accounts to September 30th, 1910, submitted December 29th, 1910, showed sundry expenditure £35,115; cash £8,852, debtors £88; creditors £2,167; share premium account £6,280.

THIS company was registered January 18th, 1905, to acquire the undertakings of the Geelong, Eagle-Vulture, Jessie, and West Nicholson companies (*see vol. for* 1907). The property comprises 284 mining claims (gold, silver and copper) and machinery site of 10 acres, situate in the Gwanda district, Matabeleland, Rhodesia. The principal properties are the West Nicholson, Jessie, Valley, Eagle-Vulture, Geelong, and Olympus; work is concentrated on the first three, the remaining three being worked on tribute. 110 stamps are erected, also cyanide and concentrating plant, and during 1906-7 a Chilian mill, blast furnace and reverberatory furnace were added. Crushing (60 stamps and Chilian mill) and smelting operations are in progress. During 1909, 91,400 tons were milled, producing bullion and matte value £94,323, costs 21s. 10d. per ton. Ore reserves at December, 1909, 88,684 tons also 220,000 tons mixed sands and slimes value 2·5 dwts. per ton. For details of monthly crushings for 1910. *see table at commencement of volume.*

The authorised capital is £600,000, in 600,000 shares of £1 each; 459,605 shares are issued and fully paid. There are £124,500 six per cent. debentures of £50 and £100 each, interest payable January 1st and July 1st, and redeemable at 105 per cent. on December 31st, 1914, or earlier at company's option on six months' notice; holders may exchange into fully paid shares at par on any March 31st, June 30th, September 30th, or December 31st, on giving three months' notice. There are £20,000 prior lien bonds offered to shareholders in this and the Matabele Reefs and Estates Co., Ltd., in October, 1910, at par, bearing interest at seven and half per cent. per annum and redeemable at 105 per cent. out of the balance of revenue available. For every £10 subscribed, subscribers received a bonus of ten fully-paid shares, such bonus being provided by Matabele Reefs and Estates Co., Ltd.

The shares were issued credited as 14s. paid, two for every five Geelong or Eagle-Vulture shares, three for every five Jessie, and three for every ten West Nicholson; of the liability of 6s., the final call of 1s. was made payable November 30th, 1905.

Dividend paid by former company: 1s.6d. per Geelong share on April 25th, 1899.

The accounts for year to December 31st, 1908, submitted May 25th, 1909, showed receipts £109,869, and a loss of £15,588, and adding £10,390 being over-valuation of tailings now written off, increased debit balance to £86,831. The accounts to December 31st, 1909, submitted August 23rd, 1910, showed receipts £97,027 and a loss of £34,884, increasing debit balance to £121,715; cash £4,307, debtors £2,385, bullion and matte £11,510; creditors £49,888.

THIS company was registered in the Transvaal June 25th, 1902, and owns 424 coal and gold claims, comprising the whole of the farm Schapenrust, situate five miles from Springs Railway Station, and adjoining the southern boundary of the farm Brakpan, East Rand district, Transvaal. The property formerly belonged to the Central Collieries, Ltd., and its shareholders received share for share, absorbing 71,600 fully-paid shares. The colliery is at a standstill. Operations are at present suspended. Owing to the area being too small to work as a separate company it is proposed to include the property in the lease which the Government intend offering of their area (1,811 claims) on Brakpan, making a total area of 2,235 claims.

The authorised capital is £175,000, in 175,000 shares of £1 each; 151,340 shares are issued and fully paid. In June, 1904, the guarantors of the first £60,000 working capital agreed to relinquish an option held by them on the reserve shares, and 19,740 were then offered to shareholders at par, the guarantors of the issue receiving an option on the remaining 23,660 for two years at 22s. 6d.

The accounts for year to December 31st, 1909, submitted in Johannesburg May 26th, 1910, showed a loss of £785, reducing credit balance to £8,140 which was carried forward; cash £60,881, debtors 13,434; creditors 77.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. per 500 shares or part, each deed reckoned separately; when more than one certificate is required for each transfer, 1s. fee is payable for each additional share certificate. THIS company was registered in the Transvaal October 28th, 1895, to acquire a large block of claims in the East Rand district, Witwatersrand; 250,000 fully-paid shares were allotted to the vendors as consideration for transfer of claims and for providing £100,000 working capital. In 1896 the company sold 119 claims to the East Rand Proprietary Mines, Ltd., for 18,500 fully-paid shares. The company has also sold other portions to various parties, including the Hercules Deep, Ltd., Leeuwpoort Deep Gold Mining Co., Ltd., Eastern Gold Mines, Ltd. (in August 1906), and Leeuwpoort Extension Gold Mining Co., Ltd. Properties now owned: 3 claims on farm Benoni; 229 claims on farm Leeuwpoort; interest in 189 claims in Barberton district; the Boschbank freehold coal farm, Heilbron district, Orange River Colony (purchased in 1897 for £10 026); the Brakfontein farm, in the Vryheid district Natal; the Belgravia Buildings, in Johannesburg (purchased in 1896), 40 per cent. of the issued capital of the Eastern Gold Mines, Ltd., and various other interests and shares. The company has a colliery opened up on the Boschbank property, which is to be floated separately. Two shafts have been sunk on farm Leeuwpoort, No. 1 at the eastern end and No. 2 in the centre; the reef was struck in No. 1 shaft at 1,596 feet. Development work is in progress, and to December 31st, 1909, 141,471 tons opened up were valued at 6.4 dwts, and 113,100 tons value 2 dwts. per ton; at March 31st, 1910, the tonnage was increased to 185,536 tons value 6·4 dwts. and 129,254 tons value 2 dwts. Sinking with No. 2 shaft is now proceeding and as soon as the two shafts have been connected a reduction plant is to be ordered.

The authorised capital is £293,000, in 293,000 shares of £1 each; all the shares are issued and fully paid. 50,000 shares are under option at par until June 30th, 1911. The capital, originally £300,000, was reduced in June, 1907, to £146,500 by cancelling 7,000 shares held in reserve and 146,500 issued shares, by offering shareholders one new share for every two held. The directors have power to increase the capital to £500,000, and in June, 1907, shareholders were invited to subscribe for 146,500 shares at par *pro rata*; no allotment, however, took place. In April, 1909, 116,250 shares were taken up at par by Lewis and Marks. There are £17,250 five per cent. debentures, issued in 1903, redeemable at par within 10 years by half-yearly drawings which commenced January 1st, 1909.

The accounts to December 31st, 1908, submitted in Johannesburg March 19th, 1909, showed £14,084 to debit of profit and loss account.

The accounts to March 31st, 1910, submitted in Johannesburg, June 16th, 1910, showed £24,888 to debit of profit and loss account; cash £2,415, investments £117,129, loans £872, debtors £1,104; loans £52,800, creditors £2,973, liability on Hercules Deep shares £68,355.

EAST RAND GOLD, COAL—continued.

THIS company was registered in the Transvaal June 11th, 1895, to acquire the freehold farm Vischkuil, No. 188, 7,007 acres, Heidelberg district, East Rand, Transvaal. The vendors and promoters received 90,000 fully-paid shares. A colliery has been opened up and boreholes have been sunk to search for the main reef series. During 1908-9, the colliery was closed down but was re-opened August, 1909, the output to June 30th, 1910, being 49,881 tons.

The authorised capital is £50,000, in 400,000 shares of 2s. 6d. each; 393,184 shares are issued and fully paid. The capital, originally £160,000, in £1 shares, was increased to £250,000 in September, 1902, when 40,000 shares were offered to shareholders at par. In March, 1909, the capital was reduced to £25,000 by cancelling 50,000 unissued shares and issuing one new share of 2s. 6d. for every fully paid £1 share held; it was then increased to £41,250 by creation of 130,000 new shares of 2s. 6d. each; 100,000 shares were then offered to shareholders at par *pro rata*, being one for every two held, the issue being guaranteed, the guarantors having an option for two years over a further 100,000 at par (options exercised over 90,000). The capital was increased to present amount in September, 1909.

A dividend of 10 per cent. was declared December 8th, 1910.

The accounts for year ended June 30th, 1910, submitted in Johannesburg September 22nd, 1910, showed a profit of £3,671, increasing credit balance to £3,979, which was carried forward; cash £24,842.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. per 100 shares or part thereof. The 17th November, 1909, was appointed settling day in shares Nos. 1 to 366,288.

THIS company was registered in the Transvaal May 6th, 1893, to take over the assets of the H. F. Synd., Ltd., including various claims on the farms Driefontein, Vogelfontein, and Leeuwpoort, Eastern Witwatersrand, Transvaal, besides an interest in the New Blue Sky, New Comet, Cinderella, Agnes Munro, Driefontein, and St. Angelo Gold Mining companies, and the Ramsay Synd.

The H. F. Synd. received as purchase consideration 420,000 shares and the right to 25 per cent. of the net profits (or distribution of assets) after repayment of £650,000 capital to shareholders in dividends or bonuses, this was subsequently increased to £920,000; this right was afterwards acquired by the H. F.

* Deferred for dividend until after December 31st, 1909.

During 1909 three mynpachten, equal to 612 claims, were acquired for 26,000 fully-paid shares, such shares to rank for dividend as from January 1st, 1911, and 80 claims were sold to the New Boksburg Gold Mines, Ltd., for 40,000 fully-paid shares and 10⅝ claims to G. and L. Albu for £2,665 cash.

The property now comprises 4,312 claims of which 3,417 are reef-bearing; at December, 1909, 220 claims had been exhausted. The reduction plant consists of 820 stamps, 24 tube mills and cyanide and slimes plant, having a capacity of 200,000 tons monthly. During 1909, 1,832,280 tons yielded 2,671,750 or 29s. 2·3d. per ton; cost 15s. 5·2d. per ton; profit 13s. 9 1d. per ton. During 1910, 2,126,334 tons yielded £2,938,831; estimated profit £1,249,038. Ore reserves at December, 1908, 8,490,636 tons, including 6,584,768 tons value 7·2dwts.; at December, 1909, 11,371,761 tons value 5 7dwts., of which 8,778,118 tons have a value of 6·7dwts. For crushings *see table at commencement of volume.*

The authorised capital is £2,500,000, in 2,500,000 shares of £1 each; 2,431,897 shares are issued and fully paid (Nos. 2,405,898 to 2,431,897 were deferred for dividends until after Jan, 1st, 1911.) The capital was originally £650,000; the vendors received 420,000 shares, and 140,000 were disposed of at par in London and 10,000 in Johannesburg; the remaining 80,000 were sold in 1894, 40,000 at 21s. 6d. and 40,000 at 23s. The capital was increased to £750,000 in 1895 and to £870,000 in 1898; £500,000 debentures were issued in March, 1898, but £496,761 were converted into shares and the remaining £3,239 paid off in 1901 (less £48). In May, 1902, the capital was increased to £1,000,000; of the 150,000 new shares, 120,000 were offered to East Rand and H. F. shareholders at £8 each, the guarantors of the issue receiving (as consideration for the guarantee and a temporary loan of £400,000 at 6 per cent.) a commission of 4 per cent. on the issue and an option on 30,000 reserve shares at £10 each for one year; the H. F. Co., in consideration of the right to subscribe for 25 per cent. of the issue of 120,000 shares, agreed to increase the priority sum to be repaid to East Rand shareholders to £920,000 as above. The capital was increased from £1,000,000 to present amount in July, 1908, to carry through the scheme of amalgamation as set out above, such new shares to rank *pari passu* with old shares after June 30th, 1908, with the exception of 160,000 shares (Nos. 2,245,898 to 2,405,897) issued to Hercules Co., which were deferred until January 1st, 1910.

An issue of £1,500,000 five per cent. debentures is proposed, the debentures to be a first mortgage over the property and assets and to be in bonds of £100, £50 and £20 each and to be offered to shareholders for subscription at £98 per cent. in the proportion of £8 debenture for every 13 shares held, holders of two shares or over being entitled to an allotment; amounts subscribed for below £20 to receive fractional debenture certificates, holders of which (aggregating £6 or over) will have the right to convert into fully paid shares as hereinafter stated. The issue is to be guaranteed the

THIS company was registered February 26th, 1910, to acquire the Falcon Gold Mining property, comprising 100 claims, situate 60 miles west of Gwelo, in the Blinkwater district, Rhodesia. The consideration was £150,000, payable £15,000 in cash and £135,000 in fully-paid shares. The property was acquired from the Falcon (Rhodesia) Development Co., Ltd., by Rhodesia Consolidated, Ltd. A large amount of development work had been done by the former owners, and at the time of acquisition the ore reserves were estimated at 220,000 tons, value 6·9 dwts. gold and 2 per cent. copper. Development work is in progress. It is proposed to erect a plant with a capacity of 500 tons daily. The Athens Mine has since been acquired, and 65,000 shares credited as fully paid up are to be allotted in consideration of this purchase. (*See map facing.*)

The authorised capital is £400,000, in 400,000 shares of £1 each; 310,785 shares are issued, 160,785 being fully-paid and 150,000 having 2s. paid.

The statutory report was submitted March 30th, 1910.

Transfer form, common; fee 2s. 6d. The 30th July, 1910, was appointed settling day in shares Nos. 1 to 50,000. Latest price, $1\frac{5}{16}$, 2.

Additional particulars officially supplied:— As regards the future of the Falcon Mines, with the acquisition of the Athens, the proposition bids fair to become the largest in Rhodesia, and likely to rank high among the mining propositions of South Africa. On the Falcon, the payable chute appears to be continuous for nearly 1,500 feet, the values both in copper and gold naturally varying greatly, but the most important feature is the steady increase in value as depth is attained. The average value of ore at the second level was some 34s. per ton; at the third level this had increased to 55s.; on the fourth level the mean of the widths and values at the points so far opened are not less than 64s. per ton over a width of 20 feet, and in no case on the fourth level has the full width of the ore body yet been determined. When the property was acquired the average value of the third level was 55s. per ton, but the level, 500 feet east of the main shaft, is now in ore worth 68s. per ton. When the fifth level is complete on the Falcon from east to west, and assuming the ore body to retain its average width, there will be developed well over 1,000,000 tons of ore, or, say, sufficient ore to supply a mill of a capacity of 500 tons per diem for six years. This estimate applies only to the Falcon section of the mine, and in view of the lateral extent and width of the ore bodies on the Athens section, a similar amount of work on that to that expected to be completed on the Falcon section would

FALCON MINES—continued.

more than double the tonnage. The Athens, which is a continuation of the Falcon reef to the east of the Falcon boundary, has been opened by a shallow adit, and the lode proved for a distance of 1,600 feet. Two ore bodies have been exposed—one known as the south reef, which apparently coincides with the Falcon, and has an average width of 20 feet, with an average value at the adit level of 6dwts. Immediately to the north of this lode, and only separated from it by a "horse"—varying in width from 2 to 30 feet—is a large ore body about 80 feet in width. A large number of crosscuts through this great body of ore will be necessary before exact data can be obtained as to its value, but Mr. van Wagenen (the consulting engineer of the company which originally owned the mine) estimated it to be worth 3·75dwts. per ton, which could be increased to 4·5dwts. per ton by sorting out 25 per cent. of the poorest ore.

development prior to flotation. The freehold rights of the claims have been purchased for £25,000.

Crushing commenced in May, 1899, with 50 stamps, afterwards increased to 120 stamps and cyanide and slimes works. Two tube mills started in 1906; an additional 40 stamps and two tube mills early in 1908, 160 stamps and 4 tube mills are now in operation with a capacity of 36,000 tons monthly. After the war, crushing was resumed in March, 1902. Arrangements have been made with Rand Mines Power Supply Co., Ltd., for the supply of electrical power and compressed air, the steam plant to be retained in case of emergency. During 1908-9, 418,057 tons yielded £948,577; net profit £616,814, or 29s. 6d. per ton. During 1909-10, 364,147 tons yielded a net profit of £537,174 or 29s. 6d. per ton. For monthly crushings *see tables at commencement of volume.* Ore reserves at September 30th, 1908, 1,506,197 tons, value 10·2dwts.; at September 30th, 1910, 1,779,328 tons, value 9·6dwts.

Estimated life, treating 510,000 tons yearly:—about 11 years from December 1910.

The authorised capital is £910,000, in 910,000 shares of £1 each; all the shares are issued and fully paid, 780,000 being vendors', 120,000 subscribed at £4 each by the Rand Exploring Syndicate, Ltd., and 10,000 created and issued to replace working capital expended on purchase of four odd claims.

Dividends declared (paid about seven weeks after declaration): 1902-3, 10 per cent.; 1903-4, 25 per cent.; 1904-5, 30 per cent.; 1905-6, 35 per cent.; 1906-7, 35 per cent.; 1907-8, 40 per cent. 1908-9, 52½ per cent.; 1909-10, 55 per cent. (27½ per cent. March 16th, 1910, and 27½ per cent. September 19th, 1910).

THIS company was registered in the Transvaal January 8th, 1888, to work nine claims on the farm Turffontein No. 137, Witwatersrand. Four claims adjoining were acquired in April, 1888, and seven claims and water-rights in March, 1889, also three South Ferreira claims were acquired for £25,000, and the property of the Wemmer, Ferreira, and Worcester Deep Level Co., consisting of 31 claims on the dip of the Wemmer, Ferreira, and Worcester properties, was purchased in August,

FERREIRA GOLD—continued

1894, for 44,000 Ferreira shares. Six claims were then sold to the Rand Mines, Ltd., for one deep level claim and £3,000 cash. In August, 1903, the adjoining property (10 claims, 10 bewaarplaatsen, 40-stamp mill, interest in joint Robinson-Ferreira dam and water-right, &c.) belonging to the Worcester Exploration and Gold Mining Co., Ltd., was acquired for £90,000. In November, 1905, the company purchased the freehold of the claims on farm Turffontein for £81,141, conveying also freeholders' interest in bewaarplaatsen on farms Turffontein and Doornfontein, and in 1907 acquired the freehold of a piece of land on the Eastern boundary fronting Simmond's Street.

Property now held: 65·8 claims, also two mining stands and freehold of 44 morgen; 38 bewaarplaatsen and 96 machine stands hitherto included in the property are now omitted, as it has been decided that the mineral rights under bewaarplaatsen, etc., are vested in the Government to be disposed of at their discretion. The company's interest is therefore confined to its 19·37 per cent. of the net proceeds which may accrue to the Central Rand Freehold Proprietary, Ltd., from the sale or disposal of the mining rights under certain bewaarplaatsen, water rights, etc., situate on the farms Doornfontein No. 24 and Turffontein No. 21, in which they, as freehold owners, may be proved to have a legal interest or right.

Crushing was commenced in 1890 with 40 stamps, 40 were added in 1895, and a 40-stamp mill was taken over with the Worcester property in 1903, making 120 stamps, with cyanide and slimes plant, also three tube mills. During 1908, 290,770 tons crushed yielded gold value £719,446; working profit £448,849 or 30s. 10·4d. per ton. During 1909 339,150 tons yielded gold value £685,844; working profit £423,207 or 24s. 11d. per ton. During 1910, 346,150 tons yielded £564,375; estimated profit £307,531. For crushings *see tables at commencement of volume*. Ore reserves at December, 1908, 1,317,565 tons, value 9·3dwts. per ton; at December, 1909, 937,619 tons, value 8·6dwts. per ton.

Estimated life, treating nearly 350,000 tons yearly:—about 3 years from December, 1910. The average monthly profit for 1911 should not be less than £15,000.

The authorised capital is £95,000, in 95,000 shares of £1 each; all the shares are issued and fully paid. The capital was increased from £12,000 to £28,000 in 1888; to £33,000 in 1889; to £45,000 in 1890; to £90,000 in 1894. In 1895, 1,000 reserve shares were sold for £15,000. In October, 1903, the capital was increased to present amount, the 5,000 new shares being offered to shareholders at £20, guaranteed at £19.

THIS company was registered March 28th, 1900, to acquire the undertakings of the Frank Smith Diamond Mines, Ltd., and the Hartz River Diamond and Estates Syndicate, Ltd. (*see vol. for* 1900). The property consists of six freehold farms, Nos. H.V. 33 to 37 and 54, in the Hartz River Division of Barkly West, Cape Colony, about 40 miles north-west of Kimberley, about 40,845 acres in extent, together with 423 claims in the Frank Smith Prospect Diamond Mine, situated on farm H.V. 37. The purchase consideration was £188,100, payable £13,100 in debentures (since redeemed) and £175,000 in fully-paid shares. The farm No. 54, area 5,845 acres, was acquired in 1906 for £3,060. Washing was resumed (after 2½ years' interval) in June, 1903, but was suspended during September, 1907. For 1907 (nine months) 207,940 loads yellow and 70,613 loads cylinder lumps yielded 4,607 carats equal to 1·6 per hundred loads. In July, 1909, the mining claims (423) and machinery and plant thereon, also about £26,265 cash, were acquired by the Welgelegen Diamond Mining Co., Ltd., for 170,000 fully paid shares, the purchasing company having the right for two years to acquire the remaining farms and buildings for 25,000 fully-paid shares and to prospect the property, the vendors' shares not to be distributed during the currency of the option.

The authorised capital is £300,000, in 300,000 shares of £1 each; 275,000 shares are issued and fully paid, 175,000 being issued credited as fully paid. The capital, formerly £250,000, was increased to present amount in December,

FRANK SMITH DIAMOND—continued.

owned (of which 375 remained intact at Dec. 1909), also three town stands, nine water-rights and 60 claims bewaarplaatsen; also 41 new claims pegged out in connection with an extensive water supply.

The reef series has been opened up from new deep level shafts, and a 60-stamp mill and cyanide plant commenced working in 1898; further 60 stamps have been added, making 120. After the war crushing was resumed in October, 1902, but was suspended November 30th, 1909, owing to broken character of area opened up and insufficiency of funds to permit more extensive developments coupled with shortage of labour. During 1908, 178,837 tons crushed yielded gold, value £213,805; profit £6,433 or 8·6d. per ton. During 1909, 118,980 tons were treated; yielding £163,700; loss £22,449. For crushings *see tables at commencement of volume.* Ore reserves at December, 1909, 211,113 tons, value 5·9dwt. per ton, and 764,800 tons, value 2·5dwts. per ton.

The authorised capital is £560,000, in 560,000 shares of £1 each; 514,000 shares are issued and fully paid. The capital was reduced from £560,000 in March, 1902, to £280,000, one fully-paid share being given for every two; then increased to present amount (authorised); 168,000 shares were offered to shareholders at 35s. each, the issue being guaranteed at 32s. 6d.; guarantors received an option on 66,000 shares at £3 each (exercised).

Dividends paid: for 1906, 5 per cent.; 1907, 7½ per cent.; *nil since.*

The accounts for year to December 31st, 1909, submitted at Johannesburg March 18th, 1910, showed gold receipts £163,700 and a loss of £22,449, deducting this from balance forward and sundry revenue and paying £527 taxes &c., £1,198 debenture interest and £42,996 funds re-invested in undertaking left £9,353 debit balance carried forward being liabilities in excess of assets,

THIS company was registered in the Transvaal March 28th, 1899, and owns the farm Geduld No. 174 (formerly known as the "President's Farm"), adjoining the south-eastern boundary of the farm Modderfontein, district of Heidelberg, East Rand, Transvaal. The area of the farm is about 8,900 acres, and the company acquired the entire freehold (except 420 acres) and a mining area equal to 2,481 claims thereon. The vendors received, as purchase consideration, 185,000 fully-paid shares. By Government permission, the company's mynpacht was relocated in 1905. The property was proclaimed a public digging in July, 1906. The mining area was divided into six blocks, and two were sold to the North Geduld and Central Geduld companies and 110 claims were sold to the Geduld A, Ltd., but in October, 1906, these three companies were absorbed (*see vol. for* 1907). Three boreholes have struck the main reef: No. 1 at 1,390ft. depth, 6in. wide, assay value 1oz. 12dwt. 10gr. per ton; No. 2 at 1,724ft., 10in. wide, assay value 5oz. 1dwt. 12gr. per ton; and No. 3 at 2,136ft. 14in. wide, assay value 17dwt. 10gr. per ton. Six shafts have been located, the main reef being cut in No. 2 shaft on December 8th, 1905, at 1,694ft. and in No. 3 shaft at a depth of 1,839 ft. in June, 1906. Development work is chiefly concentrated at shaft No. 2. Estimated tonnage developed at December 31st, 1909, 308,800 tons, value 11·6dwts. per ton, also 97,315 tons, value 9·5dwts. A 50-stamp mill, two tube mills, and cyanide and slimes plant are erected and milling commenced November, 1908, but was suspended February, 1909, owing to inrush of water; crushing was resumed February, 1910. During 1910, 127,510 tons crushed yielded gold value £149,724; estimated profit £18,681. For detail's of crushings *see tables at commencement of volume.*

The authorised capital is £750,000, in 750,000 shares of £1 each; all the shares are issued and fully paid. The capital was increased from £400,000 to £499,100 in October, 1906, to acquire the properties of the Central and North Geduld and Geduld A, Ltd., and again increased to present amount in November, 1907, A. Goerz & Co., Ltd., agreeing to take up 100,000 shares at par and to offer the same to shareholders at same price and also to have the call until November, 1909, over 50,000 at 25s. and 50,000 at 30s. (exercised). During May, 1909, 30,000 shares were taken up by A. Goerz & Co., Ltd, at £3 5s. each. During April, 1910, 29,900 shares were taken up by A. Goerz & Co., Ltd., at 50s. each. Capital (£140,000) was subscribed at par in 1899; in March, 1901, shareholders were offered 54,166 shares at £4 5s. each, the issue being guaranteed in consideration for the right to take up the remaining 20,834 reserve shares at £4 10s. before March 15th, 1902 (exercised).

The accounts to December 31st, 1908, submitted in Johannesburg March 31st, 1909, showed gold receipts £13,750 and a loss of £3185 carried forward; cash assets in excess of liabilities £61,392; £296,840 was transferred from share premium account and written off plant, buildings, mine development, etc., leaving share premium account at £65,981.

The accounts to December 31st, 1909, submitted in Johannesburg March 16th, 1910, showed gold receipts £21,136 and a profit of £1,560, making with sundry revenue a sum of £6,663; deducting debit balance forward and £802 taxes &c., left £2,675 credit balance carried forward; £41,253 was transferred from share premium account and written off expenses incurred during the year in dewatering the shafts, leaving share premium account £117,228.

THIS company was registered in the Transvaal January 21st, 1893, and acquired 211·9 main reef deep level claims on the dip of the Geldenhuis Estate, and Geldenhuis Main Reef properties, Witwatersrand, Transvaal. The vendors, the Consolidated Deep Levels, Ltd., and the Rand Mines, Ltd., received 175,000 fully-paid shares. In November, 1909, the undertakings of Jumpers Deep, Ltd., and Geldenhuis Estate and Gold Mining Co. (Elandsfontein No. 1), Ltd., were acquired as from December 1st, 1909, for 235,753 and 50,000 fully-paid shares respectively. The company now owns 628 claims (400 unexhausted at November, 1909), also 232 claims north of the Main Reef series and freehold rights over about 4,850 acres together with sundry water rights, all situate on Elandsfontein No. 147 and Doornfontein No. 140, Witwatersrand, Transvaal.

A 100-stamp mill with cyanide plant started working in October, 1895, subsequently increased by the addition of 100 stamps, three tube mills and slimes plant. The crushing plant now consists of 420 stamps and five tube mills with a capacity of 888,000 per annum; tube mills are to be added to the Geldenhuis Estate and Jumpers Deep plants, which will increase the capacity to 947,000 tons per annum. Arrangements have been made with the Rand Mines Power Supply Co., Ltd. for the supply of electric and compressed air power for a term of 20 years from December, 1910. During 1909, 393,280 tons yielded gold value £495,155; working profit £88,932 or 4s. 6·2d. per ton; costs 21s. 3.3d per ton; During 1910, 826,610 tons yielded £1,156,542; estimated profit £266,517. For monthly crushings *see tables at commencement of volume.* Estimated ore reserves at December 31st, 1909, 2,233,044 tons value 5·9dwts. per ton, also 2,380,654 tons value 3dwts. per ton.

Estimated life, with enlarged plant in operation, 17 years; this will be extended by the profitable mining of ore at present below the limit of payability.

THIS company was registered in the Transvaal December 30th, 1895, to carry on the business of a mining and financial company and to acquire the assets and interests of the firm of G. and L. Albu, of Johannesburg and London. The company holds shares in, and is identified with the management of, the following group of mines:—

Aurora West United Gold Mng. Co., Ltd.	Roodepoort United M. Reef G.M.Co., Ld.
Cinderella Consolidated G. M. Ltd.	Sacke Estates and Mining Co., Ltd.
Meyer and Charlton Gold Mng. Co, Ltd.	Van Ryn Gold Mines Estate, Ltd.
New Goch Gold Mines, Ltd.	West Rand Consolidated Mines, Ltd. (jointly with Messrs. S. Neumann & Co.).
New Steyn Estate Gold Mines, Ltd.	
Rand Collieries, Ltd.	

The company also holds large interests in other mining companies, and has formed the General Mining Real Estate Co., Ltd., to take over various real estate properties, and holds all its shares. During 1910, the Beatrice mine in the Salisbury District, Rhodesia, was acquired.

The authorised capital is £1,875,000, in 1,875,000 shares of £1 each, of which 1,000 are founders' shares; all the shares are issued and fully paid. The founders' shares were issued to the vendors and are entitled to 25 per cent. of the net profits remaining each year after paying a non-cumulative dividend of 10 per cent. per annum on all the shares. The capital was formerly held privately, but in January, 1902, a prospectus was advertised and 300,000 ordinary shares were issued to the public, at £2 5s. each, by a syndicate of the original shareholders. In December, 1903, 250,000 reserve shares were sold to a syndicate composed of Messrs. G. and L. Albu, of Johannesburg, and the Dresdner Bank, the Direction der Disconto-Gesellschaft and S. Bleichroeder, of Berlin, at £2 15s. per share. In December, 1906, the capital was increased from £1,250,000 to present amount, the new shares being taken up at £1 5s. by the above syndicate (added to by the Schaafhausensche Bankverein) and offered to shareholders at £1 10s. each at the rate of one for every two held.

THIS company was registered in the Transvaal December 30th, 1892, to acquire 39 claims, known as the Ginsberg block, on the farm Driefontein, four miles east of Germiston, East Rand, Transvaal. In March, 1895, the company was reconstructed by the Johannesburg Consolidated Investment Co., Ltd. In 1906, the property of the Balmoral Main Reef Gold Mining Co., Ltd. (*see vol. for* 1906), was acquired from the Johannesburg Consolidated Investment Co., Ltd, comprising 60 stamp mill and 92 claims (31 reef bearing) situate on same farm The consideration was 35,000 shares. Total area now held 138 claims, of which 87 are reef bearing.

Crushing commenced in February, 1894, with 10 stamps, and 70 stamps and new cyanide plant have since been added. After the war, crushing was resumed in October, 1901. During 1909, 152,261 tons yielded gold value £205,601; profit £59,331 or 7·7s. per ton. During 1910 131,042 tons yielded £180,351; estimated profit £47,332. For crushings *see table at commencement of volume*. Estimated ore reserves at December, 1903, 472,988 tons; at December, 1909, 440,200 tons.

Estimated life, about six years from December, 1910, with 80 stamps at work.

The authorised capital is £235,000, in 235,000 shares of £1 each; 210,000 shares are issued and fully paid. The capital was formerly £150,000, and under the reconstruction in 1895, shareholders received one fully-paid share in exchange for every two old shares. In 1902, the capital was increased from £160,000 to £175,000, the 15,000 new shares being offered to shareholders at £3 15s. each; the issue was guaranteed by Barnato Brothers and the Johannesburg Consolidated Investment Co., Ltd., at a commission of 5 per cent. In 1906 the capital was increased from £175,000 to £235,000 in order to acquire the Balmoral Company's claims and plant.

Dividends declared (paid in London about six weeks after declaration): 1897, 25 per cent.; 1898, 40 per cent.; 1899, 25 per cent.; 1902, 15 per cent.; 1903, 25 per cent.; 1904, 30 per cent.; 1905, 12½ per cent.; 1906, nil; 1907, nil; 1908, 20 per cent.; 1909, 25 per cent. (12½ per cent. June 21st, and 12½ per cent. December 17th); 1910, 20 per cent. (10 per cent. June 22nd, and 10 per cent. December 19th).

The accounts for year to December 31st, 1908, submitted in Johannesburg March 26th, 1909, showed gold receipts £210,764 and a profit of £62,512, making with balance forward and sundry revenue £89,684; dividend absorbed £42,000, tax £2,599, depreciation, etc., £18,055, leaving £27,029 carried forward.

THIS company was registered in the Transvaal in January, 1889, and acquired 72 main reef claims, being a portion of the Witwatersrand Gold Mining Co.'s mynpacht on farm Driefontein 176, Eastern Witwatersrand, Transvaal, also a water-right situate 1½ miles south of the property. The purchase consideration was £150,000, payable £75,000 in cash and £75,000 in fully-paid shares. In August, 1896, the adjoining 72 claims (and assets) of the Glenluce Gold Mining Co., Ltd. (*see vol. for* 1899) were acquired for 225,000 fully-paid shares. The total extent of the property is now 143 claims, including 47 claims north of the main reef.

were afterwards added, also cyanide plant; a slimes plant started August, 1908. After the war crushing was resumed in January, 1903. During 1909, 243,900 tons yielded gold value £230,267; profit £52,884 or 4·2s. per ton; during 1910, 249,286 tons yielded £198,741; profit £29,067. For crushings *see table at commencement of volume.* Ore reserves at December, 1908, 888,828 tons; at December, 1909, 845 524 tons.

During 1910 it was decided to work the large blocks of low grade ore existing in the mine, the method of working such areas being to start from the bottom of the mine, and take out everything of a payable nature right up to the surface, filling the stopes to prevent caving. By adopting this method of working the life of the mine will be considerably prolonged, but since it will be necessary to work the blocks of ore as they come, irrespective of grade, returns of profit will show fluctuations.

The authorised capital is £550,000, in 550,000 shares of £1 each; all the shares are issued and fully paid. The capital was increased in December, 1889, from £175,000 to £200,000, and to £225,000 in May, 1894, 25,000 shares being issued at 30s. In 1896 the capital was increased to present amount, 225,000 fully-paid shares being issued for Glenluce property and 50,000 issued to shareholders of both companies at £3. In June, 1902, 50,000 reserve shares were offered to shareholders at £2 5s., the issue being guaranteed by the Johannesburg Consolidated Investment Co. and Barnato Brothers, at a commission of five per cent.

Dividends declared (paid about eight weeks after declaration). For 1894, 12½ per cent.; 1895, 27½ per cent.; 1898, 25 per cent.; 1906, 5 per cent.; 1907, 10 per cent.; 1908, 7½ per cent.; 1909, 10 per cent. (5 per cent. June 21st and 5 per cent. December 17th); 1910, 5 per cent. December 19th.

The accounts for year ended December 31st, 1908, submitted in Johannesburg, March 26th, 1909, showed gold receipts £237,943 and a profit of £57,418, making, with balance forward and sundry revenue £79,173; dividends absorbed £41,250, tax £4,330, depreciation £14,073, sundries £3,093, leaving £16,427 carried forward.

The accounts to December 31st, 1909, submitted in Johannesburg, March 30th, 1910, showed gold receipts £230,267 and a profit of £52,884, making with balance forward and sundry revenue £72,880; dividends absorbed £55,000, tax £1,960, depreciation £13,987, sundries £250, leaving £1,682 carried forward.

THIS company was registered in the Transvaal, February 26th, 1910, to acquire on lease from the Transvaal Government the exclusive mining rights over two portions of the farm Modderfontein No. 167, in Boksburg Mining District, Transvaal, in extent 2,633 claims, and situate to the south of the New Modderfontein and Modder B properties. The company was promoted by G. Imroth and Barnato Bros. Four shafts are being sunk on the property.

Under the conditions of lease the company shall pay to the Government (*a*) a tax on the annual net produce obtained from the working of the said claims calculated in accordance with the sliding-scale referred to hereafter; and (*b*) an additional tax as below. Such net produce shall be taken to be the value of the precious metals produced after deduction therefrom of the cost of production and of such sums as may be allowed in respect of the exhaustion of capital. The sliding-scale before mentioned shall be such that under it the tax payable to the Government shall bear the same ratio to the net produce as the latter bears to the value of the precious metals produced; provided, however, that in no case shall the tax payable to the Government under such sliding-scale be less than 10 per cent. or more than 50 per cent. of such net produce. The additional tax referred to above shall be such that whatever amount may be payable to the Government in accordance with the sliding scale, the lessee shall pay to the Government a further amount computed as follows:—(*a*) Seven and a half per cent. of the tax payable under the sliding scale, if such tax does not exceed 20 per cent. of the net produce; (*b*) 10 per cent. if such tax exceeds 20 per cent. but does not exceed 33⅓ per cent.; (*c*) 17½ per cent. if such tax exceeds 33⅓ per cent. but does not exceed 49 per cent.; (*d*) 22½ per cent. if such tax exceeds 49 per cent. of the net produce. No tax is payable under the Profits Tax (Gold Mines) Proclamation, 1902. On the termination of the lease by the exhaustion of the precious metals, the Government shall be entitled to 10 per cent. of the net proceeds derived from the disposal of or of the value of the residual plant, buildings, and equipment of the Company.

The authorised capital is £1,400,000, in 1,400 000 shares of £1 each; all the shares are issued, 625,000 being fully paid and 775,000 having 2s. paid; 425,000 fully-paid shares and the partly-paid shares were subscribed at par by Barnato Brothers, and 175,000 shares were offered to residents in the Transvaal for public subscription in March, 1910, payable in full on application, Barnato Brothers agreeing to take up at par any shares not applied for.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. per deed of 100 shares or part. The 6th July, 1910, was appointed as closing day in shares Nos. 1 to 450,000 and 1,225,001 to 1,400 000. Latest price, $1\frac{3}{16}$, $1\frac{5}{16}$.

GREAT BRITAIN GOLD MINING AND ESTATE COMPANY OF WITWATERSRAND, LIMITED.

Directors (Qualification, £100).
A. A. Aurct, *Chairman*. | J. L. Bilbrough. | Harry S. Lyons.
London Agents—M. Devenish; C. Murray.
Secretary and Offices—James Fraser, 107, Exploration Building, Box 1223, Johannesburg.
London Secretary and Office—H. L. Claridge, 3, Throgmorton Avenue, E.C.

THIS company was registered in the Transvaal in December, 1888, and acquired the two mynpachts (215 claims) and owners' rights of farm Vogelstruisfontein No. 55, 3,000 acres, and water right on adjoining Klipspruit, West Rand, Transvaal. The consideration was £130,000 in shares. The freehold of the entire farm has since been acquired. During 1908, a further 99 claims were acquired, making 314 claims now held. Work has been confined to the Kimberley Reef, but the main reef series is believed to underlie the property at about 2,750 to 3,000ft. depth. During five months' working in 1891, with 25 stamps, 5,410 tons were crushed, yielding 850 ozs. of gold. The battery was afterwards sold, and since 1898 the mine has been closed down pending arrangements for raising further capital. The company receives about £1,500 to £2,000 per annum by claim licences from other companies holding claims on the farm.

GREAT BRITAIN GOLD—continued.

The authorised capital is £100,000, in 100,000 shares of £1 each; all the shares are issued and fully paid. The capital, formerly £170,000, was reduced to present amount under a scheme of reconstruction in 1895. Shareholders received 13 new fully-paid shares in exchange for every 100 old shares held, and the reconstructors were allotted 38,000 new shares at par, with an option over the 39,900 reserve shares at par for twelve months, which option was exercised.

For 1906-7, a dividend of 7½ per cent. was paid February 9th, 1907 (declared January 15th, 1907).

The accounts to June 30th, 1910, submitted in Johannesburg July, 1910, showed a credit balance of £9,069; cash £4,690, investments £7,573, debtors £325; creditors £309.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. per 100 shares or part thereof. Shares can be transferred from London to Johannesburg register and *vice versa*.

This company was registered in the Transvaal on the 6th July, 1894, to acquire about 200 acres of coal lands on the farm Grootvlei, No. 176, Boksburg district Transvaal, adjoining the property of the Cassel Coal Co., about 15 miles east of Johannesburg. The purchase consideration was £80,000. In August, 1895, the company acquired the coal rights of the entire farm (subject to a royalty of 1s. per ton) for 184,000 fully-paid shares, and in December, 1897, the royalty was reduced to 6d. per ton with a maximum of £1,000 per month, by payment of 23,334 fully-paid shares. In 1907, permission was obtained from the Government to work the coal areas on the adjoining farm Geduld. The total area now held is 7,241 acres. On account of fire and subsidences No. 1 mine on Grootvlei was abandoned in February, 1909, and a new mine was opened up on farm Geduld, the coal bearing area being estimated at 400 acres, containing 2 400,000 tons coal. All work was suspended at No. 2 mine in September, 1909. Output of coal for 1905, 178,460 tons; 1906, 188,600 tons; 1907, 190,829 tons; 1908, 182,538 tons; 1909, 78,167 tons.

The authorised capital is £100,000, in 400,000 shares of £1 each; all the shares are issued and fully paid. The capital was increased from £130,000 on August 5th, 1895; 184,000 of the new shares were issued to vendors, and a bonus of one new share for every three old shares held was given to shareholders, together with the right to subscribe *pro rata* for 30,000 new shares at par. In December, 1897, 23,334 reserve shares were allotted for reduction of royalty as above.

Dividends declared: 1s. per share in November, 1896; 1s. April, 1898; 1s. April, 1899; 2s. November, 1901; 1s. April 19th, 1902; 1s. 6d. April 15th, 1903.

The accounts for fifteen months ended March 31st, 1910, submitted in Johannesburg, May 25th, 1910, showed £1,592 carried forward to debit of profit and loss; cash £3,835, debtors £346, stores £1 402; creditors £1,999; royalty suspense account £2,328.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. per deed per 100 shares or part of 100. Share warrants to bearer may be had for 1, 5, 10 or 25 shares; fees for conversion, 2s. 6d. per 100 and 6d. per warrant; if more than 5 per cent. of warrants are one share each, extra 6d. per warrant is charged. Reconversion, 2s. 6d. per 100 shares. Prices, 1907: highest, 6s. 3d.; lowest, 1s.; 1908: highest, 2s.; lowest, 9d.; 1909: highest, 2s.; lowest, 6d. Latest price, 6d.. 1s. 6d.

THIS company was registered in Cape Colony September 22nd, 1881, to work the Dutoitspan Diamond Mine, Griqualand West, Cape Colony; in 1887 amalgamations were effected with the West End Co., the Hercules Co., the Kimberley Mining Co., the Orion Diamond Mining Co., and 111 claims of the De Beers Mining Co. The property now consists of 518 claims.

In 1889 the entire property was leased in perpetuity to the De Beers Consolidated Mines, Ltd., by a working agreement under which the latter company pays an annual rent of 4 per cent. on the capital of the Griqualand West Co. In addition the De Beers Consolidated Mines took charge of the debenture debt of £158,000. The lease cannot be determined without being mutually agreed upon by both companies, but should the De Beers Co. make default in any of the sums payable, the Griqualand Co. has the right to re-enter and take possession of the property.

The authorised capital is £1,057,000, in 105,700 shares of £10 each; all the shares have been issued and are fully paid. The capital was increased in 1887 from £335,740. There are £158,000 six per cent. first mortgage debentures, all held by the De Beers Consolidated Mines, Ltd., the former holders having been paid off by that company in 1896. (The De Beers Co. has taken charge of this debt, as above.)

Dividends distributed:—In 1886 18s. per share; in 1887, 13s. per share; in February, 1888, 20 per cent. in bonus shares; the next payment was 3½ per cent. in January, 1891, for the half-year ending December 31st, 1890. Since then the 4 per cent. dividend from the De Beers Co. has been distributed half-yearly (received in London about March and September). For 1893, in addition to the 4 per cent. dividend, 6d. per share was distributed in February, 1894.

The accounts are made up annually to September 30th and submitted at Kimberley in October, there being practically no change from year to year; carried forward at September 30th, 1910, £9,185. A share register is kept in London. Transfer form, common; fee, 2s. 6d. per 100 shares or part thereof. Prices, 1910: highest, 7¼; lowest, 6. Latest price, 6⅞, 7⅛.

THIS company was registered in the Transvaal April 23rd, 1904, to acquire from the East Rand Mining Estates, Ltd. (and other companies also concerned in the property), the whole of the mining rights (other than coal) of the farm Grootvlei No. 176, 7,241 acres in extent, situate in the Heidelberg district, East Rand, Transvaal, adjoining the farm Geduld. The purchase consideration was £265,250 in, fully-paid shares, 230,250 of which were payable to the East Rand Mining Estates' Ltd, and others, and 30,000 (with an option on a further 100,000 shares at par) to the Grootvlei Prospecting Synd., Ltd.; the Syndicate had prospected the property by boreholes, the Van Ryn reef being struck at 3,340ft. and 4,040ft. depth on western boundary, and at 2,500ft. on eastern boundary. The company is entitled as owners to about 986 mining claims. Two shafts, 5,600 feet apart, have been sunk to depths of 378 feet and 55 feet respectively, but owing to inrush of water operations have been temporarily suspended. THIS company was registered December 22nd, 1900, to acquire the Himan Concessions, area 20 square miles, with mineral and timber rights, situate near Tarkwa, Wassau district, Gold Coast Colony. The consideration was £200,000, payable in 100,000 fully-paid shares and 200,000 shares credited as 10s. paid, of which the African Estates and Mining Co., Ltd., received a portion. The property originally comprised 17 leases, but the Anfargah lease has been sold to the Anfargah Gold Mines, Ltd., for 135,000 £1 shares and the Bogosu lease to the Bogosu Gold Mines, Ltd., for 200,000 shares, leaving 15 leases now held adjoining each other along the Broomassie-Prestea line of reef and having a total area of 11,200 acres. Timber leases, area 27 square miles, have also been acquired. At June 30th, 1910, 266,000 fully-paid Anfargah shares of 10s. each were held; also £50,000 debentures and 211,000 fully-paid Bogosu shares. Of the Anfargah shares, 75,600 are under option at par for three years from March, 1910, to the West African Trust, Ltd.

During March, 1910, an agreement was entered into with the West African Trust, Ltd., for the development of the property on the following terms:—

The Trust Co., to spend during the next three years a sum of not less than £60,000, or £20,000 yearly, in prospecting, equipping and developing such of the company's concessions as the Trust Co., may select. For the purposes of this arrangement the various mining areas have been divided into 23 different blocks. Within 13 months the Trust Co. have the right to select one-half of the various blocks for the purpose of their exploration and development, leaving the company free after that date, within certain limitations, to deal with or dispose of the other blocks as they may see fit. For three years from 31st March, 1910, the Trust Co. shall have the exclusive right of forming any company or companies to acquire and turn to account the blocks which they may have selected. The consideration payable to the Himan Co., unless mutually agreed otherwise, shall not be less than £75,000 for any one block, and in any case shall be equal to one-third of the total capital of such company, and shall be payable in fully-paid shares. Each company so formed shall have a minimum cash working capital of £75,000, free of all initial expenses, and wholly available for the purpose of developing, equipping and working the property acquired, the Himan Co., to have the right of subscribing for 25 per cent. of the cash capital of any such company on the same terms as the Trust Co. The agreement provides that the period of three years shall be extended for a further year for each company so formed.

The authorised capital is £450,000, in 450,000 shares of £1 each; 355,000 shares are issued and fully paid. No prospectus was issued. The capital was increased from £300,000 to £340,000 in December, 1908, and to present amount in March, 1910, 50,000 shares being taken up at par by the West African Trust, Ltd., the subscribers having the right to March 31st, 1913, to take up a further 25,000 shares at 25s. each and 25,000 at 30s. each, subject to the provision that if 12,500 at least are not called when the making-up price of the shares has

THIS company was formed in Natal in December, 1886, to acquire six claims on the farm Turffontein, Witwatersrand, Transvaal, and paid £9,000 in shares for the property. In 1888 three claims were purchased for 2,000 shares, other claims being afterwards acquired. In 1892 the company purchased from the Salisbury Co. a half-share in a battery site of 35 deep-level claims and a water-right on Van Diggelen's Block for £2,500, and a joint battery has been erected thereon for the use of the Jubilee and Salisbury companies. In January, 1895, the company purchased the adjoining property and assets of the New Grahamstown Gold Mining Co., Ltd., consisting of 8¾ reef claims and £7,500 cash balance, the consideration being 15,000 fully-paid shares. In August, 1898, the company's half interest in the 35 deep-level battery site claims (except surface rights) was sold for 33,312 fully-paid shares of the Village Main Reef Co., and in October, 1898, 5¼ claims were sold to the Salisbury Co. for £10,000 cash and 8,000 fully-paid Village Main Reef shares. Another property, known as the Klipriversberg freehold mynpacht, held jointly with the Salisbury Co., was sold to South City, Ltd., (now City Deep), this company receiving 20,139 fully-paid South City shares for its half interest. (These shares since sold). The company now owns about 16 claims, also bewaarplaatsen and water-rights on the Natal Spruit, and a half interest in a further 23 deep level claims freehold on Klipriversberg.

Crushing commenced in May, 1887, and the company has now 40 stamps (forming two-fifths of joint battery of this company and Salisbury Co.), also cyanide and slimes works. A plant (Stark process) to treat the dump has been erected but is not at work. Two ball mills were erected during 1909. After the war, crushing was resumed in January, 1902. During 1909, 63,159 tons yielded £69,791; profit £17,475 or 5s. 6·4d. per ton. During 1910, 55,060 tons yielded £47,183; estimated profit £3,439. For crushings *see table at commencement of volume.* Ore reserves at December, 1909, 103,474 tons as against 178,567 tons at December, 1908.

Estimated life, three years from January, 1911. A three-eighths interest in the Claremont Mines (Rhodesia), Ltd., is held (*see that company*).

The authorised capital is £90,000, in 90,000 shares of £1 each; 85,000 shares are issued and fully paid. The capital was increased in March, 1887, from £15,000 to £22,000, and further increased to £30,000 in May, 1889, 4,000 of the new shares being sold at £4 10s. per share. In January, 1895, the capital was further increased to £50,000 in order to acquire the New Grahamstown property, and 5,000 shares were sold at £7 10s. each. In May, 1910, the capital was increased to present amount and 35,000 shares offered to shareholders at par, to provide the company's proportion of working capital in the Claremont Mines (Rhodesia), Ltd.

THIS company was registered in the Transvaal in September, 1887, to work 39 main reef claims on the farm Doornfontein, Witwatersrand, Transvaal. The vendors received £27,000 for the property. The company also acquired the surface rights over an area of ground on the dip, with a water-right, comprising in all 51 claims; mining rights in respect of 23 of these claims have been obtained and sold for 19,459 fully-paid shares of the Jumpers Deep, Ltd., and the option to take up a further 9,729 shares at par (option exercised). The company still holds the original 39 claims and 16½ claims north of the reef; and 45 Geldenhuis Deep shares. The freehold of the claim holding was acquired in 1905 for £4,900. Arrangements have been made with the Treasury Gold Mines, Ltd., under which the ore remaining in the two mines will be mined and treated by the Jumpers Co., the Treasury Co. to receive one-third of net profits from working the two mines.

Crushing commenced in February, 1888, with 10 stamps, and 20 were added in 1888, 40 in 1889, and 30 in 1890, making in all 100 stamps, with cyanide and slimes plants. After the war crushing was resumed in March, 1903. During 1908-9, 92,960 tons yielded £208,299; profit £64,366, or 13s. 10d. per ton; during 1909-10, 98,196 tons milled yielded £184,417; profit £48,969, or 9s. 11s. per ton. There was also a profit of £13,466 from the treatment of waste dump and accumulated slimes. For crushings *see table at commencement of volume*. The ore reserves at July 31st, 1910, were estimated at 63,523 tons in sight, with a further 120,000 tons on re opening old stopes and levels; accumulated slimes, 42,000 tons, on which a profit of 4s. per ton is estimated.

In January, 1909, the company subscribed for 50,000 shares at par in the Benoni Consolidated Gold Mines, Ltd., and in consideration for so doing received an option over a further 33,333 shares at 25s. each which was exercised. The company's holding is now 100,000 fully-paid shares.

The authorised capital is £100,000, in 100,000 shares of £1 each; all the shares are issued and fully paid. The capital was increased from £42,000 to £50,000 in 1888, and to present amount in 1890, by the creation of 50,000 new shares, which realised £91,095.

THIS company was registered November 9th, 1900, to acquire from the Consolidated Exploration and Development (Rhodesia) Co., Ltd., 130 claims comprising the Killarney, Hibernia, and other adjoining blocks, situate in the Filabusi district of Matabeleland, about 70 miles south-east of Bulawayo, together with the freehold farm Knocknara, on which the claims are situate. The purchase consideration was 50,000 fully-paid shares, including 15,000 to the British South Africa Co. Some claims have been abandoned and others acquired, making 60 claims and water right now held, also the adjoining farm of St. Andrews. It is proposed to dispose of the machinery, plant and other assets, and abandon the remaining claims. A 20-stamp mill commenced crushing in December, 1904; a tube-mill has also been erected. Crushing was suspended March, 1908, owing to loss of values in depth and failure to locate any permanent payable reef.

The authorised capital is £180,000, in 180,000 shares of £1 each; 100,000 shares are issued and fully paid, including 50,000 vendors'. The unissued shares are under option at par. The capital was increased from £150,000 in 1904. Of shares subscribed, 25,000 were offered to shareholders in the vendor company in Nov., 1900, guaranteed by the Consolidated Goldfields of South Africa, Ltd.

The accounts for year ended March 31st, 1910, submitted December 29th, 1910, showed £55,860 debit balance carried forward; cash, debtors, &c., £11,841; creditors £2,049, and loans £112,000 (mortgage to be given if required by lenders).

Transfer form, common; fee, 2s. 6d. The 6th February, 1901, was appointed settling day in shares Nos. 1 to 50,000, and December 29th, 1902, in Nos. 50,001 to 100,000.

THIS company was registered in the Orange River Colony on October 31st, 1881, as the London and Orange Free State Exploration Co., Ltd., to acquire two farms, Koffyfontein and Ebenhaezer, including the Koffyfontein Diamond Mine, situate in the district of Fauresmith, Orange River Colony, containing 1,856 claims, and certain other mines. In November, 1889, the lease of the whole of the Koffyfontein Mine, with the exception of 300 claims, was disposed of, subject to a monthly rental of 10s. per claim, and the remaining 300 claims have since been sold. In 1890 the company purchased the farm Uitdraai for £3,705, and in 1895 an adjoining farm known as Middelfontein for £1,500. The lease of Ebenhaezer mine (except eight claims) was sold in 1904. The company now owns a freehold area of nearly 28,000 acres, with over eight miles frontage on the Reit River, also a waterworks, and receives claim licences from the Koffyfontein Mines, Ltd., and others. The name was changed in 1902.

The authorised capital is £28,400, in 28,400 shares of £1 each; all the shares have been issued and are fully paid. The capital was originally £284,000, in shares of £10 each, all of which were allotted to the vendors credited as fully paid, but in August, 1885, each £10 share was reduced to £1. THIS company was registered May 19th, 1893, to acquire from A. Mosely and J. W. Doré, the Koffyfontein Diamond Mines, consisting of about 1,000 claims situate in the Jacobsdal district of the Orange River Colony. The purchase consideration was £50,000, in fully-paid shares, besides a royalty of 1 per cent. on all diamonds sold. A further 250 claims were acquired in 1894 for £8,380 in shares; in April, 1895, 28 more were purchased, and in 1898, 147 abandoned claims were taken up. The company now holds about 1,232 claims New machinery has been erected with a capacity of 2,000,000 loads per annum.

KOFFYFONTEIN MINES—continued.

Yield for 1908-9, 67,144 carats from 1,209,253 loads, average 5·5 per 100 loads; for 1909-10, 90,828 carats from 1,857,151 loads, average 4·9 per 100 loads. Blue ground on floors at June 30th, 1910, 1,007,713 loads.

The authorised capital is £375,200, in 375,000 ordinary shares of £1 each, and two life governors' shares of £100 each; 270,438 ordinary and the two life governors' shares are issued and fully paid. The life governors' shares are entitled to one-half of the surplus profits in any year after a dividend of 30 per cent. has been paid on the ordinary shares for such year. The capital was increased from £125,200 to £175,200 in 1894, and to £250,200 in October, 1896, when 25,000 shares were issued to shareholders at par; in January, 1902, 55,000 shares then remaining unissued were offered to shareholders at par. The capital was increased to present amount in 1904. There is a loan for £25,000, repayable September, 1912.

Legal proceedings having been instituted by Mr. Moseley (one of the vendors), calling in question the legality of the issues of shares made since September 1895, at the general meeting held December 6th, 1910, it was stated that the directors had been advised that it would be impossible to make any distribution of dividends until the matter had been definitely decided by the House of Lords; but a dividend of 15 per cent. was declared conditionally upon the Company's appeal to the House of Lords being successful.

The accounts for year ended June 30th, 1909, submitted November 30th, 1909, showed diamond sales £148,386, and a profit of £36,611, reducing debit brought forward to £422. The accounts to June 30th, 1910, submitted December 6th, 1910, showed diamond sales £235,239, and a profit of £48,769, converting debit balance brought forward into a credit of £48,347, which was carried forward; cash and loan £16,806, diamonds on hand and blue ground £71,628, debtors £237; creditors £38,323 (including loan repayable 1912).

This company was registered in the Transvaal October 8th, 1897, and acquired 144 mining claims and a water right situate west of the Lancaster property farm Luipaardsvlei No. 8 Krugersdorp district, West Rand, Transvaal. The consideration was £120,000 in fully-paid shares. Crushing commenced in May, 1899, with 40-stamps and cyanide works; in July, 1908, 30 stamps were leased from the Lancaster Gold Mining Co., Ltd., making 70 stamps. In August, 1909, the capital was reorganised and the undertaking of the Lancaster Gold Mining Co., Ltd., acquired also 142·6 claims adjoining. The total area now held is 582 claims on the farm Luipaardsvlei No. 8, Krugersdorp district, West Rand, Transvaal. There are several series of reefs on the property, the two principal being the Botha and West Battery reefs, and at December 31st, 1909, there were 559 claims unworked on the Botha Reef of which 332 claims were also underlaid by the unworked Battery reef. The crushing plant now comprises a 140-stamp mill (100 working), 3 tube mills (started June, 1910) and cyanide and slimes plant with a capacity of 260,000 tons yearly. During 1909, 177,035 tons yielded £220,485; profit £35,079 or 3s. 11·5d. per ton. During 1910, 252,098 tons yielded £286,296; estimated working profit £24,602. For details of monthly crushings *see table at commencement of volume.* Estimated ore reserves at December 31st, 1909, 307,354 tons, value 7·4 dwts. per ton.

The authorised capital is £700,000, in 700,000 shares of £1 each; 590,250 shares are issued and fully paid. The capital originally £220,000, was increased to £300,000 in 1899. In August, 1909, the capital was reduced from £300,000 (215,000 issued) to £161,250 by cancelling 53,750 shares, shareholders receiving three new for every four shares held; the capital was then increased to £700,000, of which 120,000 shares were issued to the shareholders of the Lancaster Gold Co. as purchase price for the undertaking, and 309,000 shares were issued to A. Goerz & Co., Ltd., 60,000 for 142 claims and 166,000 in satisfaction of the debts of the Lancaster West and Lancaster Gold Co. (aggregating, approximately, £207,500), and 83,000 at 22s. 6d. per share. The 249,000 shares issued to A. Goerz & Co. were then offered to shareholders at 22s. 6d. per share, 120,000 to the Lancaster Gold Co., being three for every ten shares held, and 129,000 to the Lancaster West Co., being three for every five shares held; 109,750 shares are under option until August, 1911, to A. Goerz & Co. at 25s. per share. The directors have power to increase the capital to £850,000.

£195,000 six per cent. first mortgage debentures of £20 and £100 were offered to shareholders in 1899, at 105 per cent., guaranteed by A. Goerz & Co., Ltd., for 5 per cent. commission; interest payable January 2nd and July 1st; redeemable at 108 by 18 annual drawings, which commenced January, 1902; £74,220 have been redeemed, leaving £120,780 outstanding.

THIS company was registered in the Transvaal January 13th, 1888, to acquire three portions of the farm Langlaagte, viz., Restante, Block A and Block B, and adjoining farm Middelfontein, a total area of 4,070 acres, including mining claims and water-rights situate in the Witwatersrand district, close to Johannesburg, Transvaal. In January, 1889, the freehold property of Block B, 1,093 acres in extent, with the mynpacht, water-rights, and other claims, were sold to the Block B Langlaagte Estate Gold Mining Co., Ltd., for 450,000 fully-paid shares, of which 432,000 were distributed as dividend (*see below*). In August, 1893, the company sold to the Crown Reef Co. for £25,000 the freehold of the mynpacht hitherto held on lease by the Crown Reef Co. In 1894, the lease of 27 claims was sold to the Langlaagte Star Co. (now Consolidated Langlaagte) for 50,000 shares. In 1895 the company sold the township portion of the property and the lease of the mineral rights of farm Middelfontein to the Langlaagte Exploration and Building Co., Ltd., for 235,000 shares. During August, 1909, 68 deep level claims were acquired for £75,077. In September, 1909, the undertakings of the Block B Langlaagte Estate Gold Mining Co., Ltd., and the Langlaagte Exploration and Building Company, Ltd., were acquired for 247,500 and 150,000 fully-paid shares respectively. The company now owns 3,423 acres on the freehold farm Langlaagte and 541·8 acres on the freehold farm Middelfontein within the municipality of Johannesburg; large block of buildings known as Robinson Buildings in Commissioner Street, Johannesburg; large block of buildings situated in Mayfair, Johannesburg, being the head offices of the Robinson group of companies; block of residential buildings in Mayfair and a stand in Pritchard Street. The Mayfair township, comprising 2,297 stands, is situated on portions of farms Middelfontein and Langlaagte, and 192 acres and 256 acres respectively on Langlaagte are intended to be laid out as townships and will comprise 2,153 stands.

Crushing commenced in 1888 with 10 stamps, and in 1889 60 were added; in 1892 a new 120-stamp mill was started and some of the old stamps shut down; in 1897 40 new stamps were added, making 200 now at work, also five tube mills equal to another 100 stamps, and cyanide and slimes plant. Crushing was suspended in October, 1899, owing to the war, and was resumed in April, 1902. During 1909, 599,216 tons yielded £787,070; working profit £303,875, or 10s. 1d. per ton; during 1910, 629,612 tons yielded £859,592; estimated profit £314,650. For crushings *see table at commencement of volume.* Ore reserves at December 31st, 1908, 1,321,377 tons; at December, 1909, 1,287,268 tons; at September 30th, 1910, 1,210,050 tons.

The authorised capital is £950,000, in 950,000 shares of £1 each; 869,500 shares are issued and fully paid. The capital was increased from £450,000 to £470,000 in 1893, the 20,000 new shares being issued to shareholders at £4. Early in 1894, 3,000 old reserve shares were sold at £5 each. The capital was increased to present amount in September, 1909, to acquire the Block B and Langlaagte Exploration Companies.

Dividends are payable about seven weeks after declaration; the following

THIS company was registered April 9th, 1900, under the title of the West African Gold Concessions, Ltd., and acquired the following properties in the Gold Coast Colony:—(1) Dainsu and Aberifa Concession, 1,640 acres, seven miles north-east of Broomassie; (2) Cheriaman Concession, 207 acres, 20 miles from Port of Dixcove; also the prospecting and other rights throughout Liberia held by the Union Mining Co. of Liberia. The total purchase consideration was £350,000, payable £50,000 in cash or shares, and £300,000 in fully-paid shares. The company was promoted by the vendors, the West Coast of Africa Synd., Ltd. The charter formerly held by the Union Co. has been vested by the Liberian Government in this company direct; the area covered for exclusive mining rights is over the counties of Montserrado and Maryland (more than one-half the total area of Liberia) and general mining, railway construction, banking and other rights over all Liberia. During 1907, the company disposed of the Dainsu and Cheriaman Concessions and received 9,600 shares of £1 each in the Broomassie-Prestea Main Reef Proprietary Synd., Ltd. The company also holds 74,796 shares in the Liberian Rubber Corporation, Ltd. The name of the company was changed in March, 1904. Exploration work is at present concentrated on a diamondiferous area which has been located, the alluvial gold deposits being reserved for future exploitation.

The authorised capital is £150,000, in 750,000 shares of 4s. each; 510,400 shares are issued and fully paid, 340,113 being issued credited as fully paid. No shares were publicly offered, but the prospectus was advertised in December, 1900, for public information. The capital was reduced from £500,000 in £1 shares (400,000 issued) to present amount in November, 1909, by cancelling 16s. per share on 400,000 shares and cancelling 30,000 of the unissued shares, the remaining 70,000 shares being sub-divided into 4s. shares and 100,000 shares offered to shareholders at par; the issue being guaranteed, subscribers having an option for two years over one new share at par for every share taken up. During 1910, 10,000 shares were issued at 2s, premium.

The accounts for year to June 30th, 1910, submitted October 20th, 1910, showed expenditure in London £3,107, in Liberia £4,604; debtors £995, investments £22,037, cash £12,810; creditors £826, bills payable £458, due to Liberian Government £19,488: share premium account £1,000.

Transfer form, common; fee, 2s. 6d. Share warrants to bearer are issued. The 2nd March, 1910, was appointed settling day in shares Nos. 1 to 500,000, and May 11th, 1910, in Nos. 500,001 to 510,000. Prices, 1910: highest, 8s.; lowest, 3s. Latest price, 4s., 4s. 6d.

A block of claims has been sold to Lomah Banket Proprietary, Ltd., and another block has been sold to the Mapeke Mines, Ltd. Large shareholdings are held in both of these companies. Other properties have been acquired. *See below, also map on preceding page.*

The authorised capital is £70,000, in 140,000 shares of 10s. each; 61,764 shares are issued and fully paid. The capital was increased from £35,000 in November, 1910.

Transfer form, common; fee, 2s. 6d. The 20th April, 1910, was appointed settling day in shares Nos. 1 to 32,770 and June 9th, 1910, in Nos. 32,771 to 36,764. Prices, 1910: highest, $2\frac{1}{2}$; lowest, $\frac{5}{8}$. Latest price, $1\frac{31}{16}$, $1\frac{5}{16}$.

Additional particulars officially supplied:—The company has acquired additional properties in Rhodesia as follows:—GADZEMA DISTRICT.—Claims have been acquired in this district and Mr. W. Marshall Philip, consulting engineer, has made an independent report, in which he states that schist and banded ironstone reefs now being worked on the Giant Mine strike southward through this company's claims, upon which visible gold has been found near the surface. Development work is proceeding, and a schist body 40 ft. wide is being opened up, giving average value from 2 to 3 dwts. gold at depth of 30 ft., this being above the average of the Giant and other properties in the same neighbourhood at shallow depth. The average from 2 to 3 dwts. at a depth of 30 ft. for a schist body 40 ft. in width is considered highly satisfactory in the banded ironstone bodies, as the higher values are not generally obtained until a depth of 100 ft. or more is reached. The property holds a unique position for economic working, having a good road passing though it, the Salisbury-Bulawayo Railway close to the south boundary, and the Umfuli River, from which a plentiful supply of water can be pumped for a large plant. Timber for fuel and mining purposes exists on the property and the surrounding district. ENTERPRISE DISTRICT.—20 claims have been acquired under working option which holds an important and commanding position. Mr. W. Marshall Philip has reported that a series of schists strike 3000 ft. through the property, and that ancient workings exist at intervals over 1,800 ft. in length. Work done by former owners resulted in the treatment of 1,159 tons of ore, yielding £2,751 worth of gold, equal to 11.3 dwts. per ton. This property is in the centre of the area held by the Rhodesian Exploration Company. KAISER WILHELM DISTRICT.—An important interest has been acquired in this district, pegged upon large and continuous ancient workings, which strike over a length of 1,000 yards. The district is reported to be very rich. The extent of the ancient workings should be evidence that a large and valuable reef may be opened up in this ground. Another important interest — namely a graphite or plumbago deposit has been acquired, which has been opened up over a length of 300 ft. showing the lode to be 6 ft. wide, while over 3 ft. is solid mineral. The manager states that there are practically 60 tons available for extraction, which should realise from £35 to £40 per ton, being equal to the best quality obtained from Ceylon. It is anticipated, on having the stuff shipped home, to realise more than sufficient money to reimburse the company its entire outlay, and leave a handsome profit, and it is stated, that if the lode lives in depth, there is a fortune in this business alone. LOMAGUNDI DISTRICT.—Development work is proceeding on another group of claims where the ancients have worked a portion of the ground more or less over a length of 9,000 ft. indicating a long chute of gold. In one shaft, 50 ft. in depth, the reef is 4 ft. wide, being composed of quartz and schist, which assays from 4 to 10 ozs. gold per ton. In another shaft a parallel reef $2\frac{1}{2}$ ft. wide was cut, the values being given as $2\frac{1}{2}$ to 3 ozs., the reef being composed of granulated quartz, with a red vein, and in another shaft, 30 ft. in depth, there is a reef of bluish quartz 1 ft. 6 in. wide, going 8 to 10 dwts.; the formation of the ground, is regular and free from disturbances. The rich lode runs alongside a strong body of horn-blende schist, which is a good feature.

COMPANY'S MINING INTERESTS IN

SOUTHERN RHODESIA.

LONDON AND RHODESIAN—continued.

THIS company was registered May 13th, 1909, to acquire the following properties:—(1) 199 Gold claims in Southern Rhodesia—179 of which are on the Makaha Gold Field, in the Kaiser Wilhelm district, 125 miles east of Salisbury, and the remaining 20 in the Lomagunda district, about 40 miles north of the Ayrshire mine. These claims are held under Licence from the British South Africa Co., granted prior to Southern Rhodesia Ordinance No. 15 of 1908, giving the option and advantage of the right to commute the interest of the British South Africa Co., or to pay Royalties. (2) Farm Lands, comprising, approximately, 41,634 acres in the districts of Salisbury, Gwelo, Charter, Victoria and Marendellas. Town Lots in Bulawayo, Salisbury, Gwelo, Victoria, Umtali and Melsetter, as follows:—five Town Stands and 2½ Stands in Bulawayo, 10 in Salisbury, 3 in Gwelo, 2 in Umtali, 2 in Melsetter and one in Victoria, (4) 47,000 fully-paid £1 shares in the Linchwe Concession Co., Ltd. (5) 59,000 fully-paid £1 shares in the Imperial Gold Mines of Rhodesia, Ltd., registered in Rhodesia with a capital of £100,000, and owning 270 base metal mining claims in the Umtali district, Southern Rhodesia and 16 farms in the same district, containing about 47,000 acres. The consideration was £142,500 payable £20,000 in cash and £122,500 in fully-paid shares. The company was promoted by the vendors, Julius Weil & Co. In August, 1909, the company acquired a 55 per cent. interest in a working option for one year over the Cam and Motor claims, situate in Gatooma, Hartley, Rhodesia. The option was exercised and the Cam and Motor Gold Mining Co., Ltd., formed to deal with the property, the interest being transferred for £178,750 in cash and shares. Mining claims and options in the Mt. Darwin and Lomagunda districts are also held. Interests in the Lonely Reef, Hay Gold and Southern Rhodesia Mining Co.'s were acquired during 1910, also an additional five stands in Salisbury. Development work is in progress. *See plan facing.*

THIS company was registered April 10th, 1896, and is a reconstruction of a company of the same name registered on May 5th, 1888 (*see vol. for* 1900), to acquire from the Gold Fields of South Africa, Ltd, the freehold gold-bearing farm Luipaard's Vlei No. 225, area 6,500 acres, about 16 miles west of Johannesburg, Witwatersrand. The old company sold portions of the property to the Battery Reef, West Battery Reef, Mynpacht (Luipaard's Vlei), and Midas Battery Reef Companies, but the properties of the first three were afterwards repurchased. In March, 1909, the undertaking of the Windsor Gold Mines, Ltd. (including £50,000 liabilities) was acquired for 73,412 fully-paid shares; the assets comprised 285 mining claims and a 50-stamp mill (obsolete). In addition to the freehold of the entire farm, which yields a revenue of about £9,500 per annum from licences, and on which the company has a township and a large plantation of trees, the company now owns 797 mining claims.

Crushing started in February, 1898, with a dry mill and cyanide works, but stopped in January, 1899, pending the development of the mine in the deeper levels. Crushing recommenced April, 1906. A new 60-stamp mill is now erected, also three tube mills and cyanide and slimes plant; the plant is to be extended to a capacity of about 26,000 tons month'y. For year ending June 30th, 1909, 197,923 tons yielded £232,052; profit £53,411, or 5s. 5d. per ton. For year ending June 30th, 1910, 198,943 tons yielded £197,056; profit £10,638 or 1s. per ton Estimated ore reserves at September 30th, 1910, 406,000 tons, averaging 5·39dwts. per ton; also 200,000 tons partially developed, value 5·3dwts. per ton. For crushings *see table at commencement of volume.*

The authorised capital is £560,000, in 560,000 shares of £1 each; 470,705 shares are issued and fully paid. The capital was originally £250,000, and shareholders of the o'd company received two new fully-paid shares for every five old, with the right to subscribe for 70,000 new shares at par; it was increased to £400,000 in 1899, and to present amount in March, 1909, to acquire the Windsor Gold Mines, Ltd., and to provide shares for debenture-holders' rights. There are £119,800 5½ per cent. debentures in bonds of £75 and £15 each, which were offered to shareholders for subscription in April, 1909, at par, the issue being underwritten for a commiss'on of 2½ per cent. The debentures are redeemable at par by annual drawings of £8,000 commencing July 1st, 1911, the company reserving the right to redeem all outstanding debentures at a premium of three per cent. any time after July 1st, 1911, on six months' notice. Holders have the r'ght before April 1st, 1911, to convert into fully paid shares at 30s. each. Interest is payable half-yearly on April 1st and Oct ber 1st. The former company paid dividends of 3 per cent. each in April and October, 1890.

Dividend paid: for 1907-8, 10 per cent.; 1908-9, 5 per cent. (paid July 27th, 1909); 1909-10, *nil.*

The accounts for year ended June 30th, 1909, submitted December 22nd, 1909, showed gold receipts £232,052 and a profit of £46,626, making with balance forward a sum of £130,400; dividend (paid July 27th, 1909) absorbed £19,920, leaving £110,480 carried forward. The accounts to June 30th, 1910, submitted December 14th, 1910, showed gold receipts £197,056, and a profit (including sundry revenue) of £10,155, making with balance forward a sum of £120,636; a sum of £49,569 was written off depreciation, leaving £71,067 carried forward.

THIS company was registered in the Transvaal, March 9th, 1899, and owns 342 main reef claims on the farm Klein Paardekraal, adjoining the Consolidated Main Reef Co.'s properties, Witwatersrand, Transvaal. The consideration was £350,000, in fully-paid shares. During April, 1909, a further 208 claims adjoining the south were acquired for 41,188 fully paid shares, such shares to be deferred for dividend until June 30th, 1911. Total area now held: 550 mining claims. A shaft has been sunk on the eastern portion of the property and has reached a depth of 3,010 feet; the south reef cut at 1,269ft. and the main reef leader at 1,380ft. A second shaft is being sunk on the western portion of the property and is expected to strike the reef at 2,500 feet. An 80-stamp mill and cyanide and slimes plant started work in February, 1909, and an additional 40 stamps and three tube mills have been added. As development justifies, the reduction plant is to be increased by the addition of 80 heavy stamps and tube mills, which will be equal in capacity to the present 120 stamps and tube mills, the annual milling capacity being thereby eventually increased to 500,000 tons. During 1908-9, 100,003 tons crushed yield gold value £155,239 and a profit of £44,140; costs 22s. 6d. per ton. During 1909-10, 189649 tons crushed yielded gold value £307,787 and a profit of £137,950; costs 17s. 11d. per ton. Ore reserves at June 30th, 1909, 355,460 tons, value 8·1dwts. per ton; also 166,300 tons, value 3·7dwts. per ton; at June 30th, 1910, 430,120 tons, value 7·9 dwts. per ton. For crushings *see table at commencement of volume.*

The authorised capital is £491,188, in 491,188 shares of £1 each; all the shares are issued and fully paid, 391,118 being vendors', of which 41,188 are deferred for dividend until June 30th, 1911, and 100,000 taken up in 1899 at £2 each. The directors have power to increase the capital to £566,188 to provide shares for conversion of debentures.

There are £300,000 six per cent. debentures in bonds of £4, £20, and £100 each, which were offered to shareholders for subscription at par in August, 1909, payable 25 per cent. on application, 25 per cent. April 1st, 1910, 25 per cent. October 1st, 1910, and 25 per cent. April 1st, 1911. The issue was guaranteed by S. Neumann & Co., for a commission of 5 per cent. The debentures are redeemable at par by annual drawings of £25,000 each, commencing October 1st, 1913, the company reserving to itself the right, at any time after September 1st, 1912, to redeem all or any of the outstanding debentures at £103 per cent. upon giving six months' notice. Debenture holders have the right till September 1st, 1912, of converting their holding into fully-paid shares at £4 each, such conversion to be made on December 1st, 1909, and at intervals of three months thereafter. Interest is payable half yearly on April 1st and October 1st.

Dividends declared (paid about seven weeks after declaration: 1909-10 25 per cent. (12½ per cent. December, 1909, and 12½ per cent. June 14th, 1910); 1910-11, 12½ per cent (interim) December 15th, 1910.

THIS company was registered August 20th, 1910, to acquire from the Lomah Stoessel Banket (Rhodesia), Ltd., 70 gold mining claims in the Lomagundi district, Rhodesia. The consideration was £50,000 in fully-paid shares. The property was reported on by H. R. Jones (*see below*). Development work and shaft sinking are in progress.

The authorised capital is £75,000, in 150,000 shares of 10s. each; 80,000 shares are issued and fully paid, including 50,000 vendors', and 20,000 are under option to the vendors at par.

Transfer form, common; fee, 2s. 6d. The 21st December, 1910, was appointed settling day in shares Nos. 1 to 30,000. Latest price, 12s. 6d., 13s. 6d.

The following are extracts from the report of Mr. Harry R. Jones, C.E., M.I.M., Consulting, Civil and Mining Engineer, of Salisbury, dated May, 1910:—"The country rocks generally are chloritic schists, with occasional quartzites and hornblendic schists. . . . Porphyritic granite occurs in a parallel range of hills to where the claims are located, the line of contact being about half a mile distant. . . . The claims are mostly in the hills, but extend into the basin of the valleys, wherein have been located reefs giving the highest values—over 1½oz. (gold) to the ton, in pan value. . . . The water is continual throughout the year; such statement is based through native informants. Excellent forestry, suitable for mining and firewood, is in abundant evidence. There are three distinct kinds—(1) red quartz, (2) white quartz, (3) chloritic schists, &c. Red quartz reefs and float of like nature occur through and over the whole of the claims. . . . The widths of this class of reef vary from 8in. to 7ft. at outcrop, invariably carrying good values in the pan. The 7ft. outcrop reef gave values up to 1½oz. (gold) to the ton, pan value, as well as containing a large amount of concentrates. Similar kind of quartz from a 15in. reef, panning 7dwts., gave 16dwts. by fire assay. The white quartz bodies are of considerable magnitude, in cases . . . values up to 7dwts. Generally I overlooked this class of quartz. However, one feature was the enormous amount of scheelite that was in evidence, nearly a 10 per cent. value of this mineral from the one panning taken. This is quite an asset. The gold value was small when the scheelite was in evidence. Float quartz gave pan values up to 32dwts., or say an average value of 10 dwts. pan value, generally. The 27 in. reef in old shaft on Block 3, was of consistent width, and gave 10dwts. pan value; a thorough sampling of this reef is necessary to determine its average value. The 15in. reef in ancient workings on Block 4, gave a 16dwts. fire assay value. The inspection I have made of this property and values, personally obtained, convinces me that this is a proposition of good prospective value which may be developed at inconsiderable cost."

The assay values returned from a 7 ft. outcrop reef, which improved in depth down to 6 ft., sampled by Mr. Jones, gave the following results:—

10dwts., over 7ft.	Dark laminated quartz.	6dwts., across 7ft.	Quartz reef sample.
10 ,, ,, ,,		15 ,, ,, ,,	Dark laminated quartz.
8 ,, ...	Quartz in footwall.	10 ,, ,, ,,	Lower part of reef.
36 ,, ...	Quartz in footwall 6ft. down trench.	12 ,, ...	Hanging of above.
		10 ,, ...	Quartz from another portion.
24 ,, over 7ft.	Top of reef.		
14 and 18dwts. ...	Footwall of reef.	8 ,, ...	Reef at 7ft. deep.
20dwts., over 7ft.	Middle of reef.	6 ,, ...	Red portion of same reef.

A prospecting shaft has been sunk vertically to a depth of 25ft., then deflected on incline, exposing about 35ft. of reef in shaft. Two other shafts have been sunk on a 15in. reef giving 16dwts. value. Trenches have been cut, exposing reefs of varying widths and good values. Ancient workings are numerous, the assays going 12, 18 and 32dwts. (pan value). An Adit cut into the hill, encountered a 5ft. schist reef carrying gold.

and immediately adjoining the farm Varkensfontein, upon which are the Nigel, Nigel Deep, and Central Nigel Mines. The consideration was £200,000, in fully-paid shares. The company also acquired the freehold of a portion of the adjoining farm Holgatfontein No. 127. The company has suspended mining operations, but derives a revenue from claim licences.

The authorised capital is £30,000, in 120,000 shares of 5s. each; 100,000 shares are issued and fully paid. The capital was formerly £300,000, and 50,000 shares were originally issued at £2 each to provide working capital. On January 14th, 1899, it was resolved to reduce the capital to £120,000, shareholders receiving two new shares for every five old. In October, 1908, the capital was reduced to present amount by returning to shareholders 15s. per share and reducing the shares from £1 to 5s. each.

The accounts for year ended December 31st, 1909, submitted in Johannesburg March 2nd, 1910, showed cash £14,799, debtors £83; creditors, £5,508.

A share register is kept in London. Transfer form, common; fee, 2s. 6d. per 100 shares or part per deed. Share warrants to bearer may be had for 1, 5 or 25 shares; conversion fee, 1s. 6d. per warrant; fee for reconversion, 2s. 6d. and 1s. 6d. for each certificate of 100 shares.

THIS company was first registered in Natal July 11th, 1887, as the May Gold Mining Co., Ltd., to work 12 claims adjoining Knight's, on the Main Reef, Eastern Witwatersrand, Transvaal. In February, 1889, the company took over the Annie Block of 12 claims, with a water-right, and was registered in the Transvaal under its present name. The vendor of the Annie Block received, in exchange for the property and a sum of £50,000 in cash, 250,000 fully-paid shares in this company. 180,000 shares credited as fully paid were allotted to the shareholders of the May Gold Mining Co., Ltd. In July, 1894, the company was reconstructed. The company now owns 83 claims on farms Driefontein No. 148, and Elandsfontein No. 147, of which 45 are main reef claims. At December, 1909, the Main Reef was intact in 8·9 claims and the North Reef in 9·2 claims, and it is estimated that the Slate Leader will be found payable over an area still intact of 3 claims.

From January, 1888, to May, 1889, 10 stamps and afterwards 20 stamps were at work. In December, 1890, a new 50-stamp mill was started, and in May, 1892, the working of the old 20 stamps was discontinued. A further 30 new stamps started in April, 1895, and 20 more in March, 1896, making 100 stamps in all, with cyanide plant. After the war, crushing was resumed in May, 1901. During 1909, 178,970 tons yielded gold value £267,872; profit £131,687 or 14s. 8d. per ton; during 1910, 180,855 tons yielded gold value £227,241 profit £136,241. For crushings *see table at commencement of volume*. Ore reserves at December, 1909, 400,416 tons, value 9 dwts.; also 138,553 tons, value 1·9 dwts.; at September 30th, 1910, 269,456 tons.

Transvaal Offices—68, Commissioner Street, Johannesburg.
Secretary and Offices—W. Fairhall, Throgmorton House, Copthall Avenue, E.C.

THIS company was registered April 27th, 1899, and acquired from the Afric Synd., Ltd., 103 mining claims known as the "Bullion," on the north side of the De Kaap River, in the Lydenburg district of the Transvaal. The consideration was £10,000 in cash and 50,000 shares of £1 each, having 16s. credited as paid. In November, 1906, the undertaking of the Victory Lydenburg Gold Co., Ltd. (*see vol. for* 1907), comprising 113 claims adjoining, was acquired for 100,000 shares credited as 16s. paid.

The authorised capital is £150,000, in 150,000 shares of £1 each 100,701 shares are issued, and fully paid. In February, 1907, the capital was increased from £75,000 to present amount. The unissued shares are under option.

Accounts to December 7th, 1910, submitted December, 1910, showed £5,593 to debit of expenditure account; cash £2,115; calls in arrear £201; creditors £697.

Transfer form, common; fee, 2s. 6d. October 6th, 1909, was appointed settling day in shares Nos. 1 to 50,701 and 100,001 to 135,000.

Extract from Director's report, dated December 22nd, 1909:—During the period under review the Board have been again approached by parties desirous of tributing the Bullion Mine, and after mature consideration it was decided not to accept their offer, but to keep the property intact, and negotiate for the taking up of the 69,299 unissued working capital shares, and thus to put the company into possession of funds to enable it to proceed with the full development of the property and bring the mine to a producing stage. About July last, the company's manager in South Africa entered into negotiations with a Johannesburg syndicate with the idea of their taking up the unissued shares of the company, and they agreed, subject to their engineer's report upon the mine being satisfactory. After a thorough examination the engineer reported most favourably. The Board subsequently granted an option upon the whole of the unissued shares, namely, 69,299 shares, and the syndicate immediately placed the company in funds by taking up 20,000 shares. When the remaining option is exercised an additional £10,000 will be available for development purposes.

Mine Manager's report dated November 27th, 1909:—The full complement of native labour arrived on the mine at the beginning of the month, thus enabling me to push on faster with the development and prospecting works on your properties. While sinking is proceeding on the rich shoot, very deep trenches are being cut on the surface to establish the exact length of

MAYBLOSSOM—continued.

the high grade ore either side of the old mine. In one of these cuttings, 200ft. east of the rich shoot, a part of the reef, identical to the reef exposed in the shaft, has just been cut. Before writing the present report I made several pannings of samples taken over a width of four feet and I averaged the values obtained to be about 30dwts. of gold to the ton. The reef being very decomposed and mixed with the rock forming the casing of it, we are following it in depth, where we shall get the exact width of the reef. 350ft. east of the main workings, or 150ft. east of the trench before mentioned, indications of the existence of the same reef are exposed, but the work done at present is insufficient to justify an opinion. Further prospecting will be started to the west portion of the claims in the course of a few weeks. A headgear, with special arrangement for hoisting, has been ordered, and will form the first part of the equipment of your Main Incline Shaft. I am very sanguine about the future of your properties. It is also a fact that the richest new and old mining propositions of the district are situated on the same line of reef as yours, and the adjoining property is producing 500 ounces of gold per month, with a small and old-fashioned reduction plant.

This company was registered August 7th, 1908, and is a reconstruction of the Mayo (Rhodesia) Development Co., Ltd., registered March 7th, 1900 (*see vol. for* 1908). The former company acquired from the United Rhodesia Goldfields, Ltd., 267 mining claims, situate in the Mazoe district of Mashonaland, Rhodesia. Further claims were subsequently acquired, and 20 sold to the Jumbo Gold Mining Co., Ltd. In October, 1909, the company acquired the whole of the assets of the Hartley Mines, Ltd., comprising 190 claims in the Hartley district and 40 claims in the Abercorn district. The consideration was 42,007 fully paid shares. The company now owns 365 gold mining claims in the Mazoe district, 298 in the Hartley district and 20 in the Abercorn district. An option held over the Commonwealth Gold Mining Co., Ltd., for £33,333. Twenty claims in the Abercorn District were sold to the Shamva Mines, Ltd., for 10,000 fully-paid shares and the right to subscribe for 30,000 at par and 20,000 at £2 each.

The authorised capital is £175,000, in 175,000 shares of £1 each; 152,007 shares are issued and fully paid. Under the reconstruction scheme in August, 1908, shareholders were offered one share credited as 15s. paid for every fully-paid share held, the liability being payable 2s. 6d. on application and 2s. 6d. on allotment. The capital was increased from £100,000 in October, 1909, to acquire the undertaking of Hartley Mines, Ltd. Dividend paid: for 1908-9, 2s.; 1909-10, 5s.; 3s. May 23rd, 1910, and 2s. December, 1910.

THIS company was registered January 30th, 1905, and owns a copper-mining property, comprising 1,200 claims, area 1,758 acres on the farm Berkenrode, Zoutpansberg, Northern Transvaal, also two freehold farms Tempelhof No. 1,388, and Maryland No. 1,389, of about 14,000 acres in the same district. The consideration was £100,000 in fully-paid shares. In 1908, the freehold farm Vogelzang No. 1,423, area 6,646 acres, adjoining Berkenrode, was acquired from the Transvaal Consolidated Land & Exploration Co., Ltd. A concentration plant capable of treating 50 tons per day commenced work April 30th, 1908. Ore shipments commenced in January, 1906. The Selati railway line is being extended to the mines, bringing them in direct communication with Delagoa Bay. A new main shaft has been sunk to the 400 feet level and is being continued down to 800 feet. Ore developed at September 30th, 1910, 100,000 tons, value 10 per cent. copper and 80,000 tons "probable" same value. With a view to financing the railway and carrying on mining operations on a larger scale, a reorganisation scheme is to be submitted.

The authorised capital is £200,000, in 200,000 shares of £1 each; 140,000 shares are issued and fully paid. The capital was increased from £110,000 in

THIS company was formed in Pretoria October 16th, 1888, for the purpose of acquiring 17 claims on the Main Reef, farm Doornfontein, Witwatersrand. The purchase consideration was £32,500 in fully-paid shares. In July, 1892, the company acquired the adjoining property of the Wolsingham Co., comprising 13½ acres, for £6,000 in cash and 6,500 shares. In November, 1892, the company acquired four claims from the Wolhuter Co., for 5,000 shares, and also purchased the freehold of the mynpacht on farm Doornfontein for £8,500, embracing the leases held by the Meyer and Charlton, Wolsingham, Wolhuter, and Spes Bo'a companies. In April, 1899, eight claims known as the Perkins block, between the company's mynpacht and its deep level ground, were purchased from the Wolhuter Co. for £105,000 cash. In July, 1909, 40·7 deep level claims on farm Doornfontein were acquired from the Lark Synd., Ltd., and Transvaal Lands & Mines Proprietary Synd., Ltd. for £247,450; between these claims and the company's existing property were 15 claims which had been reserved as bewaarplaatsen, the water and undermining rights of which were vested in the Government; the undermining rights of these claims have been acquired on payment to the Government of a sum which will be equal to about 11 per cent. on the profit of the company. The total mining area now held is 91 reef claims, besides nine claims water-right and bewaarplaatsen. *See plan on opposite page.*

From 1888, 30 stamps were at work until March, 1893, when 20 more were added; a new 60-stamp mill was started in July, 1895, with cyanide plant, the old stamps being stopped. 15 new stamps were added in April, 1896, making 75 stamps. In 1905, the stamps were renovated, and a slimes plant and new cyanide plant were added, also a tube mill. Another tube mill was added during 1910. During 1909, 157,943 tons yielded gold value £219,822; profit £83,265 or 10s. 6d. per ton. During 1910, 153,717 tons yielded £254,349; profit £109,278. For crushings *see table at commencement of volume.* Payable ore reserves at December 31st, 1908, 230,048 tons, value 6·4dwts. per ton; at December 31st, 1909, 296,435 tons, value 8·0dwts. per ton.

The authorised capital is £200,000, in 200,000 shares of £1 each; all the shares are issued and fully paid. The capital was increased from £40,000 to £43,000 in 1888, the 3,000 new shares being sold at £5 each; increased to £64,500 in 1889, the 21,500 new shares being issued at 30s.; to £75,000 in 1892, in order to acquire the Wolsingham property; and to £85,000 in 1894, the 10,000 new shares, with 1,470 reserve shares, being issued to shareholders at £5 each; a further 1,843 reserve shares were sold by tender in 1895, at a profit of £11,518. In April, 1899, the capital was increased to £100,000, the 15,000 new shares

THIS company was registered July 11th, 1906, and is a reconstruction of a company of same name registered in Cape Colony July 31st, 1902 (*see vol. for* 1906), to acquire a colliery situate upon the farm Blesboklaagte No. 311, in the district of Middleburg, and about 1¼ miles from Witbank railway station, Transvaal. The property is 2,113 acres in extent and formerly belonged to the Cardiff Coal Synd., Ltd., of Johannesburg. Sales of coal commenced in October, 1903; a railway siding has been constructed connecting the colliery with the Pretoria-Delagoa Bay Railway; the coal seam is 14ft. 10ins. thick. Output for 1906 (six months), 78,435 tons; 1906-7, 209,680 tons; 1907-8, 155,538 tons; 1908-9, 148,870 tons; 1909-10, 194,200 tons.

During 1910 an option over an oil shale property (area 2,419 acres), known as Mooifontein, north-east of Ermelo, Transvaal, was acquired. The company also owns 50,000 shares in the Transvaal Gold Trust, Ltd.). In November, 1906, shareholders were invited to subscribe for 3,915 shares of the Transvaal Gold Trust, Ltd.

The authorised capital is £175,000, in 65,000 five per cent. cumulative preference and 110,000 ordinary shares of £1 each; 64,599 preference and 88,159 ordinary shares are issued and fully paid, 63,986 preference and 63,967 ordinary being issued credited as fully paid. There are £15,195 six per cent. debentures (part of £25,000) which were offered for subscription at par in November, 1909, redeemable at £105 per cent. December 31st, 1920, or at any time after December 31st, 1910, at the company's discretion; holders had the right to December, 1910, to convert into fully paid ordinary shares at par; interest payable January 1st and July 1st.

Under the scheme the old debentures were to be paid off in cash, holders having the right to take one new ordinary share at par for each £1 of stock held, and shareholders were offered one fully-paid preference and one fully-paid ordinary for every two old shares held, together with right to subscribe for 45,000 ordinary shares at par. In July, 1906, 45,000 ordinary shares were offered for public subscription, debenture and shareholders in old company having prior right of allotment; 21,000 shares were underwritten for a commission of five per cent.

Dividend paid on ordinary shares: For 1908-9, 5 per cent, December, 1909; 1909-10, 6 per cent. paid October, 1910.

THIS Portuguese company was incorporated in Lisbon by deed on March 8th, 1888, and granted a Royal Charter on February 11th, 1891. The company was subsequently reconstituted and commenced operations under the present administration on May 5th, 1892. The concessions (modified by Royal Decree on July 30th, 1891) give to the company the right of administration and exploitation of about 60,000 square miles of territories in the province of Mozambique, East Africa, bounded on the north and north-west by the River Zambesi, and by the frontier of the district of Tete; on the west by the interior frontier of the province, where it meets the territory of the British South African Co; on the south by lat. 22° S.; and extending on the east to the ocean forming a coast line of nearly 300 miles. The company practically owns the whole of the

MOZAMBIQUE COMPANY—continued.

land, mines, and produce of the country, with taxing and other governmental rights. By a decree of December 22nd, 1893, the company's territories were considerably extended on the south to the 22nd parallel of lat. S. On May 17th, 1897, the duration of the charter was extended from 25 to 50 years.

Certain disputed territory in the Macequece district was allotted to this company by the Anglo-Portuguese treaty of June 11th, 1891, on condition that the company constructed a railway from Port Beira, on Pungwe Bay, through the company's territories of Manica and Sofala, and terminating at the eastern boundary of the British South Africa Co.'s territory. The Beira Railway Co., Ltd., was formed in August, 1892, to acquire the concession granted by the Mozambique Co. for constructing and working this railway, the capital being divided into 600,000 shares, of which the Mozambique Co. received 295,000 and the British South Africa Co. 305,000.

The company has granted sub-concessions to various companies working in its territories, and holds a large number of shares therein. The Oceana Consolidated Co., Ltd., has a large share interest in the company and is represented on the board.

The authorised capital is reis 6,750,000,000 (£1,500,000), in 1,500,000 shares of reis 4,500 (£1) each, of which 1,166,666 shares have been issued and are fully paid. The liability of members is limited to the amount unpaid on their shares. Before payment of a dividend on the shares 5 per cent. of the net profits is to be placed to reserve until that fund amounts to one-fourth of the authorised capital and 5 per cent. to be set aside for remuneration of the boards of administration and control. The Paris Committee issued 120,000 shares at £2 each to the Banque de Paris et des Pays Bas in 1898, the London Committee issued 60,000 shares at £2 each *pro rata* to shareholders, and a further 60,000 shares were issued at £2 each to the Banque d'Outremer, of Brussels; in 1903, 5,555 shares were issued as fully paid to the Portuguese Government and 50,000 were subscribed by the New African Co., Ltd., at 30s. In January, 1905, 42,944 were issued to shareholders at 25s. 6d. each. The capital was increased from £1,000,000 in December, 1909.

A first dividend of 7½ per cent. was declared on the 10th November, 1898 (paid December 2nd, 1898).

THIS company was registered in the Transvaal September 30th, 1895, under the title of the East Rand Extension Mines, Ltd., and owns 956 gold claims (672 reef bearing), situate on farm Leeuwpoort No. 154, on the eastern extension and dip of the East Rand Proprietary Company's group of mines, Witwatersrand, Transvaal. In May, 1896, the name was changed to Boksburg Gold Mines, Ltd., and to present title in June, 1909, on the acquisition of 80 claims (included above) from the East Rand Proprietary Mines, Ltd., for 40,000 fully-paid shares (these claims are separated from the main property by the East Rand Extension property). The main reef (gold) series has been proved on the property by boreholes at 870 to 1,431 feet depth; sinking commenced in March, 1905, to test the reefs by prospecting shafts; the reef was cut at depths ranging from 99 feet to 338 feet; average assay values in No. 1 shaft, 32dwts. over 17·8 inches width. Development work is in progress by means of two incline shafts, and when sufficiently advanced a reduction plant is to be erected with a capacity of 200,000 tons per annum.

The authorised capital is £565,000, in 565,000 shares of £1 each; 540,000 shares are issued and fully paid. The capital, originally £650,000, was reduced to £275,000 in June, 1909, by cancelling 375,000 out of 625,000 issued shares, holders receiving two new for every five old shares held; it was then increased to present amount, 250,000 shares being offered to shareholders at par *pro rata*, the issue being guaranteed by the Anglo-French Exploration Co., Ltd., and others in consideration of an option over 100,000 shares at 25s., subscribers also having an option until January 31st, 1911, over two new shares at 25s. each for every five shares subscribed. The directors have power to increase the capital to £740,000, to provide shares under the option rights.

The accounts to June 30th, 1910, submitted in Johannesburg September 21st, 1910, showed cash assets £118,070; expended on development, equipment, &c., £74,906.

A share register is kept in London. Transfer form, common; fee, 2s. 6d, per 100 shares or part of 100. Extract from chairman's speech at General Meeting held in Johannesburg December, 23rd., 1910:—In gold mines, you possess interests in South Africa, including Rhodesia, in West Africa and in New Zealand In copper you are interested in several remarkable mines in Siberia. In real estate you participate in valuable London properties. Dealing first with our South African interests, we have increased our holding in the New Lisbon Berlyn Co., and by financing the completion of the Company's milling equipment. The new mill of 20 stamps commenced running at the end of August, and the ore reserves have been added to considerably during the year, and show a great increase. Our interest in the Magato Concession has necessitated a great deal of attention during the year, and there is every reason to think that at an early date the development of this interest can be actively taken in hand. The Blackwater Mines of New Zealand, in which we have a considerable holding, has, during the year declared dividends of 3s. per share, and the development of the mines is such as to justify the hope that these dividends will not only be maintained, but increased in future. The Spassky Copper Company has also entered the ranks of dividend payers by declaring its first dividend of 2s. 6d. per share, as an interim distribution for its current financial year. It will probably interest you to know that the Spassky shares were introduced upon the Paris Bourse in January of this year, at the price of £2$\frac{5}{8}$, and that they have since risen gradually to nearly £4. Our London Committee of Directors secured a participation in the syndicate which undertook the introduction of the Spassky shares in Paris. The result of this participation will benefit our next year's accounts. You are aware that we hold a considerable interest in the Atbasar Copper Fields, Ltd., a company which owns a large copper-bearing area in the Kirghese Steppes of Siberia, South-West of the Spassky property. Associated with us and our London friends is one of the strongest American Copper Groups. During the last few months, three engineers, including two Americans of very high repute, have visited the property. There seems to be no doubt that the deposits are of extraordinary richness. A considerable amount of ore has been opened up and a report by Mr. R. Gilman Brown, estimates the quantity of higher grade ore at 190,000 long tons of ore, averaging between 13 and 14 per cent. of copper. A few hundred tons of ore have been despatched to the Spassky smelters for experimental purposes, and the intention is to start upon the preparation of the plans for the erection of a large plant. Coming now to your West African interests, I am pleased to say that the Ancobra Exploration and Dredging Company, Ltd., has shown great progress. Four dredgers are at work, and during October 649 ozs. of gold were recovered, showing a net profit of nearly £2,000, and that the first two weeks of November gave a recovery of 438 ozs. These results are obtained from dredging the river bed, but there is evidence that even richer deposits will be found on the flats on both sides of the river, and the board of the Ancobra Company have made arrangements with an expert dredge superintendent in California to take charge of the company's operations in West Africa. Particular attention has been given to the Prestea Range, and not only have we acquired a holding in the Himan Concession, Ltd., but we have also participated in the formation of the West African Trust, Ltd., a company controlling eight miles of outcrop on the Prestea line. Last, but not least, I shall have to say a few words in regard to the interest we have acquired in the Piccadilly Hotel, in London. You will be pleased to hear that the results of the first twelve months have amply justified our opinion, and this investment promises to result in a splendid success. In conjunction with Messrs. L. Ehrlich & Co., we have interested ourselves in options over a number of farms in the Free State Province. We have further, encouraged by the recent reports of the discovery of what is believed to be the Main Reef series on the farm Cyferfontein, in the Potchefstroom district, acquired some interests in that neighbourhood, and also in an option over a farm which is close to the recent discoveries of gold south-west of Pretoria. Our technical staff advises us that the prospecting work done on the farm Vlakplaats, on which the original discovery was made, has so far given most encouraging results.

THIS company was first registered in the Transvaal in 1887 as the George Goch Gold Mining Co., Ltd., to acquire 10 main reef claims, Witwatersrand, Transvaal. Subsequently the company purchased further claims owned by the Border Union and Tarker Pioneer Co., and was reconstructed in February, 1889, as the George Goch Amalgamated Gold Mining Co., Ltd. In July, 1892, the company was again reconstructed, and in 1895 purchased the adjoining property of the Metropolitan Gold Mining Co., Ltd., comprising 41 main reef claims and a 60-stamp mill, the consideration being 132,000 fully-paid shares. The company was again reconstructed, and registered under its present title in Pretoria on January 23rd, 1899. In August, 1899, the company purchased 60 deep-level claims from the Rand Mines, Ltd., for £300,000 (and £15,000 commission, as below).

NEW GOCH GOLD—continued.

The company now owns 147 claims, 126 (including 60 deep-level) being reef-bearing, situate on the farm Doornfontein, Central Witwatersrand, also two water rights (making further 26 claims available if mining rights obtained) and bewaarplaatsen. The whole of the reef series in the mine (main reef, main reef leader, and south reef) are worked, all yielding payable ore. A new main deep-level shaft has been sunk.

A 60-stamp mill on the George Goch Mine and 40 stamps on the Metropolitan Mine were at work from the end of 1895 up to May, 1897, when the Metropolitan mill was shut down; 60 new heavy stamps were started in October, 1897, also cyanide plant, and the old mill has been dismantled; the erection of 60 additional new stamps was completed in 1905, and the full mill of 120 stamps, with new cyanide works, slimes, plant and three tube mills are now at work.

During 1909, 296,870 tons yielded gold value £394,875; profit £151,762 or 10s. 2d. per ton; during 1910, 338,608 tons yielded £400,064; estimated profit £141,932. For crushings *see table at commencement of volume*. Ore reserves at December, 1908, 752,190 tons, value 6·4 dwts. per ton; at December, 1909, 586,769 tons, value 6dwts., also 191,595 tons, value 2·9dwts.

The authorised capital is £550,000, in 550,000 shares of £1 each; all the shares are issued and fully paid. In January, 1909, 150,000 shares were taken up by the General Mining and Finance Corporation, Ltd., at 27s. 6d. each, and offered to shareholders *pro rata* at 30s. each, in consideration for so doing the Corporation received an option for one year over 100,000 shares at 30s. each (exercised). The capital, formerly £325,000 in £1 shares (*see vol. for* 1898), was reduced on reconstruction in 1899 to £300,000; holders received one fully-paid share for every three. In August, 1899, the authorised capital was increased to £450,000, and to present amount in December, 1909.
